1.3 User Entered Comments & Non-Default Data

Project Characteristics - Construction - Phase 3 modelled only.

Land Use - Land uses reflect Projected Development Scenario.

Construction Phase - Construction schedule estimated based on project characteristics.

Demolition - Demolition of 281,250 sf of existing building.

Grading - Project site is currently graded; no soil impact or export.

Vehicle Trips - Vehicle trips incorporated to reflect the "Net Increase in Trips" provided by Fehr & Peers for the 'Projected Development Scenario'.

Woodstoves -

Consumer Products - CARB total statewide year 2016 ROG emissions is 208.71 tons/year, 12.89% less than the amount estimated for 2008 (239.6 tons/year). General Category consumer projects emissions factor adjusted to reflect.

Area Coating - Interior coatings were reduced from 100 g/L to 50 g/L, based on SMAQMD Rule 442 that limits VOC of 50 g/L for flat coatings.

Energy Use -

Construction Off-road Equipment Mitigation - Construction mitigation: Water Exposed Area 2x daily; Clean Paved Road (9% fugitive dust PM reduction); Unpaved road mitigation: Limit on-site construction vehicle speeds to 15 mph.

Mobile Land Use Mitigation -

Area Mitigation -

Energy Mitigation -

Water Mitigation -

Citrus Heights Sunrise Tomorrow SP (Construction Phase 3) - Sacramento County, Summer

1.3 User Entered Comments & Non-Default Data

Project Characteristics - Construction - Phase 3 modelled only.

Land Use - Land uses reflect Projected Development Scenario.

Construction Phase - Construction schedule estimated based on project characteristics.

Demolition - Demolition of 281,250 sf of existing building.

Grading - Project site is currently graded; no soil impact or export.

Vehicle Trips - Vehicle trips incorporated to reflect the "Net Increase in Trips" provided by Fehr & Peers for the 'Projected Development Scenario'.

Woodstoves -

Consumer Products - CARB total statewide year 2016 ROG emissions is 208.71 tons/year, 12.89% less than the amount estimated for 2008 (239.6 tons/year). General Category consumer projects emissions factor adjusted to reflect.

Area Coating - Interior coatings were reduced from 100 g/L to 50 g/L, based on SMAQMD Rule 442 that limits VOC of 50 g/L for flat coatings.

Energy Use -

Construction Off-road Equipment Mitigation - Construction mitigation: Water Exposed Area 2x daily; Clean Paved Road (9% fugitive dust PM reduction); Unpaved road mitigation: Limit on-site construction vehicle speeds to 15 mph.

Mobile Land Use Mitigation -

Area Mitigation -

Energy Mitigation -

Water Mitigation -

Citrus Heights Sunrise Tomorrow SP (Construction Phase 3) - Sacramento County, Winter

1.3 User Entered Comments & Non-Default Data

Project Characteristics - Construction - Phase 4 modelled only.

Land Use - Land uses reflect Projected Development Scenario.

Construction Phase - Construction schedule estimated based on project characteristics.

Demolition - Demolition of 281,250 sf of existing building.

Grading - Project site is currently graded; no soil impact or export.

Vehicle Trips - Vehicle trips incorporated to reflect the "Net Increase in Trips" provided by Fehr & Peers for the 'Projected Development Scenario'.

Woodstoves -

Consumer Products - CARB total statewide year 2016 ROG emissions is 208.71 tons/year, 12.89% less than the amount estimated for 2008 (239.6 tons/year). General Category consumer projects emissions factor adjusted to reflect.

Area Coating - Interior coatings were reduced from 100 g/L to 50 g/L, based on SMAQMD Rule 442 that limits VOC of 50 g/L for flat coatings.

Energy Use -

Construction Off-road Equipment Mitigation - Construction mitigation: Water Exposed Area 2x daily; Clean Paved Road (9% fugitive dust PM reduction); Unpaved road mitigation: Limit on-site construction vehicle speeds to 15 mph.

Mobile Land Use Mitigation -

Area Mitigation -

Energy Mitigation -

Water Mitigation -

Citrus Heights Sunrise Tomorrow SP (Construction Phase 4) - Sacramento County, Annual

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	3.5	**Precipitation Freq (Days)**	58
Climate Zone	6			**Operational Year**	2040
Utility Company	Sacramento Municipal Utility District				
CO2 Intensity (lb/MWhr)	590.31	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Project Characteristics - Construction - Phase 4 modelled only.

Land Use - Land uses reflect Projected Development Scenario.

Construction Phase - Construction schedule estimated based on project characteristics.

Demolition - Demolition of 281,250 sf of existing building.

Grading - Project site is currently graded; no soil impact or export.

Vehicle Trips - Vehicle trips incorporated to reflect the "Net Increase in Trips" provided by Fehr & Peers for the 'Projected Development Scenario'.

Woodstoves -

Consumer Products - CARB total statewide year 2016 ROG emissions is 208.71 tons/year, 12.89% less than the amount estimated for 2008 (239.6 tons/year). General Category consumer projects emissions factor adjusted to reflect.

Area Coating - Interior coatings were reduced from 100 g/L to 50 g/L, based on SMAQMD Rule 442 that limits VOC of 50 g/L for flat coatings.

Energy Use -

Construction Off-road Equipment Mitigation - Construction mitigation: Water Exposed Area 2x daily; Clean Paved Road (9% fugitive dust PM reduction); Unpaved road mitigation: Limit on-site construction vehicle speeds to 15 mph.

Mobile Land Use Mitigation -

Area Mitigation -

Energy Mitigation -

Water Mitigation -

Citrus Heights Sunrise Tomorrow SP (Construction Phase 4) - Sacramento County, Summer

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	3.5	**Precipitation Freq (Days)**	58
Climate Zone	6			**Operational Year**	2040
Utility Company	Sacramento Municipal Utility District				
CO2 Intensity (lb/MWhr)	590.31	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Project Characteristics - Construction - Phase 4 modelled only.

Land Use - Land uses reflect Projected Development Scenario.

Construction Phase - Construction schedule estimated based on project characteristics.

Demolition - Demolition of 281,250 sf of existing building.

Grading - Project site is currently graded; no soil impact or export.

Vehicle Trips - Vehicle trips incorporated to reflect the "Net Increase in Trips" provided by Fehr & Peers for the 'Projected Development Scenario'.

Woodstoves -

Consumer Products - CARB total statewide year 2016 ROG emissions is 208.71 tons/year, 12.89% less than the amount estimated for 2008 (239.6 tons/year). General Category consumer projects emissions factor adjusted to reflect.

Area Coating - Interior coatings were reduced from 100 g/L to 50 g/L, based on SMAQMD Rule 442 that limits VOC of 50 g/L for flat coatings.

Energy Use -

Construction Off-road Equipment Mitigation - Construction mitigation: Water Exposed Area 2x daily; Clean Paved Road (9% fugitive dust PM reduction); Unpaved road mitigation: Limit on-site construction vehicle speeds to 15 mph.

Mobile Land Use Mitigation -

Area Mitigation -

Energy Mitigation -

Water Mitigation -

Citrus Heights Sunrise Tomorrow SP (Construction Phase 4) - Sacramento County, Winter

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	3.5	**Precipitation Freq (Days)**	58
Climate Zone	6			**Operational Year**	2025
Utility Company	Sacramento Municipal Utility District				
CO2 Intensity (lb/MWhr)	0	**CH4 Intensity (lb/MWhr)**	0	**N2O Intensity (lb/MWhr)**	0

1.3 User Entered Comments & Non-Default Data

Project Characteristics - No construction modeled during this run (operation only).

CO2, CH4, and N2O intensity factors set to 0, since SMUD will generate "Net-Zero" GHG emissions by project buildout.

Land Use - Land uses reflect Projected Development Scenario.

Construction Phase - No construction modeled for this model run (operation only).

Vehicle Trips - Vehicle trips and trip lengths incorporated to reflect the "Net Increase in Trips" provided by Fehr & Peers for the 'Projected Development Scenario'. Includes adjustment based on Governor's Exec Order for EVs.

Woodstoves -

Consumer Products - CARB total statewide year 2016 ROG emissions is 208.71 tons/year, 12.89% less than the amount estimated for 2008 (239.6 tons/year). General Category consumer products emissions factor adjusted to reflect (0.0000186)

Area Coating - Interior coatings were reduced from 100 g/L to 50 g/L, based on SMAQMD Rule 442 that limits VOC of 50 g/L for flat coatings.

Energy Use -

Mobile Land Use Mitigation -

Area Mitigation -

Energy Mitigation -

Water Mitigation -

1.3 User Entered Comments & Non-Default Data

Project Characteristics - No construction modeled during this run (operation only).

CO2, CH4, and N2O intensity factors set to 0, since SMUD will generate "Net-Zero" GHG emissions by project buildout.

Land Use - Land uses reflect Projected Development Scenario.

Construction Phase - No construction modeled for this model run (operation only).

Vehicle Trips - Vehicle trips and trip lengths incorporated to reflect the "Net Increase in Trips" provided by Fehr & Peers for the 'Projected Development Scenario'. Includes adjustment based on Governor's Exec Order for EVs.

Woodstoves -

Consumer Products - CARB total statewide year 2016 ROG emissions is 208.71 tons/year, 12.89% less than the amount estimated for 2008 (239.6 tons/year). General Category consumer products emissions factor adjusted to reflect (0.0000186)

Area Coating - Interior coatings were reduced from 100 g/L to 50 g/L, based on SMAQMD Rule 442 that limits VOC of 50 g/L for flat coatings.

Energy Use -

Mobile Land Use Mitigation -

Area Mitigation -

Energy Mitigation -

1.3 User Entered Comments & Non-Default Data

Project Characteristics - No construction modeled during this run (operation only).

CO2, CH4, and N2O intensity factors set to 0, since SMUD will generate "Net-Zero" GHG emissions by project buildout.

Land Use - Land uses reflect Projected Development Scenario.

Construction Phase - No construction modeled for this model run (operation only).

Vehicle Trips - Vehicle trips and trip lengths incorporated to reflect the "Net Increase in Trips" provided by Fehr & Peers for the 'Projected Development Scenario'. Includes adjustment based on Governor's Exec Order for EVs.

Woodstoves -

Consumer Products - CARB total statewide year 2016 ROG emissions is 208.71 tons/year, 12.89% less than the amount estimated for 2008 (239.6 tons/year). General Category consumer products emissions factor adjusted to reflect (0.0000186)

Area Coating - Interior coatings were reduced from 100 g/L to 50 g/L, based on SMAQMD Rule 442 that limits VOC of 50 g/L for flat coatings.

Energy Use -

Mobile Land Use Mitigation -

Area Mitigation -

Energy Mitigation -

Water Mitigation -

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	3.5	**Precipitation Freq (Days)**	58
Climate Zone	6			**Operational Year**	2030
Utility Company	Sacramento Municipal Utility District				
CO2 Intensity (lb/MWhr)	0	**CH4 Intensity (lb/MWhr)**	0	**N2O Intensity (lb/MWhr)**	0

1.3 User Entered Comments & Non-Default Data

Project Characteristics - No construction modeled during this run (operation only). CO2, CH4, and N2O intensity factors reduced to zero, since SMUD has a goal of "net-zero" emissions prior to project buildout.

Land Use - Land uses reflect Projected Development Scenario.

Construction Phase - No construction modeled for this model run (operation only).

Vehicle Trips - Vehicle trips and trip lengths incorporated to reflect the "Net Increase in Trips" provided by Fehr & Peers for the 'Projected Development Scenario'. Trips rates adjusted further to account for Governor's Executive Order for electric vehicles.

Woodstoves -

Consumer Products - CARB total statewide year 2016 ROG emissions is 208.71 tons/year, 12.89% less than the amount estimated for 2008 (239.6 tons/year). General Category consumer projects emissions factor adjusted to reflect.

Area Coating - Interior coatings were reduced from 100 g/L to 50 g/L, based on SMAQMD Rule 442 that limits VOC of 50 g/L for flat coatings.

Energy Use -

Mobile Land Use Mitigation -

Area Mitigation -

Energy Mitigation -

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	3.5	**Precipitation Freq (Days)**	58
Climate Zone	6			**Operational Year**	2030
Utility Company	Sacramento Municipal Utility District				
CO2 Intensity (lb/MWhr)	0	**CH4 Intensity (lb/MWhr)**	0	**N2O Intensity (lb/MWhr)**	0

1.3 User Entered Comments & Non-Default Data

Project Characteristics - No construction modeled during this run (operation only). CO2, CH4, and N2O intensity factors reduced to zero, since SMUD has a goal of "net-zero" emissions prior to project buildout.

Land Use - Land uses reflect Projected Development Scenario.

Construction Phase - No construction modeled for this model run (operation only).

Vehicle Trips - Vehicle trips and trip lengths incorporated to reflect the "Net Increase in Trips" provided by Fehr & Peers for the 'Projected Development Scenario'. Trips rates adjusted further to account for Governor's Executive Order for electric vehicles.

Woodstoves -

Consumer Products - CARB total statewide year 2016 ROG emissions is 208.71 tons/year, 12.89% less than the amount estimated for 2008 (239.6 tons/year). General Category consumer projects emissions factor adjusted to reflect.

Area Coating - Interior coatings were reduced from 100 g/L to 50 g/L, based on SMAQMD Rule 442 that limits VOC of 50 g/L for flat coatings.

Energy Use -

Mobile Land Use Mitigation -

Area Mitigation -

Energy Mitigation -

Urbanization	Urban	**Wind Speed (m/s)**	3.5	**Precipitation Freq (Days)**	58
Climate Zone	6			**Operational Year**	2030
Utility Company	Sacramento Municipal Utility District				
CO2 Intensity (lb/MWhr)	0	**CH4 Intensity (lb/MWhr)**	0	**N2O Intensity (lb/MWhr)**	0

1.3 User Entered Comments & Non-Default Data

Project Characteristics - No construction modeled during this run (operation only). CO2, CH4, and N2O intensity factors reduced to zero, since SMUD has a goal of "net-zero" emissions prior to project buildout.

Land Use - Land uses reflect Projected Development Scenario.

Construction Phase - No construction modeled for this model run (operation only).

Vehicle Trips - Vehicle trips and trip lengths incorporated to reflect the "Net Increase in Trips" provided by Fehr & Peers for the 'Projected Development Scenario'. Trips rates adjusted further to account for Governor's Executive Order for electric vehicles.

Woodstoves -

Consumer Products - CARB total statewide year 2016 ROG emissions is 208.71 tons/year, 12.89% less than the amount estimated for 2008 (239.6 tons/year). General Category consumer projects emissions factor adjusted to reflect.

Area Coating - Interior coatings were reduced from 100 g/L to 50 g/L, based on SMAQMD Rule 442 that limits VOC of 50 g/L for flat coatings.

Energy Use -

Mobile Land Use Mitigation -

Area Mitigation -

Energy Mitigation -

CO2 Intensity (lb/MWhr)	0	**CH4 Intensity (lb/MWhr)**	0	**N2O Intensity (lb/MWhr)**	0

1.3 User Entered Comments & Non-Default Data

Project Characteristics - No construction modeled during this run (operation only). CO2, CH4, and N2O intensity factors reduced to zero, since SMUD has a goal of "net-zero" emissions prior to project buildout.

Land Use - Land uses reflect Projected Development Scenario.

Construction Phase - No construction modeled for this model run (operation only).

Vehicle Trips - Vehicle trips and trip lengths incorporated to reflect the "Net Increase in Trips" provided by Fehr & Peers for the 'Projected Development Scenario'. Trips rates adjusted further to account for Governor's Executive Order for electric vehicles.

Woodstoves -

Consumer Products - CARB total statewide year 2016 ROG emissions is 208.71 tons/year, 12.89% less than the amount estimated for 2008 (239.6 tons/year). General Category consumer projects emissions factor adjusted to reflect.

Area Coating - Interior coatings were reduced from 100 g/L to 50 g/L, based on SMAQMD Rule 442 that limits VOC of 50 g/L for flat coatings.

Energy Use -

Mobile Land Use Mitigation -

Area Mitigation -

Energy Mitigation -

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	3.5	**Precipitation Freq (Days)**	58
Climate Zone	6			**Operational Year**	2035
Utility Company	Sacramento Municipal Utility District				
CO2 Intensity (lb/MWhr)	0	**CH4 Intensity (lb/MWhr)**	0	**N2O Intensity (lb/MWhr)**	0

1.3 User Entered Comments & Non-Default Data

Project Characteristics - No construction modeled during this run (operation only). CO2, CH4, and N2O intensity factors reduced to zero, since SMUD has a goal of "net-zero" emissions prior to project buildout.

Land Use - Land uses reflect Projected Development Scenario.

Construction Phase - No construction modeled for this model run (operation only).

Vehicle Trips - Vehicle trips and trip lengths incorporated to reflect the "Net Increase in Trips" provided by Fehr & Peers for the 'Projected Development Scenario'. Trips rates adjusted further to account for Governor's Executive Order for electric vehicles.

Woodstoves -

Consumer Products - CARB total statewide year 2016 ROG emissions is 208.71 tons/year, 12.89% less than the amount estimated for 2008 (239.6 tons/year). General Category consumer projects emissions factor adjusted to reflect.

Area Coating - Interior coatings were reduced from 100 g/L to 50 g/L, based on SMAQMD Rule 442 that limits VOC of 50 g/L for flat coatings.

Energy Use -

Mobile Land Use Mitigation -

Area Mitigation -

Energy Mitigation -

Water Mitigation -

Regional Shopping Center	95.00	1000sqft	2.18	95,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	3.5	**Precipitation Freq (Days)**	58
Climate Zone	6			**Operational Year**	2035
Utility Company	Sacramento Municipal Utility District				
CO2 Intensity (lb/MWhr)	0	**CH4 Intensity (lb/MWhr)**	0	**N2O Intensity (lb/MWhr)**	0

1.3 User Entered Comments & Non-Default Data

Project Characteristics - No construction modeled during this run (operation only). CO2, CH4, and N2O intensity factors reduced to zero, since SMUD has a goal of "net-zero" emissions prior to project buildout.

Land Use - Land uses reflect Projected Development Scenario.

Construction Phase - No construction modeled for this model run (operation only).

Vehicle Trips - Vehicle trips and trip lengths incorporated to reflect the "Net Increase in Trips" provided by Fehr & Peers for the 'Projected Development Scenario'. Trips rates adjusted further to account for Governor's Executive Order for electric vehicles.

Woodstoves -

Consumer Products - CARB total statewide year 2016 ROG emissions is 208.71 tons/year, 12.89% less than the amount estimated for 2008 (239.6 tons/year). General Category consumer projects emissions factor adjusted to reflect.

Area Coating - Interior coatings were reduced from 100 g/L to 50 g/L, based on SMAQMD Rule 442 that limits VOC of 50 g/L for flat coatings.

Energy Use -

Mobile Land Use Mitigation -

Area Mitigation -

Energy Mitigation -

1.3 User Entered Comments & Non-Default Data

Project Characteristics - No construction modeled during this run (operation only). CO2, CH4, and N2O intensity factors reduced to zero, since SMUD has a goal of "net-zero" emissions prior to project buildout.

Land Use - Land uses reflect Projected Development Scenario.

Construction Phase - No construction modeled for this model run (operation only).

Vehicle Trips - Vehicle trips and trip lengths incorporated to reflect the "Net Increase in Trips" provided by Fehr & Peers for the 'Projected Development Scenario'. Trips rates adjusted further to account for Governor's Executive Order for electric vehicles.

Woodstoves -

Consumer Products - CARB total statewide year 2016 ROG emissions is 208.71 tons/year, 12.89% less than the amount estimated for 2008 (239.6 tons/year). General Category consumer projects emissions factor adjusted to reflect.

Area Coating - Interior coatings were reduced from 100 g/L to 50 g/L, based on SMAQMD Rule 442 that limits VOC of 50 g/L for flat coatings.

Energy Use -

Mobile Land Use Mitigation -

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	3.5	**Precipitation Freq (Days)**	58
Climate Zone	6			**Operational Year**	2040
Utility Company	Sacramento Municipal Utility District				
CO2 Intensity (lb/MWhr)	0	**CH4 Intensity (lb/MWhr)**	0	**N2O Intensity (lb/MWhr)**	0

1.3 User Entered Comments & Non-Default Data

Project Characteristics - No construction modeled during this run (operation only). CO2, CH4, and N2O intensity factors reduced to zero, since SMUD has a goal of "net-zero" emissions prior to project buildout.

Land Use - Land uses reflect Projected Development Scenario.

Construction Phase - No construction modeled for this model run (operation only).

Vehicle Trips - Vehicle trips and trip lengths incorporated to reflect the "Net Increase in Trips" provided by Fehr & Peers for the 'Projected Development Scenario'. Trips rates adjusted further to account for Governor's Executive Order for electric vehicles.

Woodstoves -

Consumer Products - CARB total statewide year 2016 ROG emissions is 208.71 tons/year, 12.89% less than the amount estimated for 2008 (239.6 tons/year). General Category consumer projects emissions factor adjusted to reflect.

Area Coating - Interior coatings were reduced from 100 g/L to 50 g/L, based on SMAQMD Rule 442 that limits VOC of 50 g/L for flat coatings.

Energy Use -

Mobile Land Use Mitigation -

Area Mitigation -

Energy Mitigation -

Urbanization	Urban	**Wind Speed (m/s)**	3.5	**Precipitation Freq (Days)**	58
Climate Zone	6			**Operational Year**	2040
Utility Company	Sacramento Municipal Utility District				
CO2 Intensity (lb/MWhr)	0	**CH4 Intensity (lb/MWhr)**	0	**N2O Intensity (lb/MWhr)**	0

1.3 User Entered Comments & Non-Default Data

Project Characteristics - No construction modeled during this run (operation only). CO2, CH4, and N2O intensity factors reduced to zero, since SMUD has a goal of "net-zero" emissions prior to project buildout.

Land Use - Land uses reflect Projected Development Scenario.

Construction Phase - No construction modeled for this model run (operation only).

Vehicle Trips - Vehicle trips and trip lengths incorporated to reflect the "Net Increase in Trips" provided by Fehr & Peers for the 'Projected Development Scenario'. Trips rates adjusted further to account for Governor's Executive Order for electric vehicles.

Woodstoves -

Consumer Products - CARB total statewide year 2016 ROG emissions is 208.71 tons/year, 12.89% less than the amount estimated for 2008 (239.6 tons/year). General Category consumer projects emissions factor adjusted to reflect.

Area Coating - Interior coatings were reduced from 100 g/L to 50 g/L, based on SMAQMD Rule 442 that limits VOC of 50 g/L for flat coatings.

APPENDIX B.2

Energy Outputs

On-road Mobile (Operational) Energy Usage

Unmitigated:

Step 1:

Therefore:

Average Daily VMT:

200,084	Source: Fehr & Peers

Step 2: Given:

Fleet Mix (CalEEMod Output)

LDA	LDT1	LDT2	MDV	LHD1	LHD2	MHD	HHD	OBUS	UBUS	MCY	SBUS	MH
57.9346%	3.3736%	21.3495%	10.4098%	0.9870%	0.4290%	1.8795%	2.6736%	0.1853%	0.1275%	0.5370%	0.0589%	0.0589%

And:

Gasoline MPG Factors for each Vehicle Class - Year 2040 (EMFAC2017 Output)

LDA	LDT1	LDT2	MDV	MCY	MH
42.69169874	36.69207	36.89589	30.28640045	37.28251812	5.96065515

Diesel MPG Factors for each Vehicle Class - Year 2040 (EMFAC2017 Output)

LHD1	LHD2	MHD	HHD	OBUS	UBUS	SBUS
22.54293665	19.92023	11.32557	7.214700188	5.866038537	4.954152033	6.96991

Therefore:

Weighted Average MPG Factors

Gasoline: **39.7** Diesel: **11.3**

Step 3: **Therefore:**

4,718	**daily gallons of gasoline**	**1,121**	**daily gallons of diesel**

or

1,722,057	**annual gallons of gasoline**	**409,013**	**annual gallons of diesel**

Off-road Mobile (Construction) Energy Usage

Note: For the sake of simplicity, and as a conservative estimation, it was assumed that all off-road vehicles use diesel fuel as an energy source. Demolition, Site preparation and grading off-road mobile vehicle on-site gallons of fuel are calculated below.

Given Factor:	**59.8**	**metric tons**	**CO2**	**(provided in CalEEMod Output File)**
Conversion Factor:	2204.6262	pounds	per metric ton	
Intermediate Result:	**131,748**	**pounds**	**CO2**	
Conversion Factor:	22.38	pounds	CO2 per 1 gallon of diesel fuel	Source: U.S. EIA, 2016
Final Result:	**5,886.88**	**gallons**	**diesel fuel**	http://www.eia.gov/tools/faqs/faq.cfm?id=307&t=11

Mitigated Onsite Scenario	Total CO2 (MT/yr) (provided in CalEEMod Output File)
Demolition	39.76
Site Preparation	20.00
Grading	0

On-road Mobile (Construction) Energy Usage - Demolition

Step 1: **Total Daily Worker Trips (CalEEMod output)**

15

Worker Trip Length (miles) (CalEEMod output)

10.8

Therefore:

Average Wo **39.76**

162 20.00

0

Step 2: Given:

Assumed Fleet Mix for Workers (% mix is provided on Appendix A: Calculation Details for CalEEMOD p. 15)

LDA	LDT1	LDT2
0.5	0.25	0.25

And:

Gasoline MPG Factors for each Vehicle Class - Year 2020 (EMFAC2017 output)

LDA	LDT1	LDT2
29.755243	25.581819	23.201036

Therefore:

Weighted Average Worker MPG Factor

27.073335

Step 3: **Therefore:**

6.0 **Worker daily gallons of gasoline (all workers)**

Step 4: 20 **# of Days (CalEEMod ouput)**

Therefore:

Result: **120** **Total gallons of gasoline (all workers)**

Total Hauler Trips (CalEEMod Output)

1,279

Hauler Trip Length (miles) (CalEEMod Output)

7.3

Average Hauler Daily VMT:

9,337

Fleet Mix for Workers (CalEEMod Output)

MHD	HHD
0%	100%

Therefore:

Diesel MPG Factors for each Vehicle Class - Year 2020 (EMFAC2017 output)

MHD	HHD
9.209819	5.389547

Therefore:

Weighted Average Hauler (Diesel) MPG Factor

5.389547

Therefore:

1732.4 **Worker daily gallons of gasoline (all workers)**

20 **# of Days (CalEEMod ouput)**

Therefore:

Result: **34,647** **Total gallons of diesel (hauling)**

On-road Mobile (Construction) Energy Usage - Site Preparation

Step 1: **Total Daily Worker Trips (CalEEMod Output)**

18

Worker Trip Length (miles) (CalEEMod Output)

10.8

Therefore:

Average Wo	**39.76**
194	20.00
	0

Step 2: Given:

Assumed Fleet Mix for Workers (Percentage mix is provided on Appendix A: Calculation Details for CalEEMOD p. 15)

LDA	**LDT1**	**LDT2**
0.5	0.25	0.25

And:

Gasoline MPG Factors for each Vehicle Class (from EMFAC2017) - Year 2021

LDA	**LDT1**	**LDT2**
29.755243	25.581819	23.201036

Therefore:

Weighted Average Worker MPG Factor

27.1

Step 3: **Therefore:**

7.2 **Worker daily gallons of gasoline**

Step 4: 10 **# of Days (CalEEMod Output)**

Therefore:

Result: **72** **Total gallons of gasoline**

On-road Mobile (Construction) Energy Usage - Paving

Step 1: **Total Daily Worker Trips (CalEEMod Output)**

15

Worker Trip Length (miles) (CalEEMod Output)

10.8

Therefore:

Average Wo	**39.76**
162	20.00
	0

Step 2: Given:

Assumed Fleet Mix for Workers (Percentage mix is provided on Appendix A: Calculation Details for CalEEMOD p. 15)

LDA	**LDT1**	**LDT2**
0.5	0.25	0.25

And:

Gasoline MPG Factors for each Vehicle Class (from EMFAC2017) - Year 2040

LDA	**LDT1**	**LDT2**
29.755243	25.581819	23.201036

Therefore:

Weighted Average Worker MPG Factor

27.1

Step 3: **Therefore:**

6.0 **Worker daily gallons of gasoline**

Step 4: 20 **# of Days (CalEEMod Output)**

Therefore:

Result: **120** **Total gallons of gasoline**

On-road Mobile (Construction) Energy Usage - Building Construction

Step 1:

Total Daily Worker Trips (CalEEMod Output)			Total Daily Vendor Trips (CalEEMod Output)		
384	5%	**19**	108	5%	**5**

Note: Assumes 5% of Plan Area under construction at given point in time (on average) until buildout.

Worker Trip Length (miles) (CalEEMod Output)	Vendor Trip Length (miles) (CalEEMod Output)
10.8	7.3

Therefore:

Average Worl	39.76	Average Vendor Daily VMT:
207	20.00	**39**
	0	

Step 2: Given:

Assumed Fleet Mix for Workers (Percentage mix is provided on Appendix A: Calculation Details for CalEEMOD p. 15)

LDA	LDT1	LDT2
0.5	0.25	0.25

Fleet Mix for Workers (CalEEMod Output)

MHD	HHD
0%	100%

Assumed Fleet Mix for Vendors

And:

MPG Factors for each Vehicle Class (from EMFAC2017) - Year 2040

Gasoline:

LDA	LDT1	LDT2
29.755243	25.58182	23.20104

Diesel:

MHD	HHD
9.209819342	5.389547

Therefore:

Weighted Average Worker (Gasoline) MPG Factor	Weighted Average Vendor (Diesel) MPG Factor
27.1	**5.4**

Step 3:

Therefore:		Therefore:	
8	**Worker daily gallons of gasoline**	**7**	**Vendor daily gallons of diesel**

Step 4:

1084	**# of Days (CalEEMod Output)**

Therefore:

8,303	**Total gallons of gasoline**

Therefore:

7,929	**Total gallons of diesel**

On-road Mobile (Construction) Energy Usage - Architectural Coating

Step 1: **Total Daily Worker Trips (CalEEMod Output)**

77	5%	4

Note: Assumes 5% of Plan Area under construction at given point in time (on average) until buildout.

Worker Trip Length (miles) (CalEEMod Output)

10.8

Therefore:

Average Wo	**39.76**
42	20.00
	0

Step 2: Given:

Assumed Fleet Mix for Workers (Percentage mix is provided on Appendix A: Calculation Details for CalEEMOD p. 15)

LDA	LDT1	LDT2
0.5	0.25	0.25

And:

Gasoline MPG Factors for each Vehicle Class (EMFAC2017 Output) - Year 2040

LDA	LDT1	LDT2
29.755243	25.581819	23.201036

Therefore:

Weighted Average Worker MPG Factor

27.1

Step 3: **Therefore:**

1.5 **Worker daily gallons of gasoline**

Step 4: 1,122 **# of Days (CalEEMod Output)**

Therefore:

Result: **1,723** **Total gallons of gasoline**

EMFAC2017 (v1.0.2) Emissions Inventory
Region Type: County
Region: SACRAMENTO
Calendar Year: 2020
Season: Annual
Vehicle Classification: EMFAC2011 Categories
Units: miles/day for VMT, trips/day for Trips, tons/day for Emissions, 1000 gallons/day for Fuel Consumption. Note 'day' in the unit is operation day.

Mortality					
Mortality, Non-Accidental	0 - 99	0.10	0.089	0.00029%	30386

1. Affected age ranges are shown. Other age ranges are available, but the endpoints and age ranges shown here are the ones used by the USEPA in their health assessments. The age ranges are consistent with the epidemiological study that is the basis of the health function.

2. Health effects are shown in terms of incidences of each health endpoint and how it compares to the base (2035 base year health effect incidences, or "background health incidence") values. Health effects are shown for the Reduced Sacramento 4-km Modeling Domain and the 5-Air-District Region.

3. The percent of background health incidence uses the mean incidence. The background health incidence is an estimate of the average number of people that are affected by the health endpoint in a given population over a given period of time. In this case, the background incidence rates cover the 5-Air-District Region (estimated 2035 population of 3,271,451 persons). Health incidence rates and other health data are typically collected by the government as well as the World Health Organization. The background incidence rates used here are obtained from BenMAP.

4. The total number of health incidences across the 5-Air-District Region is calculated based on the modeling data. The information is presented to assist in providing overall health context.

5. The technical specifications and map for the Reduced Sacramento 4-km Modeling Domain are included in Appendix A, Table A-1 and Appendix B, Figure B-2 of the *Guidance to Address the Friant Ranch Ruling for CEQA Projects in the Sac Metro Air District.*

Sac Metro Air District Strategic Area Project Health Effects Tool, version 2, published September 2020

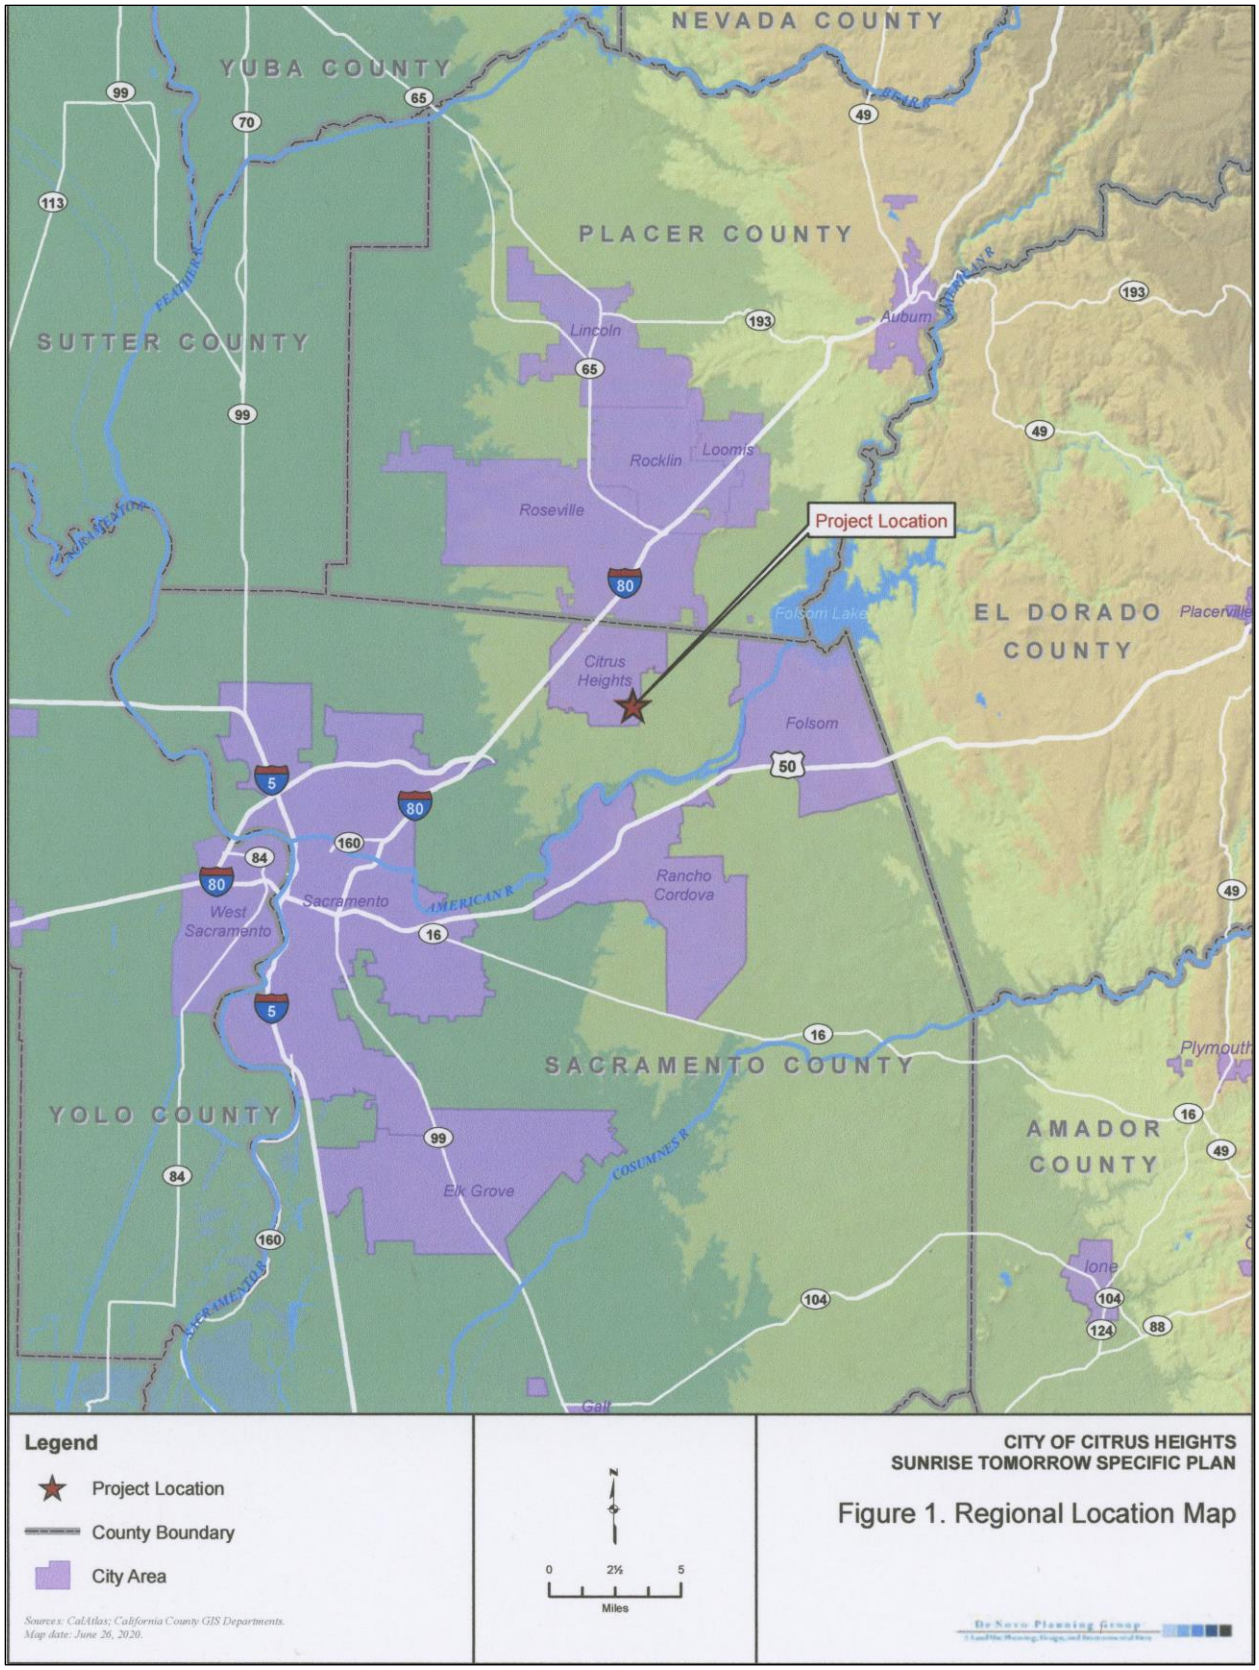
(Job #19-076)

Project Location and Setting

The Sunrise Tomorrow Specific Plan Area (Plan Area) is located at the southeast corner of Sunrise Boulevard and Greenback Lane in Citrus Heights. Citrus Heights is located within the northernmost portion of Sacramento County, approximately 10 miles northeast of downtown Sacramento, along Interstate 80 between Sacramento and Roseville. The Plan Area lies on a portion of Rancho San Juan in Township 10 North Range 6 East (Figures 1, 2, 3 and 4).

The Plan Area is part of the Sunrise Marketplace Business Improvement District (BID). The approximately 95.8-acre Plan Area is currently developed with the Sunrise Mall and associated parking areas. The Plan Area is surrounded by residential development to the south, a mix of residential and commercial development to the east, and commercial development directly to the north and west. The elevation of the site ranges from approximately 170 feet to 180 feet above mean sea level (MSL).



The project would include adoption of the Sunrise Tomorrow Specific Plan. The 95.8-acre Specific Plan Area could be developed with up to 2,220 residential dwelling units (DU), up to 480 hotel rooms, up to 320,000 square feet (SF) of retail uses, up to 960,000 SF of office uses, and up to 450,000 SF of community/institutional land uses. The Specific Plan envisions the site to be built over four phases over 20 years. Projected development phasing is based on site availability, market demand and absorption, and development feasibility.

The research for the Sunrise Tomorrow project reflects a different type of project to deal with no original soil apparent, and many years of development to the site. The cultural resource document focuses primarily on what is on the site today—the 1972 shopping mall. No survey can be undertaken, other than recording built environment resources. This report summarizes all effort to identify prehistoric and historic resources present in the Plan Area.

Research Methods

Research has been undertaken for cultural resources through within the Sunrise Mall Specific Plan Area through several different sources. Native American groups were contacted to see if they had any knowledge of resources within the area, with no previously known resources identified. A record search was conducted for the Plan Area through the North Central Information Center to see if any prehistoric or historic period sites had been recorded on the site. The final effort included proposed archival research, in an effort to document and evaluate the existing building complex. With current closures of public archival facilities, this task has been very difficult to accomplish.

Little has ever been written about the Sunrise Mall; the best source of information has been the online version of the *Sacramento Bee* newspaper. Other sources included the Sunrise Mall office's holdings and historic files held by the City of Citrus Heights. Assistance in research has been kindly provided by Larry Fritz and Teena Stern of the Citrus Heights Historical Society.

Regulatory Context

State historic preservation regulations affecting this project include the statutes and guidelines contained in the California Environmental Quality Act (CEQA; Public Resources Code sections 21083.2 and 21084.1 and sections 15064.5 and 15126.4 (b) of the CEQA Guidelines). CEQA Section 15064.5 requires that lead agencies determine whether projects may have a significant effect on archaeological and historical resources. Public Resources Code Section 21098.1 further cites: A project that may cause a substantial adverse change in the significance of an historical resource is a project that may have a significant effect on the environment.

An "historical resource" includes, but is not limited to, any object, building, structure, site, area, place, record or manuscript that is historically or archaeologically significant (Public Resources Code section 5020.1).

Advice on procedures to identify such resources, evaluate their importance, and estimate potential effects is given in several agency publications such as the series produced by the Governor's Office of Planning and Research (OPR), *CEQA and Archaeological Resources*, 1994. The technical advice series produced by OPR strongly recommends that Native American concerns and the concerns of other interested persons and corporate entities, including, but not limited to, museums, historical commissions, associations and societies be solicited as part of the process of cultural resources inventory. In addition, California law protects Native American burials, skeletal remains, and associated grave goods regardless of the antiquity and provides for the sensitive treatment and disposition of those remains (California Health and Safety Code Section 7050.5, California Public Resources Codes Sections 5097.94 et al).

The California Register of Historical Resources (Public Resources Code Section 5020 et seq.)

The State Historic Preservation Office (SHPO) maintains the California Register of Historical Resources (CRHR). Properties listed, or formally designated as eligible for listing, on the National Register of Historic Places are automatically listed on the CRHR, as are State Landmarks and Points of Interest. The CRHR also includes properties designated under local ordinances or identified through local historical resource surveys.

For the purposes of CEQA, an historical resource is a resource listed in, or determined eligible for listing in the California Register of Historical Resources. When a project will impact a site, it needs to be determined whether the site is an historical resource. The criteria are set forth in Section 15064.5(a) (3) of the CEQA Guidelines, and are defined as any resource that does any of the following:

A. Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage;

B. Is associated with the lives of persons important in our past;

C. Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values; or

D. Has yielded, or may be likely to yield, information important in prehistory or history.

In addition, the CEQA Guidelines, Section 15064.5(a) (4) states:

The fact that a resource is not listed in, or determined to be eligible for listing in the California Register of Historical Resources, not included in a local register of historical resources (pursuant to section 5020.1(k) of the Public Resources Code), or identified in an historical resources survey (meeting the criteria in section 5024.1(g) of the Public Resources Code) does not preclude a lead agency from determining that the resource may be an historical resource as defined in Public Resources Code section 5020.1(j) or 5024.1.

California Health and Safety Code Sections 7050.5, 7051, and 7054

These sections collectively address the illegality of interference with human burial remains, as well as the disposition of Native American burials in archaeological sites. The law protects such remains from disturbance, vandalism, or inadvertent destruction, and establishes procedures to be implemented if Native American skeletal remains are discovered during construction of a project, including the treatment of remains prior to, during, and after evaluation, and reburial procedures.

California Public Resources Code Section 15064.5(e)

This law addresses the disposition of Native American burials in archaeological sites and protects such remains from disturbance, vandalism, or inadvertent destruction. The section establishes procedures to be implemented if Native American skeletal remains are discovered during construction of a project and establishes the Native American Heritage Commission as the entity responsible to resolve disputes regarding the disposition of such remains.

Assembly Bill 52

Assembly Bill (AB) 52 establishes a formal consultation process for California tribes as part of CEQA and equates significant impacts on tribal cultural resources with significant environmental impacts. AB 52 defines a "California Native American Tribe" as a Native American tribe located in California that is on the contact list maintained by the Native American Heritage Commission. AB 52 requires formal consultation with California Native American Tribes prior to determining the level of environmental document if a tribe has requested to be informed by the lead agency of proposed projects. AB 52 also requires that consultation address project alternatives, mitigation measures, for significant effects, if requested by the California Native American Tribe, and that consultation be considered concluded when either the parties agree to measures to mitigate or avoid a significant effect, or the agency concludes that mutual agreement cannot be reached. Under AB 52, such measures shall be recommended for inclusion in the environmental document and adopted mitigation monitoring program if determined to avoid or lessen a significant impact on a tribal cultural resource.

Cultural Background

Prehistory

Until recent years, few archeological studies have been conducted in this region. Early excavations had focused either on the large, rich village sites in the Delta region and along the major waterways in the Central Valley or on the higher elevation sites in proposed reservoir areas, along major Sierra Nevada waterways. As a result, chronological sequences have been established for each region, with later work emphasizing refinement of these sequences.

Increasing urbanization in the Sacramento region over the past twenty years has pushed development further from the major drainages and into the margin of the Sacramento Valley and the Sierra Nevada foothills. There is no established archeological sequence for the region, but the ties seem to be stronger to the Sierra Nevada.

The project is located in an interesting area for archeological research because it is between three areas with defined archeological sequences: the Oroville locality to the north, the Central Sierra area to the east and the Central Valley/Delta area to the west. These sequences include many similar artifact types and dates for major cultural changes, but there are also significant differences between them. It is an important goal of archeology to determine how these differences relate to different cultural traditions, cultural adaptation to differing environmental conditions or other natural or cultural influences. It is not clear at present which of these sequences best reflects the prehistory of the project vicinity or if a separate local sequence is necessary to adequately describe the area.

CA-SAC-166, located about three miles southeast of the Sunrise Tomorrow Plan Area, was subjected to a salvage excavation as described by Charles Gebhardt (1962). Gebhardt noted a Late Middle Horizon/Late Horizon occupation with artifact types "not out of place in Martis Valley and clearly transitional between the Sierra Nevada and Sacramento Valley cultures."

It is clear that the most recent prehistoric cultures of the area reflect, in general, the late cultures of the Central Valley, though there are interesting local variations. Some of the differences clearly result from the greater wealth and population in the valley, but other differences may reflect a technological response to differing ecological settings and resource exploitation techniques.

In the preceding phase of prehistory there is a consistent expression of high Sierra Nevada and Great Basin relationships of some sort. However, the projectile points that reflect this connection are often produced on material imported from the Coast Ranges, although manufacture on locally available non-obsidian materials is much more common. The reasons for this situation are not clear. This could also be a response to differing ecological settings, but the relationship between foothill sites and the Martis Culture proper is an open question.

Ethnography

At the time of the gold rush, the Plan Area would lie within the territory occupied by the Nisenan Indians, identified by the language they spoke. There have been several general treatments of the Nisenan culture by Beals, 1933; Kroeber 1929, 1953; Littlejohn 1928; and Wilson and Towne 1978, Wilson 1982. There are also several more specific articles on various aspects of their culture as

reported in the bibliography and elsewhere. The following text by Norman Wilson, where not cited, is derived from Wilson and Towne 1978 and Wilson 1982.

The Nisenan peoples occupied the drainages of the Yuba, Bear, and the American Rivers from the Sacramento River on the west to the summit of the Sierra in the east. The Foothill and Hill Nisenan peoples were distinctive from the Valley Nisenan and were loosely organized into triblets or districts with large central villages, surrounded by smaller villages. These are often referred to as winter villages by older Indians. These central villages and their leaders seemed to have had power or control over the surrounding smaller villages and camps and specific surrounding territory (Beals 1933; Littlejohn 1928; Wilson and Towne 1978). These districts were oriented to the natural resources and the landforms. In the foothills and mountains, the major drainages became formal or informal boundaries with the land in between forming the district. Thus, the Placerville District is between the Cosumnes River and the Middle Fork of the American River, the Auburn District between the Middle Fork of the American River and the Bear River and the Nevada City District between the Bear River and the Yuba River. There were other villages and headmen in these districts that also held significant power and at the present time it is not clear where most of these were.

In the valley there is also the pattern of major villages controlling land and local groups of Indians. Different than the hills, the land between drainages becomes the separation between districts with the controlling villages situated along the major rivers. *Pujuni* at the mouth of the American River is a good example. There also seems to be a separation of the Valley Nisenan and the Foothill Nisenan near the edge of the valley where the foothills start. The valley peoples were more oriented to the Sacramento, American, Yuba, Feather and the Bear rivers on the valley floor. Their large villages with their complex and rich culture are usually found along these water courses. It is believed that they occupied both sides of the rivers and used the river courses for communication and major resource exploitation. Smaller stream courses were often occupied with permanent villages and seasonal camp sites. They were not large villages, and some may reflect a budding-off of valley peoples as populations expanded in late times.

All the Nisenan depended on activities attuned to the seasonal ripening of plant foods and the seasonal movements and migration of the animals and the runs of fish. With the flooding of the valley in the winter and spring a great number of animals such as elk, antelope and bears moved to the natural levees along the rivers and up into the lower foothills. Along the foothill margins they joined the resident and migratory deer herds. Huge flocks of waterfowl visited the flooded areas between the rivers and the foothills, coveys of quail gathered in the fall, and pigeons were common in the fall and spring. Steelhead and salmon ran up most of the major streams including Secret Ravine and Auburn Ravine in the fall, winter and spring. The hunting of these plentiful resources was part of the foothill lifeway. This same bounty was available to the river-oriented valley peoples out on the valley floor and along the natural levees of the rivers. There was probably not a great deal of competition for resources at this time except in lean years. Both the valley and foothill peoples lived at the edges of rich ecotones: the rivers and the valley floor; and the valley floor and the foothills.

The valley floors between the rivers were not permanently occupied and became seasonal resource bases. In many places the areas between the rivers were shallow overflow basins that flooded in the winter and spring creating great tule forests, ponds and swampy areas, in some areas there were oxbow lakes and other permanent ponds. These were hard to cross until summer and became a major resource base for the valley groups. Often access was made possible by the burning of the tule. These

areas were rich with plant and animal resources including herds of deer, elk and grizzly bears, and were exploited by the surrounding Indian people.

Two kinds of family houses were made. One was a more permanent winter house (*hu*) with a strong frame and covered with brush, mud or cedar or pine bark. It was partially excavated with an inside hearth and in some cases a portable mortar set into the ground. Sleeping was done around the edges on mats and skins, with benches or shelves to hold equipment and foods It was often up to 15 feet in diameter and provided shelter for several persons. These are often associated with the dance house (*kum*), sweat houses, and acorn granaries, and were part of the permanent villages (Beals 1933, Wilson n.d.).

The other was a house used when away from the main village and was made quite quickly of a frame covered with brush, boughs and tules. It also was excavated slightly with the removed earth piled on the outside at the base to block the wind. It often did not have a hearth and was used for sleeping and storage only. These camp shelters would be taken down when the group moved on so that animals would not live in them. When rebuilding them they were cleaned out and fresh earth was used for the floor. Hearths were usually outside at these temporary houses and often there was a common firepit for several families associated with the temporary shelters. For a quick shelter in the summer, a low circular brush wall was built in a sheltered or shaded location. Sometimes an old housepit was used for this (Wilson n.d.).

Environmental Setting

The Plan Area is located in an area with Whitney series soils, specifically Whitney fine sandy loam, deep phase, undulating to rolling topography (Weir 1950). The Whitney soil series is derived from decomposing sandstone and varies in depth. The deep phase may have a depth of 48 inches or more of weathered soil resting atop the parent sandstone bedrock.

The Plan Area was originally comprised mostly of low hills that rose above the terrain by as much as fifty feet. A small, intermittent water drainage was located in the extreme southwest corner and western edge in an area bordering what was later developed into Sunrise Boulevard.

The closest permanent water source was Arcade Creek located about one-third mile north of the Plan Area. This section of Arcade Creek sits about 25 feet lower in elevation than the Plan Area.

The Plan Area has an extremely low potential for the presence of buried prehistoric period cultural resources due to the absence of permanent surface water features and sediment that was derived from naturally weathering bedrock.

In addition, it needs to be noted that the original rolling hills present in the Plan Area were cut down by at least 25 feet to create a level building site. The Plan Area is either covered by a building complex or by asphalt and landscaping in the many acres of parking lots surrounding the buildings.

Historical Setting

Rancho San Juan

The Rancho San Juan was a 19,983-acre Mexican land grant given in 1844 by Governor Manuel Micheltorena to Joel P. Dedmond. The grant extended east of Eliab Grimes Rancho del Paso along the north bank of the American River, across from William Leidesdorff's Rancho Rio de los Americanos. The grant included present-day Orangevale, Fair Oaks, a portion of Citrus Heights and most of Carmichael.

Joel P. Dedmond, an American carpenter, claimed he had been in California since 1838. He then obtained Mexican citizenship, a lot in San Francisco, and the four and a half square league Rancho San Juan. In 1847, Dedmond sold his claim land to Hiram Grimes, the nephew of Eliab Grimes. Hiram Grimes later acquired Rancho del Paso and Rancho Pescadero.

With the cession of California to the United States following the Mexican–American War, the 1848 Treaty of Guadalupe Hidalgo provided that the existing land grants would be honored. As required by the Land Act of 1851, a claim for Rancho San Juan was filed with the Public Land Commission in 1852, and eventually, the grant was patented to Hiram Grimes in 1860.

Lawyers James Ben Ali Haggin (1822-1914) and Lloyd Tevis (1824-1899) acquired Rancho San Juan. In 1868, California Senator and President of California National Bank, Frederick K. Cox bought the southern portion of Rancho San Juan and other portions of the holdings were sold (Wikipedia: Rancho San Juan; Hoover, Rensch and Rensch 1970:299-300).

An early division of counties in California was by Township. The Sunrise Mall property lies within the eastern portion of the Center Township. Initial transportation in the region was along the Auburn Road, now Auburn Boulevard. Miners and teams travelling to the gold mining region traversed the route hauling goods from the waterfront in Sacramento, brought up the Sacramento River from San Francisco. In the early years the only town in the Center Township was the town of Antelope located on the route of the Central Pacific Railroad, over three miles north and west of the Sunrise property. Antelope served as a shipping point for the agricultural products of the region, and a supply center for the local farmers.

Early Ownership

An early settler in the Center Township was Cornelius O'Donahue. O'Donahue paid to have his biography printed in the 1880 *History of Sacramento County*. He was born in Ireland in 1828, came to the United States in 1844, and to California in 1854. After working in mining for many years, in 1863 he purchased his home ranch of 160 acres in what is now Citrus Heights. The land lies on the west side of Van Maren Lane, north of Auburn Boulevard. Cornelius had two sons and a daughter with his first wife, and married again after the demise of the first wife. That marriage resulted in one child, a daughter.

In 1872, Cornelius purchased 322 acres of Rancho San Juan, on the south side of Greenback Lane. The land extends from Fair Oaks Boulevard on the east, one mile westward (Thompson and West, *History of Sacramento County*, 1880: 253).

Cornelius Donahue travelled in 1879 to the Midwest. In 1880, he had a drawing made of his ranch, and a biography placed in the County history. He may have been ill or feeling his own mortality, he died in June 1881. The two sons and the widow inherited the 322-acre ranch, and Mary Donahue

inherited the main ranch. The 322-acre ranch is shown to be owned by John Donahue and Bros. on the 1885 County map. Mrs. C. Donahue is the owner of the 160-acre ranch (Cornelius O'Donahue probate file; Official County Map 1885. Some of the early records use the surname spelled "O'Donahue," but he is commemorated with a stained-glass window at a church in Fair Oaks as "Cornelius Donahue." To simplify, his family will be referred to as "Donahue" as his family switched to that form of the surname in about 1880).

The Donahue's youngest daughter, Catherine, married a neighbor, Adolph Van Maren, and in 1923, still retained ownership of the large portion of the family ranch, as well as many other holdings in Citrus Heights. Mrs. Donahue lived with the Van Marens in 1900. Daniel Donahue owned 302 acres of the 322 acres, with Lehan in control of the 20 acres at the corner of Greenback and Fair Oaks Boulevard (Official Map of Sacramento County 1923). This appears to be Daniel Lehan, son of Clara Donahue, sister of Daniel.

The Donahue brothers built a home on the 322-acre property, located on the western portion of their holding, about 1000 feet south of Greenback Lane, nowhere close to the site of the Mall (1911 Antelope USGS topographic quadrangle).

Daniel Donahue died working in a field on the farm in 1920. He had nine children, including a daughter, May Loretta, married to Erle A. Henderson of Sacramento (*Sacramento Bee*, 31 December 1920). The ranch apparently is purchased or enters into the ownership through inheritance by the Hendersons who live in the City of Sacramento according to census records.

In 1958, the 300-acre Henderson ranch is sold by Earl and Jack Henderson to Charles Inks, Albert Kuhn and A.J. Murphy for $855,000. A residential and commercial development was planned for the property (*Sacramento Bee,* 8 November 1958). For many years, this part of the County was considered to be part of Fair Oaks.

The Mall

In February 1968, James J. Cordano had just completed building and opening the largest shopping center in Sacramento County, Florin Center. It was the first to have three major department stores and an enclosed mall. Broadway-Hale Stores had acquired 100 acres of the Sunrise-Greenback property, and appeared to want to open a Weinstock's department store, the northern division of Broadway-Hale stores. Cordano projected in excess of one million square feet of building space and possibly four anchor tenant department stores (Weinstock's, Liberty House, Sears and J.C. Penney). He projected 60 stores in the new mall, with Florin Center opening with 46 stores (*Sacramento Bee,* 21 February 1968).

In November 1969, an article in the *Sacramento Bee* announced that the largest shopping complex in the area would be opened on the Greenback-Sunrise Corner. The estimate had been increased to more than 75 stores and 4 anchor department stores with a 1,200-foot-long air-conditioned mall, a number of free-standing buildings including service stores, banks and a restaurant. The project's architectural firm was Burke, Kober, Nicolais & Archuleta. Lawrence Reed Moline would serve as the landscape architect for the mall and the 7,000-car parking area.

James J. Cordano was to serve as the leasing agent. The co-developers were H & C Associates, consisting of the Ernest W. Hahn Company, a San Francisco Bay Area contractor, and James J.

Cordano, a Sacramento realtor. The Hahn Company was known as primarily a construction company, but had developed fifteen shopping centers in California and Nevada.

The Mall was placed in a growth area, and would draw customers from a wide area—Folsom, Roseville, Yuba City, Auburn and Placerville, as well as other suburban districts experiencing rapid growth. Cordano estimated 2,000 jobs would be created, and other businesses would be drawn to the area. The initial cost of construction was estimated at $30 million (*Sacramento Bee*, 12 November 1969).

Ground-breaking was done in a different manner. Civic leaders from the County were gathered at the Senator Hotel in downtown Sacramento on November 10, 1970, 17 miles from the site. After lunch, they watched a series of multi-colored ground-blasting explosions touched off by remote control (*Sacramento Bee*, 1 November 1970; 24 January 1983). The Mall was built on a slightly rolling property away from any natural water course, with the top 25 feet of the land cut away.

Sunrise Mall officially opened on April 19, 1972, with about two-thirds of the stores open for business. Weinstock's, at the northern end of the Mall had opened in February, and the remainder of the mall to open June 1st, with two anchors opening after that in August and October.

Sunrise Mall received an award and commendation for building ramps for wheelchair accessibility, handicapped parking spaces designated, and drinking fountains and rest rooms to accommodate the handicapped (*Sacramento Union*, 20 April 1972).

Burke, Kober, Nicolais & Archuleta

The firm of architects that designed the Mall can be traced to an original firm of Burke and Kober, a firm in the 1950s specialized in designing retail stores. By 1955, the firm has become Burke Kober Nicolais. In 1961, after becoming a licensed architect, Millard Archuleta, joined the firm as a partner, becoming Burke Kober Nicolais Archuleta. The firm became recognized for their work on regional malls, medical facilities, banks and office buildings. Developer Ernest Hahn remained the firm's top client for many years.

In the lists of noted projects for the various partners of the firm, Sunrise Mall is not recognized as a major project or note (Millard Archuleta (Legacy.com); Pacific Coast Architecture Database for: Eugene Burke; Charles McChesney Kober; Harold Nicolais; and Millard Archuleta).

Sunrise Mall

Sunrise Mall became an important shopping destination, the only mall in a semi-rural area. Sales were great, and in 1983, the Mall was completely occupied and the vacation by a store let the Mall management choose a replacement business that suited the combination of stores. The mall provided a number of promotions to bring in more shoppers including antique shows, auto shows, traveling reptile zoo, antiques radio shows and a circus (*Sacramento Bee*, 24 January 1983). A great deal of commercial development grew up around Sunrise Mall and Birdcage Center. The City of Citrus Heights incorporated on Jan. 1, 1997, and the boundary for the new city included the Sunrise Mall and adjacent Birdcage Center properties.

Remodel 1999

A major update of the mall was undertaken to replace the look of the 1970s in 1999. Arden Fair Mall had just undergone a massive upgrade with the addition of a second floor, so a $10 million update was commissioned for Sunrise Mall. The change to a clean classic design included repainting, complete re-construction of two major entrances, and the introduction of sunlight through the construction of skylights and domes. Some of the existing features of the mall were removed at the same time as part of the update (*Sacramento Bee.* May 30, 1999).

Decline of Sunrise Mall

The continuing development of eastern Sacramento County and southern Placer County led to the development of many more local strip malls and development of the Roseville Galleria and associated commercial zones, providing alternative shopping opportunities closer to the residences of an increasingly denser developed region, perhaps in response to regional traffic problems and a desire to drive less miles for a shopping trip. In addition, the rise in on-line shopping has also taken its toll on shopping malls.

Records Search

A review of records was made for the project site and a ¼-mile radius through the North Central Information Center of the California Historical Resources Information System on June 25, 2020 (NCIC File No.: SAC-90-92, Appendix 1). Records and maps were checked for information on recorded sites and previous surveys within the Plan Area and surrounding area.

There are no recorded resources within the Plan Area, or within the search radius. There is one survey of all historical resources in Citrus Heights conducted in 2006; the boundaries of the study area for this report is shown to have included the Plan Area. Four other surveys have been conducted at least partially within the Plan Area radius, with no sites recorded.

Native American Consultation

A check of the Sacred Lands files was conducted through the Native American Heritage Commission for Sacred Lands within the Plan Area. The results were negative (August 6, 2020, Appendix 2 of Appendix C). A list of Native American tribes who may have knowledge of cultural resources in the Plan Area was included with the Sacred Lands files response letter. As discussed below, all of the listed tribal groups were contacted by the City.

Three tribal groups appear on the AB 52 consultation list for the City of Citrus Heights:

- United Auburn Indian Community of the Auburn Rancheria;
- Wilton Rancheria; and
- Ione Band of Miwok.

AB 52 and SB 18 tribal consultation letters were sent on August 7, 2020 to the following:

• United Auburn Indian Community of the Auburn Rancheria (Gene Whitehouse, Chairperson);

• Wilton Rancheria (Jesus Tarango, Chairperson; Dahlton Brown, Director of Administration; Ralph Hatch, Cultural Preservation Department; and Antonio Ruiz, Cultural Resources Officer); and

• Ione Band of Miwok (Sara Setchwaelo, Chairperson).

SB 18 tribal consultation letters were sent on August 11, 2020 to the following:

• Buena Vista Rancheria of Miwok Indians (Rhonda Morningstar Pope, Chairperson);

• Nashville Enterprise Miwok-Maidu-Nishinam Tribe (Cosme Valdez, Chairperson);

• Shingle Springs Band of Miwok Indians (Regina Cuellar, Chairperson);

• Tsi Akim Maidu (Grayson Coney); and

• Colfax-Todds Valley Consolidated Tribe (Clyde Prout, Chairperson; Pamela Cubbler).

As a result of the tribal consultation letters, communications were received from the following tribal groups:

• Buena Vista Rancheria of Miwok Indians;

• Shingle Springs Band of Miwok Indians;

• United Auburn Indian Community of the Auburn Rancheria; and

• Wilton Rancheria.

On August 26, 2020, Richard Hawkins, Tribal Historic Preservation Officer with the Buena Vista Rancheria, reported the group was unaware of "Native Cultural Resources" present at the project location, and asked to be notified if something were to be found in the Plan Area.

On August 26, 2020, the City of Citrus Heights received a letter from the Shingle Springs Band of Miwok Indians requesting consultation under AB 52. On September 9, 2020, the group was informed that the Shingle Springs Band of Miwok Indians is not on the City's AB 52 tribal consultation list, but could consult under SB 18. The group was sent copies of the City's standard mitigation measures related to cultural resources, as well as the NCIC record search results indicating negative results. A date and time were assigned to the group for a project orientation meeting on September 21, 2020; however, no further communication or contact has been received from the group.

On September 10, 2020, Anna Starkey with the United Auburn Indian Community of the Auburn Rancheria reported that no known tribal cultural resources are present in the project area. The group requested to see the environmental documents for the project, and to be notified if there is

an unanticipated cultural or archaeological resource in the Plan Area. The group was sent copies of the City's standard mitigation measures related to cultural resources, as well as the NCIC record search results indicating negative results, and the City concluded there was no request for consultation.

For the AB 52 consultation, tribal groups had thirty days to respond (i.e., responses must have been received by September 8, 2020). None of the contacted individuals or tribal groups responded to the consultation letters in the 30-day period; however, Mariah Mayberry of the Wilton Rancheria replied to the request on September 10, 2020. This request was outside the 30-day AB 52 response period; as such, no consultation with this group is required or will be undertaken. The group was notified with a letter from the City on September 11, 2020 noting that they may consult on any CEQA documents like all stakeholders. The group was also sent copies of the City's standard mitigation measures related to cultural resources, as well as the NCIC record search results indicating negative results, on September 11, 2020.

As of November 4, 2020, no responses have been received from any of the other tribal groups contacted by the City, including the following:

• Ione Band of Miwok Indians (Sara Setchwaelo, Chairperson);

• Nashville Enterprise Miwok-Maidu-Nishinam Tribe (Cosme Valdez, Chairperson);

• Tsi Akim Maidu (Grayson Coney); and

• Colfax-Todds Valley Consolidated Tribe (Clyde Prout, Chairperson; Pamela Cubbler).

No previously known resources were identified by any of the contacted tribal groups.

Field Survey

A normal field survey of the Plan Area is not possible—there is no portion of the original development site open for inspection. Instead, work was limited to the photography of the existing building complex, with photographs to form a permanent part of the recordation with a DPR 523 site record. This form will be filed at the North Central Information Center of the California Historical Resources Information System, and also in the historical files of the City of Citrus Heights. In this manner, any future party interested in the history of the Sunrise Mall will be able to see images of the original Mall and the 2020 Sunrise Mall.

Building Complex Description

The Sunrise Tomorrow Plan Area has a single story, rectangular-shaped mall with four anchor stores located along the north, east (two) and south facing sides. Seven other single-story commercial buildings are located surrounding the main mall complex within the 95.8-acre Plan Area. The mall and associated businesses within the Sunrise Tomorrow Plan Area opened in part in April 1972.

The main mall currently has 91 store spaces with 1.1 million square feet of retail space. The main entrance faces to the west. The four anchor stores are multi-storied with two floors at the JC Penney and former Sears (north and south ends of mall respectively) and three floors at the two Macys anchor buildings located along the east facing façade of the main mall building.

The main mall underwent a major renovation in 1999 with the false drop ceiling replaced with two large skylights at the two primary entrances and regularly spaced strips of skylights spanning the mall interior. Seating with potted plants and new carpeting were added to the interior at this time as well. In 2007, the owners added a 500-seat food court on the east side, near the northern Macys Men's store.

Site Evaluation

As stated previously, for the purposes of CEQA, an historical resource is a resource listed in, or determined eligible for listing in the California Register of Historical Resources (CRHR). When a project will impact a site, it needs to be determined whether the site is an historical resource. Normally, a building is not considered potentially eligible until it is 50 years old. The map is 48 years old; we have chosen to complete a brief evaluation for the California Register of Historical Resources.

Criterion A: Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage.

The completion of Sunrise Mall might have provided a financial impetus for the growth of housing in the northeastern portion of Sacramento County starting in the early 1970s. The availability of the open land at reasonable prices may have created a land boom in the region, with or without the Mall, with the growth logical based on issues in other agricultural areas in the County. The lands of the region were open plains and were productive for orchards after the introduction of irrigation waters from the North Fork system. Many of the areas north of Madison Avenue were primarily in use for dry land farming, not particularly valuable crops. Farmers were eventually forced to sell as land values drove up land values.

The construction of Sunrise Mall did not make a significant contribution to the suburban growth that occurred throughout many portions of California in the 1970s and 1980s, nor any other broad pattern of California history or cultural heritage. Sunrise Mall is not eligible for the CRHR under Criterion A.

Criterion B: Is associated with the lives of persons important in our past.

The only potentially important people in association with the Sunrise Mall might be the architects, Burke, Kober, Nicolais & Archuleta. Sources have been reviewed, and the firm changed organization and partners a number of times. None of the architects are particularly well-know; none of them list Sunrise Mall as a notable project in their biographies. This building complex is more utilitarian than a design achievement. For that reason, Sunrise Mall is not eligible for the CRHR under Criterion B.

Criterion C: Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values.

Sunrise Mall is a typical suburban shopping mall from the 1970s, with no distinctive features. One of the few unique properties was the inclusion of accommodations to aid disabled patrons, beginning in the parking lot. Even though the mall was pioneering in the voluntary inclusion of such features, the Americans with Disabilities Act of 1990 made the requirements more detailed, and it became the law of the land, and strengthened over the years, with improvements and additional features required for accessibility.

Sunrise Mall is in no way distinctive in form, and does not embody any distinctive characteristics of a type, period, region, or method of construction. The Plan Area is not eligible for the CRHR under Criterion C.

Criterion D: Has yielded, or may be likely to yield, information important in prehistory or history.

The Plan Area has an extremely low potential for the presence of buried prehistoric period cultural resources due to the absence of permanent surface water features and sediment that was derived from naturally weathering bedrock. In addition, it needs to be noted that the original rolling hills present in the Plan Area were cut down by at least 25 feet to create a level building site. If a prehistoric or historic site had ever existed on the property, it would have been removed in the land-levelling, the apparent first stage of Mall construction. The Plan Area cannot yield information important in history or prehistory, and is not eligible for the CRHR under Criterion D.

Conclusions

Sunrise Mall is not an important property under the criteria of the California Register of Historical Resources.

Mitigation Measures

The following mitigation measures are derived from the standard mitigation measures for cultural and tribal cultural resources for the City of Citrus Heights.

Contractor Awareness Training

The City shall ensure that a Contractor Awareness Training Program is developed and delivered to train equipment operators about cultural resources. The program shall be designed to inform construction personnel about federal and state regulations pertaining to cultural resources; the subsurface indicators of resources that shall require work stoppage; procedures for notifying the City of any occurrences; and project-specific requirements; and enforcement of penalties and repercussions for non-compliance with the program.

The training shall be prepared by a qualified professional archaeologist and reviewed by City for approval, and may be provided in an audio-visual format, such as a DVD.

The training shall be provided once to the Construction Contractor's superintendent, who shall then be responsible for ensuring that all future equipment operators and personnel view the video and review training materials prior to their first excavation on the property. All trained personnel shall be required to sign a form that acknowledges receipt of the training. A copy of the form shall be provided to the City of Citrus Heights as proof of compliance.

Inadvertent Discoveries of Cultural Resources

If subsurface deposits believed to be cultural in origin are discovered during construction, all work shall halt within a 50-foot radius of the discovery, and the developer shall immediately notify the City of Citrus Heights Planning Manager. The contractor shall retain a qualified professional archaeologist, meeting the Secretary of the Interior's Professional Qualification Standards for prehistoric and historic archaeology and subject to approval by the City, to evaluate the significance of the find and develop appropriate management recommendations. All management recommendations shall be provided to the City in writing for the City's review and approval. If recommended by the qualified professional and approved by the City, this may include modification of the no-work radius. The following notifications shall apply depending on the nature of the find, subject to the review and approval of the City:

1. Work may resume immediately, and no agency notifications are required if: 1) the professional archaeologist determines that the find does not represent a cultural resource.

2. If the professional archaeologist determines that the find does represent a cultural resource from any time period or cultural affiliation, the City shall be notified immediately, to consult on a finding of eligibility and implementation of appropriate treatment measures, if the find is determined to be a historical resource or archaeological resource under CEQA, as defined in Section 15064.5(a) and 15064.5(c) of the CEQA Guidelines. Work shall not resume within the no-work radius until the City, through consultation as appropriate, determines that the site either:
1) is not a historical resource or archaeological resource under CEQA, as defined in Section 15064.5(a) and 15074.5(c) of the CEQA Guidelines; or 2) that the treatment measures have been completed to its satisfaction.

Inadvertent Discoveries of Human Remains

If human remains, or remains that are potentially human, are discovered during construction, the construction supervisor or on-site archaeologist shall ensure reasonable protection measures are taken to protect the discovery from disturbance (AB 2641) and shall notify the Sacramento County Coroner (per §7050.5 of the Health and Safety Code) and the City. The provisions of §7050.5 of the California Health and Safety Code, § 5097.98 of the California Public Resources Code, and Assembly Bill 2641 shall be implemented. If the Coroner determines the remains are Native American and not the result of a crime scene, the Coroner will notify the Native American Heritage Commission, which then will designate a Native American Most Likely Descendant (MLD) for the project (§ 5097.98 of the Public Resources Code). The designated MLD will have 48 hours

from the time access to the property is granted to make recommendations concerning treatment of the remains.

If the Landowner does not agree with the recommendations of the MLD, the NAHC can mediate (§ 5097.94 of the Public Resources Code). If no agreement is reached, the landowner must rebury the remains where they will not be further disturbed (§ 5097.98 of the Public Resources Code). This will also include either recording the site with the NAHC or the appropriate information center; using an open space or conservation zoning designation or easement; or recording a reinternment document with the County in which the property is located (AB 2641). Work shall not resume within the no-work radius until the City, through consultation as appropriate, determines that the treatment measures have been completed to its satisfaction.

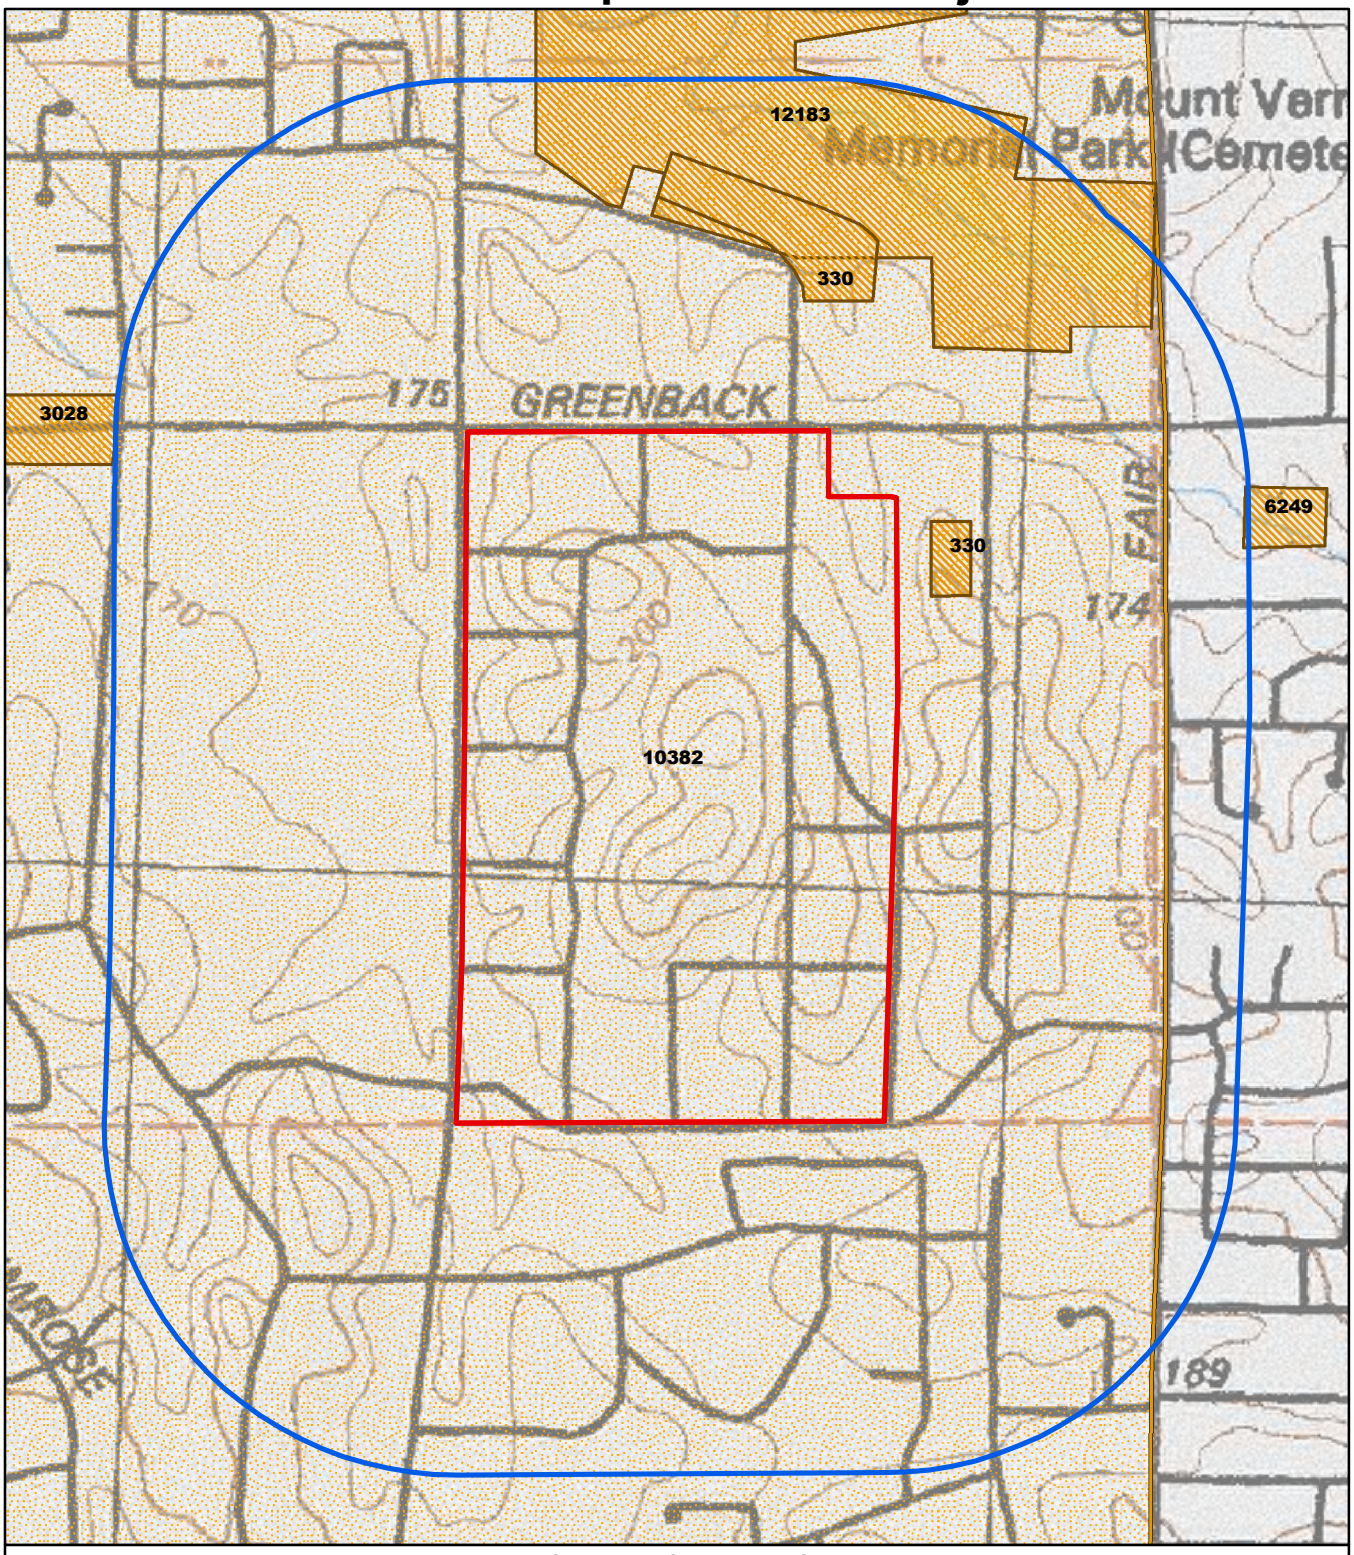
Please forward a copy of any resulting reports from this project to the office as soon as possible. Due to the sensitive nature of archaeological site location data, we ask that you do not include resource location maps and resource location descriptions in your report if the report is for public distribution. If you have any questions regarding the results presented herein, please contact the office at the phone number listed above.

The provision of CHRIS Data via this records search response does not in any way constitute public disclosure of records otherwise exempt from disclosure under the California Public Records Act or any other law, including, but not limited to, records related to archeological site information maintained by or on behalf of, or in the possession of, the State of California, Department of Parks and Recreation, State Historic Preservation Officer, Office of Historic Preservation, or the State Historical Resources Commission.



Due to processing delays and other factors, not all of the historical resource reports and resource records that have been submitted to the Office of Historic Preservation are available via this records search. Additional information may be available through the federal, state, and local agencies that produced or paid for historical resource management work in the search area. Additionally, Native American tribes have historical resource information not in the California Historical Resources Information System (CHRIS) Inventory, and you should contact the California Native American Heritage Commission for information on local/regional tribal contacts.

Should you require any additional information for the above referenced project, reference the record search number listed above when making inquiries. Requests made after initial invoicing will result in the preparation of a separate invoice.

Sincerely,

Paul Rendes, Coordinator

Re: Sunrise Tomorrow Specific Plan Project, Sacramento County

Dear Mr. Neuenschwander:

A record search of the Native American Heritage Commission (NAHC) Sacred Lands File (SLF) was completed for the information you have submitted for the above referenced project. The results were negative. However, the absence of specific site information in the SLF does not indicate the absence of cultural resources in any project area. Other sources of cultural resources should also be contacted for information regarding known and recorded sites.

Attached is a list of Native American tribes who may also have knowledge of cultural resources in the project area. This list should provide a starting place in locating areas of potential adverse impact within the proposed project area. I suggest you contact all of those indicated; if they cannot supply information, they might recommend others with specific knowledge. By contacting all those listed, your organization will be better able to respond to claims of failure to consult with the appropriate tribe. If a response has not been received within two weeks of notification, the Commission requests that you follow-up with a telephone call or email to ensure that the project information has been received.

If you receive notification of change of addresses and phone numbers from tribes, please notify me. With your assistance, we can assure that our lists contain current information.

If you have any questions or need additional information, please contact me at my email address: Nancy.Gonzalez-Lopez@nahc.ca.gov.

Sincerely,

Nancy Gonzalez-Lopez
Cultural Resources Analyst

EXECUTIVE SUMMARY

The purpose of this Phase I Environmental Site Assessment (ESA) was to assess the Sunrise Tomorrow Property (herein referred to as Site) for evidence of Recognized Environmental Conditions (RECs) resulting from current and/or former Site activities. The Site is located along Sunrise Boulevard in Citrus Heights, California (Figures 1, 2, 3, and 4) and is comprised of 95.8 acres of land developed with retail shopping mall buildings. The Site is identified by seven Sacramento County Assessor's Parcel Numbers (APNs): 143-0192-012 through -018 (Figure 3).

For the purposes of this report, the parcels that comprise the Site have been assigned identifiers, Parcels A through G. Information for the parcels is presented in the following table:

Parcel ID	Sacramento County APN	Address	Acreage
A	243-0192-016	6100 Sunrise Boulevard	2.80
B	243-0192-015	7986 Greenback Lane	12.36
C	243-0192-014	6100 Sunrise Boulevard	18.10
D	243-0192-018	6198 Sunrise Boulevard	3.21
E	243-0192-017	6063 Sunrise Boulevard	25.36
F	243-0192-012	6000 Sunrise Boulevard	12.71
G	243-0192-013	Sunrise Boulevard	21.27

The following presents a list of observations and findings identified during the preparation of this report:

- The Site was vacant, grass-covered land from at least 1937 to at least 1966 and has been developed with the Sunrise Mall since at least 1972.
- Parcel A has been developed with one structure and associated parking areas, which has been occupied by various banks, since at least 1972. WKA was not provided access to the interior of the structure located on Parcel A.
- Parcel B has been developed with two structures, one on the south-central portion and one on the northeastern portion, and associated parking areas since at least 1972. The structure on the south-central is attached to the main mall structure and has been occupied by Weinstock's and Macy's. WKA observed the elevator room in the structure

and no evidence of leaks were observed. The structure on the northeastern portion of the Site has been occupied by Goodyear since at least 2005.

- The Goodyear Tire facility currently has seven hydraulic lifts. Six of the lifts have aboveground hydraulic fluid tanks and one lift appeared to have an underground hydraulic fluid tank. WKA observed markings on the floor of the service area that would indicate the hydraulic lifts have been replaced. Former hydraulic lifts may have had underground hydraulic fluid tanks. An oil/water separator is located adjacent to the east of the structure. Hazardous waste is stored in an enclosure adjacent to the west of the structure. WKA observed Underground Service Alert (USA) markings to the north, east, south, and west of the structure. An area of patched asphalt indicating the location of a boring was observed in each USA marked area. WKA was not provided information regarding the purpose of the borings.
- Parcel C has been developed with two structures, one on the western portion and one on the eastern portion, and associated parking areas since 1972. The western structure is attached to the main mall structure and has been occupied by JC Penney since at least 1975. WKA was not provided access to the JC Penney building. The structure on the eastern portion is currently occupied by a Firestone Auto Center.
- The Firestone Auto Center consists of a customer lobby area in the northern portion and a service area in the southern portion. WKA observed a canopy area that extends off the Firestone Auto Center to the west. Concrete islands with square concrete patches were observed under the canopy. The physical appearance of the canopy area is similar to a gasoline station. WKA observed concrete patches in the concrete islands under the canopy that may indicate the former presence of fuel dispensers, and vertical pipes along one of the canopy columns that may be vent piping for an underground storage tank (UST). One of the concrete squares had “1984” written in it. WKA reviewed records for the Firestone Auto Center on the Sacramento County Environmental Management Department NextRequest website. The earliest document for the facility was dated June 1984. It is possible that a gasoline station operated at the Firestone Auto Center before 1984. If a gasoline station operated at the facility, WKA was unable to locate any assessment reports of the underground storage tanks or product lines that would have been present.
- The service area of the Firestone Auto Center consisted of 20 service bays. Four of the bays did not have hydraulic lifts; however, ground markings were visible that would indicate hydraulic lifts had been present in those bays. Sixteen hydraulic lifts are located within the service area and four of the lifts may have underground hydraulic tanks. The remainder of the lifts appeared to have aboveground hydraulic tanks. WKA observed six 110-gallon plastic totes containing new oil in the central portion of the service area. Hazardous wastes are stored in the southwestern portion of the service area, which has a concrete floor. WKA observed a waste oil tank in the hazardous waste storage area. WKA did not

observe significant staining in the area where hazardous waste was stored. An oil/water separator is located to the east of the building.

- A 550-gallon underground waste oil tank was removed from the Firestone Auto Center in 1990; however, no soil samples were collected from the tank pit.
- Parcel D was developed with two structures, one on the northern portion and a second structure on the southern portion, and associated parking areas by 1972. The structure on the northern portion was occupied by various restaurants prior to being demolished by 1993. A new structure was built by 2006 and has been occupied by a Red Robin restaurant since being constructed. WKA was not provided access to the Red Robin restaurant. The structure on the southern portion of the parcel was a multi-suite commercial building, which was demolished by 2016. One of the occupants of the former multi-suite commercial building was Sky Cleaners.
- Prior to the demolition of the multi-tenant commercial structure on Parcel D, assessment of the suite formerly occupied by Sky Cleaners was conducted. Laboratory analysis of soil and groundwater samples collected from the former Sky Cleaners suite indicated that concentrations of tetrachloroethylene detected in soils were below environmental screening levels. See Section 4.2.10 for further discussion of the previous assessment of the former Sky Cleaners.
- Parcel E has been developed with two structures, one on the west-central portion and one on the eastern portion, and associated parking areas since 1972. The structure on the western portion was occupied by various restaurants but is currently vacant. The structure on the eastern portion is the main Sunrise Mall building. The mall has had many occupants over the years including clothing stores, toy stores, and fast food restaurants. WKA was escorted by the property manager through randomly selected vacant suites in the mall, storage areas, SMUD rooms, and the security/janitorial area.
- Parcel F has been developed with the existing structure and associated parking area since 1972. The structure has been occupied by Macy's since at least 1992.
- Parcel G has been developed with three structures and associated parking areas since 1972. The structures were formerly occupied by Sears. The southern-most structure was occupied by the Sear's Auto Center. All three structures have basements beneath them.
- The southernmost structure on Parcel G was formerly occupied by a Sears Auto Service Center. The building is currently unoccupied. WKA observed an area to the east of the structure that was used for the storage of hazardous materials. WKA did not observe heavy staining in the former hazardous materials storage area and the concrete floor appeared to be in good condition. Hydraulic lifts were observed within the former service area. A basement is located beneath the structure and the hydraulic lifts extended into the basement and not the ground beneath the structure. WKA observed

an oil/water separator and the location of a monitor well to the north of the structure. WKA observed four square metal plates located to the north of the western portion of the structure. WKA was unable to remove the metal plates to determine the features that are located beneath them. The facility is a Leaking Underground Storage Tank (LUST) facility that has been undergoing assessment under the oversight of the Sacramento County Environmental Management Department. See Section 4.3.1. for a summary of the work that has been completed at the property.

- Given the age of development on the Site, it is likely that asbestos containing building materials and lead-based paints were used in the construction and/or maintenance of the Site buildings. The previous property manager for the Sunrise Mall stated that the buildings underwent extensive renovation in 1999 and asbestos-containing building materials were removed. In addition, as suites within the mall are remodeled between tenants, asbestos containing building material surveys and remediation are conducted.
- According to an environmental lien search, no environmental liens are associated with the Site.
- Given the documentation reviewed concerning the agency listings for neighboring facilities, none of the facilities reviewed is likely to have a negative impact on the Site.
- Based on the completion of the VEC-screening matrix, a VEC cannot be ruled out due to potential impacts to groundwater on Parcel G. The SCEMD has requested additional investigation of the property including soil vapor sampling. The VEC for Parcel G should be evaluated after the soil vapor investigation has been completed. In addition, if petroleum impacts are identified beneath the automotive repair facilities on Parcels B and C, the VEC should be re-evaluated for those areas.

WKA has performed this ESA in conformance with the scope and limitations of ASTM Standard Practice E 1527-13 for the Sunrise Tomorrow Property.

This assessment has revealed no RECs in connection with the Site except the following:

- On-site concerns were noted from the historical and current operations of an automotive repair shop on the eastern portion of Parcel C.
- On-site concerns were noted from the historical and current operations of an automotive repair shop on the northeastern portion of Parcel D.
- On-site concerns were noted from the lack of assessment conducted when a 550-gallon waste oil tank was removed from the Firestone Auto Center located on Parcel D.
- On-site concerns were noted from a potential gasoline station that operated at the Firestone Auto Center on Parcel D. WKA observed a canopy extending to the west of the structure with concrete features that appeared to be dispenser islands. Square

concrete patches are located within the concrete islands that would indicate the location of fuel dispensers. WKA observed "1984" in one of the concrete patches. The earliest record for the facility that the Sacramento County Environmental Management Department (SCEMD) has is dated June 1984. There is a possibility that underground storage tanks, fuel dispensers, and product lines were removed prior to the SCEMD's records.

- On-site concerns were noted from the potential petroleum hydrocarbon impacts to groundwater on Parcel G.

1.0 INTRODUCTION

1.1 Purpose

The purpose of this Phase I Environmental Site Assessment (ESA) was to evaluate the Sunrise Tomorrow Property (herein referred to as Site) for evidence of potential Recognized Environmental Conditions (RECs) resulting from current and/or former site activities as defined by the American Society of Testing and Materials (ASTM) Standard E 1527-13 (ASTM, 2013).

According to the ASTM, "this practice is intended to permit a *user* to satisfy one of the requirements to qualify for the *innocent landowner*, *contiguous property owner*, or *bona fide prospective purchaser* limitations under CERCLA [Comprehensive Environmental Response, Compensation and Liability Act] liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"): that is, the practice that constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B)."

This ESA has been performed in general conformance with the ASTM Standard E 1527-13 and the scope and limitations defined in Wallace-Kuhl & Associates (WKA) proposal, 3PR19147, dated August 8, 2019.

1.2 Scope of Services

WKA has completed this ESA for the Site shown on Figures 1 through 4. Mr. Steve McMurtry with De Novo Planning Group authorized WKA to proceed with this assessment on July 27, 2020, through a signed Subconsulting Services Agreement.

The scope of this assessment included the following:

- Conduct a site reconnaissance for visual evidence of surface contamination and potential sources of subsurface contamination;
- Conduct a visual inspection of the adjoining properties for evidence of RECs;
- Conduct interviews with the following, as available:
  - Key site manager,
  - Major occupants,

  - Past and present owners, operators,
  - Government and/or agency personnel, and,
  - Inquiries conducted at abandoned sites may include interviews with owners or occupants of neighboring or nearby properties;
- Conduct a records review, which included the following:
  - Physical setting documents to determine regional geology, general soil information, and local and regional groundwater conditions,
  - Historical information, including but not limited to, Sanborn maps, topographic maps, aerial photographs, ownership records, building department records, local street directories, zoning and land use records, and prior assessments, as available,
  - Environmental records, including federal, state, tribal, and county regulatory agency lists that will help identify RECs on the Site and the adjoining properties, and,
  - Based on the outcome of the database search, review of specific regulatory agency files for identified contaminated facilities in order to evaluate whether the listed facilities are hazardous materials threats to the Site;
- Conduct a preliminary screen for vapor encroachment conditions on the Site per ASTM E2600-15;
- Review of the completed *ASTM E 1527-13 User Questionnaire* (*Questionnaire*) regarding Recorded Environmental Liens, activity and use limitations (AULs), relationship of the purchase price to the fair market value of the Site, and any specialized knowledge of the Site;
- Review of environmental liens and Activity and Use Limitations (AULs) reports, as provided; and
- Prepare a final report of the results of the ESA.

1.3 Special Terms and Conditions

No special terms or conditions to the WKA Environmental Site Assessment Consulting Agreement or the WKA scope of services were requested or performed during the preparation of this report. De Novo Planning Group authorized WKA to perform a search for recorded environmental liens and Activity and Use Limitations (AULs) for the Site. Discussion regarding the search is included in Section 4.3.3 of this report.

1.4 User Provided Information

WKA provided De Novo Planning Group a copy of the User Questionnaire and the Helpful Documents checklist. A representative from the De Novo Planning Group completed and returned the documents to WKA. Discussion regarding the responses is provided in the following section. A copy of the completed questionnaire is included in Appendix B.

In summary, De Novo Planning Group was not aware of any records of environmental liens or AULs currently recorded against the Site. The De Novo Planning Group does not possess specialized knowledge or experience related to the Site.

The De Novo Planning Group was aware of existing "Helpful Documents" as defined in Section 10.8.1 of the ASTM Standard as noted on the "Helpful Documents Checklist" included in Appendix B. These reports are summarized in Section 4.2.10.

2.0 SITE DESCRIPTION

2.1 Site and Vicinity General Characteristics

The Site is located along Sunrise Boulevard, California (Figures 1 and 2). The Site is comprised of seven Sacramento County Assessor's Parcel Numbers (APNs): 143-0192-012 through -018, totaling 95.8 acres of land developed with retail shopping mall buildings (Figure 3).

The following table provides details regarding the development of each property that comprises the Site:

Parcel ID	Acreage	Development	Occupant
A	2.80	One structure and parking area	US Bank
B	12.36	Two structures and parking area	South-central structure: Macy's Northeastern structure: Goodyear
C	18.10	Two structures and parking area	Western structure: JC Penney Eastern structure: Firestone Auto Center
D	3.21	One structure and parking area	Red Robin restaurant
E	25.36	Two structures and parking area	Western structure: vacant restaurant Eastern structure: Sunrise Mall
F	12.71	One structure and parking area	Macy's
G	21.27	Three structures and parking area	All structures are vacant. One structure was formerly a Sears Auto Center

Surrounding land use consists of shopping centers, retail businesses, and residences (Figure 4).

The existing structures were constructed in the early 1970s, with the exception of the restaurant structure located on Parcel D. Given the age of the development on the Site, it is likely that asbestos containing building materials and lead-based paints were used in the construction and/or maintenance of the Site buildings. According to information provided in a previous Phase I ESA, the previous property manager for the Sunrise Mall stated that a major renovation was conducted in 1999 and asbestos containing building materials were removed at that time for the majority of the mall building. The previous property manager also stated that asbestos containing building material surveys have been conducted each time a mall suite is remodeled.

2.2 Site Reconnaissance

WKA visited the Site on October 8, 9, 16, and 20, 2020. Figures 5A through 5M provide color photographs of the Site taken during the site reconnaissance.

WKA was not provided access to the US Bank, Red Robin, JC Penney and occupied portions of the Sunrise Mall building.

Parcel A is developed with one structure and parking areas. The structure is occupied by US Bank. WKA was not provided access to the structure.

Parcel B is developed with a structure that is attached to the main mall building and occupied by Macy's. WKA was escorted by the store manager to the elevator room. WKA observed some staining on the concrete floor beneath the elevator machinery; however, no cracks were observed in the concrete floor.

The second structure on Parcel B is on the northeastern portion of the parcel and is occupied by a Goodyear Tire store. The store manager for Goodyear Tire provided access to the facility and answered questions. WKA observed areas to the north, east, south, and west of the structure that were marked for an Underground Service Alert (USA) and labeled "Penecore," a local drilling company. WKA observed a patched area in each of the USA areas that appeared to be the location of a boring. WKA observed an oil/water separator to the east of the structure. Hazardous materials, including waste oil, waste oil filters, and waste anti-freeze, are stored in an enclosure to the west of the structure. The enclosure has an asphalt floor. WKA observed a 180-gallon waste oil aboveground storage tank in the enclosure. The Goodyear Tire Store Manager stated that all hazardous wastes are picked up by Safety Kleen. The interior of the structure consists of a customer lobby in the northern portion and a service area and storage in the southern portion. WKA observed seven hydraulic lifts in the service area. Six of the lifts have aboveground hydraulic fluid tanks and one tank appeared to have an underground hydraulic oil tank. WKA observed markings in the floor of the service area that would indicate that the hydraulic lifts had been replaced in the past, which were likely lifts with underground hydraulic oil tanks. WKA observed eleven 55-gallon drums of new oil, other vehicle fluids in the retail sized containers, parts, and tires in the storage area of the building.

Parcel C is developed with a structure on the western portion occupied by JC Penney, a Firestone Auto Center on the eastern portion, and parking areas. WKA was not provided access to the JC Penney. The Sales Manager at the Firestone Auto Center allowed WKA to access the facility; however, he did not have much information regarding the operations. WKA observed a canopy area on the western side of the building that appeared to be the location of former fueling dispensers (See Section 4.3.1 for additional information). WKA observed concrete islands under

the canopy with concrete patches that were square. One of the concrete patches was dated 1984. An oil/water separator is located adjacent to the east of the structure. The interior of the structure is divided into two areas, a customer lobby in the northern portion and a service area in the southern portion. WKA observed 20 service bays in the service area. Four of the bays did not have hydraulic lifts; however, ground markings were visible that would indicate hydraulic lifts had been present in those bays. Sixteen hydraulic lifts are located within the service area and four of the lifts may have underground hydraulic tanks. The remainder of the lifts appeared to have aboveground hydraulic tanks. WKA observed six 110-gallon plastic totes containing new oil in the central portion of the service area. Hazardous wastes are stored in the southwestern portion of the service area, which has a concrete floor. WKA observed a waste oil tank in the hazardous waste storage area. WKA did not observe significant staining in the area where hazardous waste was stored. The Firestone Auto Center Sales Manager stated that hazardous waste is picked up by World Oil.

Parcel D is developed with a Red Robin restaurant and parking area. WKA was not provided access to the Red Robin restaurant.

Parcel E is developed with a vacant restaurant building on the western portion, the main Sunrise Mall building on the eastern portion, and parking areas. WKA was escorted through the vacant restaurant building by the property manager for the mall. The main Sunrise Mall structure is subdivided into multiple tenant spaces. The majority of the suites in the southern portion of the mall building are vacant. WKA observed randomly selected vacant suites. The suites varied from being empty to having store fixtures remaining in them. WKA was provided access to a security and janitorial room in the mall building. Janitorial supplies were stored in commercial-sized containers, but no evidence of spills or leaks were observed near them. WKA was provided access to multiple locations on the exterior of the mall building where Sacramento Municipal Utility District (SMUD) equipment is stored. Most of the areas were kept clean and orderly; however, one area labeled as “6047” was used for storage of hazardous materials. WKA observed containers with unknown substances within the 6047 area. The concrete beneath the containers was stained; however, it appeared to be in good condition with no cracking.

Parcel F is developed with one structure attached to the main mall building, which is occupied by Macy’s. WKA was escorted to the elevator room for the building by the store manager. WKA did not observed any evidence of leaks, such as stained floors, in the elevator room. The store manager also provided access to the location of an emergency generator, which is located in the loading dock adjacent to the north of the structure. WKA observed a 60-gallon diesel aboveground storage tank in the vicinity of the emergency generator. WKA did not observe evidence of leaks, such as staining, in the vicinity of the diesel aboveground storage tank.

Parcel G is developed with three vacant, commercial structures and associated parking areas. The three structures were formerly occupied by Sears. Basements are located beneath all three structures. The northwestern structure is attached to the main mall building and has two stories aboveground. WKA did not locate the elevator room in the structure. The northeastern structure is one-story with a fenced storage area attached to the south. WKA was unable to access the fenced storage area during the site visit. The southern-most structure was formerly occupied by a Sears Auto Service Center facility. WKA observed four square metal plates to the north of the western portion of the building. WKA was unable to remove the metal plates to determine the nature of the feature at the location. WKA observed an area where a vapor monitoring well has been placed to evaluate an oil/water separator that is located to the north of the eastern portion of the structure. See Section 4.2.10 for additional information regarding the previous assessment of the oil/water separator. The interior of the structure is subdivided with a customer lobby in the western portion and a service area in the eastern portion. The service area has 10 service bays. All equipment had been removed from the service area; however, the locations of former hydraulic lifts were visible. The hydraulic lifts extend into the basement of the structure and do not penetrate the ground beneath the structure. WKA was unable to determine if the lifts previously had aboveground or underground hydraulic fluid tanks. WKA observed an enclosed area on the eastern exterior of the structure that was the former location of hazardous waste storage. WKA did not observed evidence of leaks, such as staining, within the enclosed hazardous waste storage area.

2.2.1 Municipal Infrastructure and Utilities

Sacramento Municipal Utility District (SMUD) provides electricity to the Site. Pacific Gas and Electric (PG&E) provides natural gas to the Site. The Citrus Heights Water District provides potable water to the Site. Sacramento Area Sewer District provides sanitary sewer service to the Site. Pad-mounted transformers are located throughout the Site. The transformers are owned and maintained by SMUD.

2.3 Adjoining Properties

The Site is bounded to the north by Greenback Lane followed by the Citrus Town Center shopping center. Brake Masters is located adjacent to the northeast of the Site. The White Lotus Banquet Hall and a Public Self-Storage facility, Sunrise Rollerland, and Sunrise Center apartments are located to the east of the Site. Sunrise Way followed by residences bounds the Site to the south. Sunrise Boulevard followed by the Marketplace at Birdcage shopping center is located to the west of the Site. A Shell branded gasoline station is located to the northwest across the intersection of Greenback Lane and Sunrise Boulevard.

3.0 INTERVIEWS

Interviews with various persons familiar with the site vicinity, including representatives of public agencies, were conducted for the purpose of identifying past and present uses, which may have contributed to RECs on the Site. Results of those interviews are discussed in the following sections.

3.1 Owner or Key Site Manager

WKA provided parcel owners questionnaires regarding their respective properties. Mr. Andy Liu, owner of Parcel D, and Mr. Larry Smith, JC Penney owner of Parcel C, declined to respond to the questionnaires. Mr. John Reischl, Seritage owner of Parcel G, did not provide responses to the questionnaire prior to the completion of this report.

Mr. Jelson Santos, Namdar Realty Group, completed a questionnaire on behalf of the owner of Parcels A, B, E, and F. According to Mr. Santos, Sunrise Mall Realty, LLC acquired their parcels from 6401 Sunrise Blvd, LLC in November 2018. He stated that their parcels are developed with a shopping center/mall. Mr. Jelson does not have information regarding soil that may have been imported to the Site. Mr. Jelson does not have information pertaining to underground or aboveground storage tanks, wells, or septic systems. Mr. Jelson stated that, to the best of his knowledge, no environmental liens have been recorded for the parcels.

Mr. Douglas Eilender of Mandelbaum Salsburg completed a questionnaire regarding the Parcel G on behalf of Seritage SRC Finance, LLC. According to Mr. Eilender, Seritage SRC Finance, LLC acquired Parcel G in June 2005 from the Sears Holding Corporation. He said that the parcel was developed with a Sears retail and automotive center in the 1970s and that the buildings are currently vacant. Mr. Eilender does not have information regarding soil that may have been imported to the Site. Mr. Eilender referenced reports that are available on the State Water Resources Control Board's (SWRCB) GeoTracker website regarding underground storage tanks. The reports are summarized in Section 4.3.1.

3.2 Occupants (Multi-family or Major)

Given the commercial occupants of the Site, no interviews were conducted.

3.3 Past Owners, Operators, and/or Occupants

No information regarding past owners, operators, and/or occupants was received by WKA during completion of this report.

3.4 State and/or Local Government Officials

WKA contacted the Sacramento County Environmental Management Department (SCEMD), regarding any regulatory files available for the surrounding facilities. A representative with SCEMD provided available files for review on the SCEMD NextRequest website. Information reviewed on the SCEMD NextRequest website is provided in Section 4.3.

The State Water Resources Control Board (SWRCB) publishes their records on their GeoTracker website. When records are unavailable on GeoTracker, WKA makes direct contact to request unpublished documents from the SWRCB. WKA reviewed information for facilities within the vicinity of the Site on the GeoTracker website and a summary is provided in Section 4.3.

The Department of Toxic Substances Control (DTSC) publishes their records on their EnviroStor website. When records are unavailable on EnviroStor, WKA makes direct contact to request unpublished documents from the DTSC. WKA reviewed information for facilities within the vicinity of the Site on the DTSC EnviroStor website and a summary is provided in Section 4.3.

3.5 Abandoned Properties

As referenced in 40 CFR Part 312, in the case of inquiries conducted at “abandoned properties,” as defined in §312.23(d), “where there is evidence of potential unauthorized uses of the Site or evidence of uncontrolled access to the Site, the environmental professional’s inquiry must include interviewing one or more (as necessary) owners or occupants of neighboring or nearby properties from which it appears possible to have observed uses of, or releases at, such abandoned properties…” No evidence of potential unauthorized uses, or evidence of uncontrolled access to the Site was observed. The Site is not considered an abandoned property and therefore, WKA did not interview owners or occupants of neighboring properties.

4.0 RECORDS REVIEW

The purpose of the records review is to obtain and review information concerning the current and historical use of the Site and adjoining properties that would help identify the presence of RECs in connection with the Site. The records review included review and discussion of the following, as available:

- Physical Setting Source(s);
- Historical Use Information; and,
- Environmental Record Sources.

4.1 Physical Setting Source(s)

The Site is depicted on the 1992 United States Geological Survey (USGS) 7.5 Minute topographic map of the *Citrus Heights, California Quadrangle* as being located within an area of dense development. The Site is located within Section 36, Township 10 North, Range 6 East, Mount Diablo Base and Meridian, at an elevation of approximately +200 feet relative to mean sea level (msl).

4.1.1 Regional and Local Geology

The Site is located in the Great Valley geomorphic province of California, a 500-mile, northwest-trending structural trough, generally constrained to the west by the Coast Ranges and to the east by the foothills of the Sierra Nevada Range (Norris and Webb, 1990). The Great Valley consists of two valleys lying end-to-end, with the Sacramento Valley to the north and the San Joaquin Valley to the south.

The Sacramento and San Joaquin Valleys have been filled to their present elevations with thick sequences of sediment derived from both marine and terrestrial sources. The sedimentary deposits range in thickness from relatively thin deposits along the eastern valley edge to more than 25,000 feet in the south central portion of the Great Valley (Norris and Webb, 1990). The sedimentary geologic formations of the Great Valley province vary in age from Jurassic to Quaternary, with the older deposits being primarily marine in origin. Younger sediments are continentally derived and were typically deposited in lacustrine, fluvial, and alluvial environments with their primary source being the Sierra Nevada Range.

The 1981 USGS *Geologic Map of the Sacramento Quadrangle, California*, shows the Site to be underlain by the Turlock Lake Formation consisting of deeply weathered and dissected arkosic alluvium sand with some silt and minor gravel.

4.1.2 Radon Gas

Radon is a naturally occurring gas that is formed from the radioactive breakdown of radium in soil, rock, and water. Radon can move up through the ground and into living spaces through pathways and penetrations in a structure's foundation. Radon's potential presence in indoor air can only be assessed within existing buildings, as there are no currently available real time methods to assess Radon's presence over undeveloped properties.

The United States Environmental Protection Agency (EPA) has developed the EPA Map of Radon Zones to assist organizations in implementing radon-resistant building codes. The map assigns each county in the United States to one of three zones based on radon potential. The EPA uses a continuous exposure level of 4.0 picoCuries per liter (pCi/L) as an action level at which additional action is recommended.

The EPA Radon Zones are defined as:

- Zone 1 (Highest Potential) – Average indoor radon screening level greater than 4 pCi/L.
- Zone 2 (Moderate Potential) – Average indoor radon screening level between 2 and 4 pCi/L.
- Zone 3 (Lowest Potential) – Average indoor radon screening less than 2 pCi/L.

According to information provided by Environmental Data Resources in the Radius Map Report, the Site is located in Zone 3 (EDR, 2020a).

4.1.3 Soil Survey

The United States Department of Agriculture (USDA), Natural Resources Conservation Service (NRCS) has created a web-based service for accessing soil information. According to the NRCS Web Soil Survey (WSS) the majority of the near-surface soils on the Site consist of Urban land and Urban land-Xerarents-Fiddyment complex, 0 to 8 percent slopes (USDA, 2020). A copy of the Custom Soil Resource Report for the Site is provided in Appendix C.

4.1.4 Regional and Local Groundwater

The Site is located within the California Department of Water Resources (DWR) defined Sacramento Valley Groundwater Basin of the Sacramento River Hydrologic Region. WKA searched data on the DWR website and found no DWR monitored groundwater wells within one-half mile of the Site (DWR, 2020).

WKA also searched the State Water Resources Control Board's (SWRCB) GeoTracker website for quarterly groundwater monitoring reports completed for facilities in the immediate vicinity of the Site. A groundwater monitoring well was installed at the Sears Auto Center #6799 facility located on Parcel G (SWRCB, 2020). According to the public records available, the depth to groundwater in the well was 39 feet below ground surface. The GeoTracker public information is further discussed in Section 4.3.

4.2 Historical Use Information

WKA reviewed historical information to develop a history of the previous uses of the Site and surrounding area, in order to evaluate the Site and adjoining properties for evidence of RECs. Standard historical sources reviewed during the preparation of this report included the following, as available:

- Sanborn® Maps;
- Topographic Maps;
- Oil and Gas Well Maps;
- Aerial Photographs;
- Ownership Records;
- Building Department Records;
- Local Street Directories;
- Zoning and Land Use Records;
- Other Historical Sources; and,
- Prior Assessments.

Discussion of these historical sources is provided in the following sections.

4.2.1 Sanborn® Maps

Sanborn® Maps are obtained through Environmental Data Resources, Inc. (EDR®). EDR® is a national commercial provider of environmental database information. Sanborn® Maps are detailed drawings of site development, and were typically used by fire insurance companies to determine site fire insurability. According to EDR®, Sanborn® Map coverage of the Site is not available (EDR®, 2020a).

4.2.2 Topographic Maps

Historical USGS topographic maps with coverage of the Site and outlying land areas were reviewed. Topographic maps with coverage of the Site dated 1891, 1892, 1893, 1902, 1911/1914,

1951/1954, 1954, 1967, 1975, 1980, 1992, and 2012 were available for review (EDR®, 2020c). Copies of the topographic maps compiled by EDR® with coverage of the Site are included in Appendix C. Table 1 notes the changes in the vicinity of the Site.

Table 1

Year	Scale	Observations
1891	1:125,000	Site: Vacant land. North: A street followed by vacant land. Northeast: Vacant land. East: Vacant land. South: Vacant land. West: Vacant land.
1892	1:125,000	No significant changes noted for the Site or the vicinity.
1893	1:125,000	No significant changes noted for the Site or the vicinity.
1902	1: 62,500	Site: San Juan Creek is depicted transecting the southwestern portion from northwest to southeast. North: A structure is depicted to the north-northwest. Northeast: Vacant land. East: Vacant land followed by a trail road and a structure. South: A trail road and structure are depicted. West: Vacant land followed by a trail road and a structure.
1911/ 1914	1:31,680	Site: No significant changes noted. North: A second structure is depicted to the north of the previously noted street. Northeast: No significant changes noted. East: The previously noted trail road and structure are no longer depicted. South: The previously noted structure is no longer depicted. West: No significant changes noted.
1951/ 1954	1:24,000	Site: No significant changes noted. North: The previously noted street is labeled as Greenback Lane. Northeast: No significant changes noted. East: Vacant land followed by three structures and a street labeled as Fair Oaks Lane is depicted. South: The previously noted trail road is no longer depicted. An orchard with structures in the central portion is depicted. West: No significant changes noted.
1954	1:62,500	No significant changes noted for the Site or the vicinity.

Table 1		
Year	**Scale**	**Observations**
1967	1:24,000	Site: No significant changes noted. North: No significant changes noted. Northeast: No significant changes noted. East: No significant changes noted. South: No significant changes noted. West: A new road is depicted in the location of Sunrise Boulevard.
1975	1: 24,000 (Aerial Photo)	Site: The existing shopping mall is visible. North: Greenback Lane followed by several commercial-type structures in a shopping center are visible. Northeast: A structure is visible. East: Vacant land, a commercial-type structure, and residences are visible. South: Vacant land and a commercial-type structure are visible. West:
1980	1:24,000	No significant changes noted for the Site or the vicinity.
1992	1:24,000	Individual structures are no longer depicted. The Site and vicinity have been tinted to indicate dense development.
2012	1:24,000	No significant changes noted for the Site or the vicinity.

4.2.3 Oil and Gas Well Maps

Review of California Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR) website showed that the Site is not located in a designated natural gas field. No DOGGR wells are located on or within at least one mile of the Site (DOGGR, 2020).

4.2.4 Aerial Photographs

Historical aerial photographs of the Site and general vicinity were compiled by EDR®. Photographs covering the years 1937, 1947, 1957, 1964, 1966, 1972, 1984, 1993, 2006, 2009, 2012, and 2016 were available for review (EDR®, 2020d). Copies of the aerial photographs compiled by EDR® with coverage of the Site are included in Appendix C. Table 2 notes the changes on the property and in the vicinity.

Table 2		
Year	**Scale**	**Observations**
August 1937	1" = 500'	Parcels A-G: Grass-covered land with some trees. San Juan Creek is visible on the southwestern portion. North: Greenback Lane followed by an orchard and two structures to the northwest and ground markings indicating vineyards to the north and northeast are visible. Northeast: Grass-covered land. East: Grass-covered land. South: An orchard and farmstead are visible. West: Grass-covered land and San Juan Creek are visible.
July 1947	1" = 500'	No significant changes noted for the Site or the vicinity.
August 1957	1" = 500'	Parcels A-G: No significant changes noted. North: The previously noted orchards and vineyards have been removed. A new structure, which appears to be a gas station, is visible to the northwest. Northeast: No significant changes noted. East: No significant changes noted. South: No significant changes noted. West: No significant changes noted.
May 1964	1" = 500'	Parcels A-G: No significant changes noted. North: A new structure, which appears to be a gas station, is visible to the north. Northeast: No significant changes noted. East: No significant changes noted. South: No significant changes noted. West: Sunrise Boulevard is visible.
August 1966	1" = 500'	No significant changes noted for the Site or the vicinity.
July 1972	1" = 500'	Parcel A: The existing structure and parking lot are visible. Parcel B: The two existing structures and parking lot are visible. Parcel C: The two existing structures and parking lot are visible. Parcel D: Two structures are undergoing construction. Parcel E: One existing structure is visible and a second on the western portion is undergoing construction. Parcel F: The existing structure and parking lot are visible. Parcel G: The three existing structures and parking lot are visible. North: No significant changes noted. Northeast: A commercial-type structure is visible. East: Cleared land. South: No significant changes noted. West: Sunrise Boulevard has been expanded. Cleared land is visible beyond Sunrise Boulevard.

Table 2		
Year	**Scale**	**Observations**
June 1984	1" = 500'	Parcels A-G: No significant changes noted. North: The existing shopping center is visible. Northeast: No significant changes noted. East: An existing commercial-type structure and residential structures are visible. South: The existing residential structures are visible. West: The existing shopping center is visible.
May 1993	1" = 500'	Parcels A-C and E-G: No significant changes noted. Parcel D: A structure has been demolished. North: No significant changes noted. Northeast: The previously noted structure is no longer visible. East: Two additional commercial-type structures are visible. South: No significant changes noted. West: No significant changes noted.
2006	1" = 500'	Parcels A-C and E-G: No significant changes noted. Parcel D: The existing structure is visible. North: No significant changes noted. Northeast: No significant changes noted. East: No significant changes noted. South: No significant changes noted. West: Additional structures are visible. A structure on the northeastern portion has been removed and cleared land is visible.
2009	1" = 500'	Parcels A-G: No significant changes noted. North: No significant changes noted. Northeast: No significant changes noted. East: No significant changes noted. South: No significant changes noted. West: The existing structure is visible on the northeastern portion.
2012	1" = 500'	No significant changes noted for the Site or the vicinity.
2016	1" = 500'	Parcels A-C and E-G: No significant changes noted. Parcel D: A structure has been removed. North: No significant changes noted. Northeast: The existing structure is visible. East: No significant changes noted. South: No significant changes noted. West: No significant changes noted.

4.2.5 Ownership Records

Ownership information was obtained through ParcelQuest®, an on-line distributor of "Assessor-Direct property information throughout the State of California." The table below provides ownership information for the Site parcels (ParcelQuest®, 2020).

Parcel ID	Sacramento County APN	Owner
A	243-0192-016	Sunrise Mall Realty LLC/Sunrise CH LLC
B	243-0192-015	Sunrise Mall Realty LLC/Sunrise CH LLC
C	243-0192-014	Muffrey Trust/Laurie Ind Trust
D	243-0192-018	Liu Andy Kuen Shian
E	243-0192-017	Sunrise Mall Realty LLC/Sunrise CH LLC
F	243-0192-012	Sunrise Mall Realty LLC/Sunrise CH LLC
G	243-0192-013	Seritage SRC Finance LLC

4.2.6 Building Department Records

WKA contacted the City of Citrus Heights regarding building permits; however, our correspondence was not returned prior to the completion of this report.

4.2.7 Local Street Directories

Local street directories with coverage of the Site and adjoining properties were obtained from EDR® (EDR®, 2020d). These documents contain business listings based on street number identifiers. A copy of the EDR® City Directory (EDR®, 2020e) is provided in Appendix C. The following table summarizes city directory listings for the Site and adjoining properties with listings that indicate the use, storage, or generation of hazardous material or petroleum products.

Property	Address	Years	Listing
Parcel A	6199 Sunrise Boulevard	1963-1970	Not provided
		1975-1980	Security Pacific Bank
	6100 Sunrise Boulevard	1989	First Nationwide Savings
		1992	Not Listed

Property	Address	Years	Listing
Parcel B	7986 Greenback Lane	1970-1995	Not Listed
		2005-2017	Goodyear Auto Service
	6180 Sunrise Boulevard	1963-1970	Not Listed
		1975-1995	Weinstock's Department Store & Auto
		2000	Macy's
		2005-2017	Not Listed
Parcel C	6100 Sunrise Boulevard	1963-1970	Not provided
		1975-2000	JC Penney
		2005	Montelli Electric
		2010-2017	Not Listed
	6102 Sunrise Boulevard	1963-1970	Not provided
		1975-2017	Not Listed
Parcel D	6196 Sunrise Boulevard	1963-1970	Not provided
		1975	World Wines & Liquor
		1980	Big Oak Wines & Liquor
		1989	Sacramento Savings and Loan
		1992-2017	Not Listed
	6198 Sunrise Boulevard	1963-1970	Not provided
		1975-2017	Not listed
	7990 Greenback Lane	1970-1975	Not Listed
		1980-1992	King's Table Restaurant
		1995	Not Listed
		2005-2017	Red Robin
Parcel E	6063 Sunrise Boulevard	1963-1980	Not provided
		1989	Birds of a Feather
		1992-2017	Not listed
Parcel F	6000 Sunrise Boulevard	1963-1980	Not provided
		1989	Not listed
		1992-2000	Macy's
		2005-2017	Not listed
Parcel G	5900 Sunrise Boulevard	1963-2017	Not provided
	5901 Sunrise Boulevard	1963-2017	Not provided
Northwest	7899 Greenback Lane	1970-1989	Not provided
		1992	Shell gas station
		2005	Tooley Oil Company
		2010	Nakash Enterprises
		2014-2017	Not provided

Property	Address	Years	Listing
North	6201 Sunrise Avenue	1963	San Juan Hancock gas station
		1966	Vacant
		1970	Fowler's American gas station
	7901 Greenback Lane	1970	Not Listed
		1975	Placer Savings & Loan
		1980-1989	Not provided
		1992-1995	Glendale Federal
		2005	Krispy Kreme
		2010	Not Listed
		2014	123 Locksmith
		2017	123 Locksmith and Panera
Northeast	8000 Greenback Lane	1970	Not provided
		1975	Not Listed
		1980	United States of America gas station
		1989	Not Listed
		1992	Sunrise Union 76
		1995-2014	Not listed
		2017	Brake Masters

4.2.8 Zoning and Land Use Records

The Site use type and zoning was acquired from ParcelQuest. The table below summarizes the use type and for each Site parcel (ParcelQuest, 2020).

Parcel ID	Zoning	Use Type
A	SC – Shopping Center	Bank
B	SC – Shopping Center	Retail Sales
C	SC – Shopping Center	Retail Sales
D	SC – Shopping Center	Commercial
E	SC – Shopping Center	Restaurant
F	SC – Shopping Center	Retail Sales
G	SC – Shopping Center	Retail Sales

The Site is located within a an area of minimal flood hazard with the exception of a notation of San Juan Creek on the southwestern portion, as designated by the Federal Emergency Management Agency (FEMA). The area around San Juan Creek is noted as having a one

percent chance flood discharge contained in structure. The floodplain map is provided in Appendix C.

WKA reviewed data provided on the National Pipeline Mapping System website and identified one pipeline approximately 0.5 miles south of the Site. The pipeline is reportedly operated by PG&E and used for the transmission of natural gas (NPMS, 2020).

4.2.9 Other Historical Sources

Review of additional historical sources was not warranted in order for the Environmental Professional to make a determination as to evidence of potential RECs on the Site.

4.2.10 Prior Assessments

WKA reviewed a Phase I ESA, dated January 17, 2008, for Parcels A, B, D, and E prepared by IVI Due Diligence Services, Inc. (IVI). According to IVI, Parcel A was developed with a US Bank, Parcel B was developed with a Good Year Tire and Macy's Men's store, Parcel D was developed with a Red Robin and a multi-tenant building occupied by H&R Block, a vacant grocery store, a vacant space, the former Sky Cleaners Unit, and Cosmo Hair Supply; and, Parcel E was developed with the Elephant Bar and the Sunrise Mall building. IVI noted that the Sunrise Mall Building was constructed in 1971 and that the buildings occupied by Red Robin and Elephant Bar were constructed in the 1990s after former restaurant buildings were demolished in those locations. IVI reported that occupants in 2008 of environmental concern were Ritz Big Print Photo Store, The Picture People, and Goodyear Tire. IVI interviewed representatives with Ritz Big Print Photo Store and The Picture People who confirmed that each business had conducted photo processing. Each business noted that silver waste was recovered and disposed of by a hazardous material disposal company. IVI summarized previous assessment of the Parcels. IVI summarized a 2004 Phase I ESA that noted Sky Cleaners as a potential concern and recommended a subsurface investigation of the area. According to IVI, an investigation of Sky Cleaners was conducted and documented in a Phase II ESA, dated October 4, 2004. No groundwater was encountered during the October 2004 investigation and no groundwater samples were collected. Laboratory analysis of soil samples indicated that "trace concentrations of tetrachloroethylene, MEK, and acetone significantly below cleanup levels were found within the soil borings." IVI did not note concerns associated with the Goodyear Tire during the site visit. IVI noted the presence of seven below ground hydraulic lifts in the Goodyear Tire facility. IVI stated that Goodyear Tire management did not report any leaks or service concerns with the hydraulic lifts and did not recommend additional assessment around them. IVI noted that there are two hydraulic elevators and six hydraulic escalators in the Macy's Men's building. No evidence of leaks were observed in the vicinity of the elevator and escalator equipment; therefore, no additional assessment was recommended.

IVI interviewed the mall manager and a consultant that had been performing asbestos sampling at the mall since 1985. They reported that asbestos was abated from the mall building during a major renovation in 1999 and that 75 percent of the individual tenant spaces had been abated. IVI noted that if lead-based paint had been used on the mall building, it would have been removed during the 1999 renovation. IVI collected 20 water samples from faucets throughout the mall to evaluate for lead in drinking water. Laboratory analysis of the water samples indicated that concentrations of lead detected were below the US EPA action level. IVI reported that there were three diesel powered emergency generators on the mall roof. IVI did not observe evidence of leaks. IVI noted that a forth emergency generator used natural gas. IVI noted that Sky Cleaners operated for three years after soil samples were collected and recommended additional investigation of the suite it had formerly occupied.

IVI prepared a Limited Phase II Environmental Site Assessment, dated March 4, 2008, to address concerns noted for the Sky Cleaners suite in their January 2008 Phase I ESA. IVI advanced three soil borings at the suite that had been occupied by Sky Cleaners. Laboratory analysis of a soil sample collected from the former waste storage area indicated a tetrachloroethylene concentration of 0.014 milligrams per kilogram (mg/kg), which was below the US EPA Region 9 Preliminary Remediation Goal of 0.48 mg/kg. IVI concluded that no further assessment of the Sky Cleaners was warranted.

IVI prepared a Phase I ESA, dated February 19, 2008, for the St. Vincent de Paul Thrift Store and Vacant Parcel (Property) located adjacent to the east of the Site. This property is not included in the current ESA. According to IVI, a Pep Boys Automotive Service and Retail Center had occupied the Property building from 1988 to 2003. IVI reported that prior to the closure of the Pep Boys, all automotive service equipment was removed under the oversight of the Sacramento County Environmental Management Department. A waste oil underground storage tank was removed in 1998 and the SCEMD issued a no further action letter in December 1999. IVI concluded that the former automotive repair activities were not an REC and no additional assessment was warranted.

4.3 Environmental Record Sources

4.3.1 Regulatory Agency Databases

EDR® was contacted to provide a summary of facilities listed on regulatory agency databases (EDR®, 2020a). Table 3 summarizes the researched ASTM required *Standard Environmental Record Sources*, as well as several *Additional Environmental Record Sources*, as defined in Sections 8.2.1 and 8.2.2 of the ASTM Standard. For additional reference, the EDR® Radius Map Report with GeoCheck is included in Appendix D.

Table 3			
	EDR Listed Database	*ASTM E 1527-13 Search Distance*	No. of Facilities Listed (within Search Radius)
Federal			
Federal NPL Site List	*NPL*	1-mile	0
Federal Delisted NPL Site List	*Delisted NPL*	½-mile	0
Federal CERCLIS List	*CERCLIS*	½-mile	0

Sacramento County Contaminated Sites	*Sac Co CS*	½-mile	7
Sacramento County Master List	*Sac Co ML*	½-mile	109

Review of the EDR® report indicates the Site is not listed on any of the EDR® databases. Regulatory information reviewed concerning the Site, adjoining properties, and the nearest facility in each cardinal direction identified within its respective ASTM search distance is detailed below.

The EDR Radius Report identified 157 Department of Toxic Substances Control (DTSC) Haznet listings within 0.25 miles of the Site. The DTSC Haznet database is a list of all facilities that have submitted manifests for the disposal of hazardous waste at a landfill. The EDR report identified 109 listings Sacramento County Master List database within 0.25 miles of the Site. The Sacramento County Master List is a database of all facilities that are regulated, permitted, and/or inspected by the Sacramento County Environmental Management Department (SCEMD). Thirty-two listings were identified on the California Environmental Protection Agency's California Environmental Reporting System Hazardous Waste System (CERS Haz Waste). The CERS Haz Waste database lists all facilities categorized as Hazardous Chemical Management, Hazardous Waste On-site Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA Large Quantity Hazardous Waste Generator Program. A listing on these databases is not considered to be indicative of a release of a hazardous material or petroleum product at a property.

The Goodyear Tire Center, 7986 Greenback Lane, is located on Parcel D. The facility is listed on the CERS Haz Waste, CERS Tanks, DTSC Haznet, and Sacramento County Master List databases. WKA reviewed documents for the facility on the SCEMD NextRequest website. The most recent inspection report for the facility was dated September 28, 2016, and no violations were noted. WKA did not locate records to indicate that the facility had any underground storage tanks for waste oil or fuel in the past. Based on the information reviewed, no additional concerns were noted; however, the historical operations of the automotive repair facility is an REC.

The Sky Cleaners facility, 6186 Sunrise Mall, was located at the Site on Parcel D. The facility is listed on US EPA Drycleaners, Sacramento County Master List, DTSC Haznet, and CERS databases. WKA reviewed inspection reports for the facility dated between 1988 and 2000 on the SCEMD website. The inspection reports indicate that tetrachloroethylene was used by the facility. No assessment reports were available from the SCEMD; however, previous assessments were summarized in Section 4.2.10. Based on the information reviewed, this facility has not impacted the Site.

The Firestone Store #35C, 6102 Sunrise Mall, is located on the eastern portion of Parcel C. The facility is listed on the DTSC Haznet, Sacramento County Master List, and Historical Underground Storage Tank (UST) databases. WKA reviewed records for the facility on the SCEMD NextRequest website. The earliest available document for the facility is a Hazardous

Substance Storage Statement, dated June 8, 1984, which indicates that an underground waste oil tank was present; however, no information regarding the installation date or capacity was provided. According to a SCEMD Consolidated Application for Authority to Remove Underground Storage Tanks a 550-gallon underground waste oil storage tank was removed from the facility. A SCEMD inspector that observed the removed tank noted that "no apparent evidence of contamination" was observed. No soil samples were collected from the location of the waste oil tank. Based on the information reviewed, concerns are noted from the lack of assessment of the location of the waste oil tank and the historical operations of the automotive repair facility.

The Sears Auto Center #6799 facility, 5900 Sunrise Boulevard, was located on Parcel G. The facility is listed on SWRCB LUST, DTSC Haznet, and Sacramento County Contaminated Sites databases. According to a Phase II ESA Report, dated April 13, 2015, prepared by Terrcon Consultants, Inc. (Terracon) for the facility, three 10,000-gallon gasoline underground storage tanks (USTs), one 1,000-gallon waste oil UST, dispenser island, and product lines were removed from the facility between the 1980s and 1994. According to Terracon, the facility received a no further action status from SCEMD. Terracon reported that during the preparation of a Phase I ESA, an oil/water separator was observed to the north of the auto center building, In addition, Terracon reported that one hydraulic lift was present and eight hydraulic lifts had been removed. The shafts of the hydraulic lifts extended into a basement and not into subsurface soils; therefore, no further investigation of them was warranted. Terracon performed a Phase II ESA to evaluate potential impacts from the oil/water separator. Terracon installed one soil boring to the north of the oil/water separator to a depth of 40 feet below ground surface. Soil samples were collected at three depths and a groundwater sample was collected for laboratory analysis. The samples were submitted for analysis of volatile organic compounds and total petroleum hydrocarbons. Laboratory analysis of the soil samples indicated that petroleum hydrocarbons were not present above laboratory reporting limits. Laboratory analysis of the groundwater sample indicated that total petroleum hydrocarbon – diesel range organics (TPH-DRO) were detected at a concentration of 0.15 milligrams per liter (mg/L), which exceeded the San Francisco Bay Regional Water Quality Control Board's (SFBRWQCB) Environmental Screening Level (ESL) of 0.10 mg/L. Total petroleum hydrocarbons oil range organics (TPH-ORO) was detected at a concentration of 0.20 mg/L, which exceeded the SFBRWQCB ESL of 0.10 mg/L. Terracon concluded that additional investigation would be required to evaluate the extent of total petroleum hydrocarbon impact in groundwater. According to a Supplemental Site Investigation Letter Report, dated August 2, 2016, prepared by BBJ Group, LLC (BBJ Group), two soil borings were advanced at the facility to collect soil and ground water samples. The borings were converted to temporary monitor wells and left overnight to accumulate groundwater. Laboratory analysis of the soil indicated a concentration of TPH-gasoline range organics of 0.0514 milligrams per kilogram (mg/kg), which was below the SFBRWQCB ESL. No other chemicals were detected in the soil samples above laboratory

reporting limits. One of the temporary monitor wells did not have enough groundwater to collect a sample for analysis. Laboratory analysis of the groundwater sample indicated a concentration of TPH-DRO of 0.264 mg/kg, which exceeded the SFBRWQCB ESL of 0.1 mg/L. BBJ Group concluded that a "no further action" letter should be provided for the facility because the concentration of TPH-DRO was only slightly above the environmental screening level. WKA reviewed a Preliminary Investigation and Evaluation Report, dated May 4, 2018, prepared for the facility by The Vertex Companies, Inc. (Vertex). Vertex installed one monitoring well and advanced three soil boring at the facility. One groundwater sample was collected from the monitoring well for analysis of TPH-DRO and TPH-GRO. Four soil samples were collected from the borings. Laboratory analysis of the soil samples indicated a concentration of 13 mg/kg of TPH-DRO in one sample, which is below the SFBRWQCB ESL of 1,100 mg/kg. Laboratory analysis of the groundwater sample indicated a concentration of TPH-GRO of 27 micrograms per liter (ug/L), which was below the ESL of 50 ug/L. Vertex recommended closure for the oil/water separator. According to a SCEMD Local Oversight Program letter, dated September 14, 2018, the SCEMD requested additional investigation of the former UST location if no data was available and that the facility be evaluated for vapor intrusion and direct contact/outdoor air. According to a SCEMD letter, dated May 28, 2020, the SCEMD requested a workplan sufficient to complete the investigation at the facility. No additional assessment reports for the facility were available for review. Based on the information reviewed, on-site concerns are noted from potential petroleum hydrocarbon impacts to groundwater.

The Chevron #9-1703 facility, 7999 Greenback Lane, was located 0.02 miles north of the Site across Greenback Lane. The facility is listed on the SWRCB LUST database. WKA reviewed a Special Groundwater Monitoring Event – Fourth Quarter 2014, dated November 7, 2014, for the facility. According to the 2014 GMR, the depth to groundwater ranged from 38 to 44 feet below ground surface with groundwater flow reported to be to the east. According to a Sacramento County Environmental Management Department letter, dated January 23, 2017, the facility received a no further action status. Based on the information reviewed, this facility has not impacted the Site.

The Superior Cleaners facility, 8033 Greenback Lane, was located 0.09 miles north of the Site across Greenback Lane. The facility has also operated under the following names: Judi's Cleaners, Sunrise Cleaners, and Greenback Square Cleaners. The facility is listed on the US EPA Drycleaners, Department of Toxic Substances Control's (DTSC) EnviroStor and Haznet, Sacramento County Master List databases. According to a SCEMD Compliance Inspection Report, dated November 22, 1994, Superior Cleaners was operating and the facility had dry cleaning machines, which had been disconnected and the facility was to be closed. According to a SCEMD Dry Cleaning Facility Inspection Notes, dated August 14, 1998, Greenback Square Cleaners was operating and the inspector noted the present of 85 gallons of perchloroethylene. WKA located SCEMD permits for a drycleaner from 2003 to 2009 in the SCEMD records. The

most recent SCMED inspection report for review was dated March 25, 2009. No violations were noted for the facility in 2009. The facility is topographically downgradient of the Site and groundwater flow is reportedly to the east. Based on topography and groundwater flow, this facility has not impacted the Site.

The Unocal #7256 facility, 8000 Greenback Lane, was located on the northeastern adjoining property. The facility is listed on SWRCB LUST, DTSC Haznet, CERS, CERS Tanks, CERS Haz Waste, and Sacramento County Contaminated Sites databases. According to information provided on the SWRCB GeoTracker website, the facility status was designated as "completed – case closed" on July 10, 1997. Based on the information reviewed, this facility has not impacted the Site.

The Brake Masters facility, 8000 Greenback Lane, is located on the northeastern adjoining property. The facility is listed on the DTSC Haznet, and CERs databases. WKA reviewed the most recent inspection reports for the facility from the SCEMD. The facility was inspected on November 7, 2016. According to the reports, one violation was noted and corrected during the inspection. Based on the information reviewed, this facility has not impacted the Site.

The Former Montgomery Wards (TBA)/Auto Express facility, 6199 Sunrise Boulevard, was located 0.03 miles west of the Site across Sunrise Boulevard. The facility is listed on State Water Resources Control Board's (SWRCB) Leaking Underground Storage Tank (LUST), DTSC Haznet, California Environmental Reporting System (CERS), CERS Haz Waste, and the Sacramento County Contaminated Sites databases. According to a SCEMD letter, dated July 19, 2006, the facility received a no further action status. Based on the information reviewed, this facility has not impacted the Site.

The Shell #204-1566-0800 facility, 7899 Greenback Lane, was located 0.04 miles northwest of the Site across the intersection of Greenback Lane and Sunrise Boulevard. The facility is listed on the DTSC Haznet, SWRCB LUST, CERS, CERS Haz Waste, and Sacramento County Contaminated Sites databases. According to a SCEMD letter, dated June 9, 2015, the facility received a no further action status. Based on the information reviewed, this facility has not impacted the Site.

4.3.2 Preliminary Screen for Vapor Encroachment Conditions

WKA conducted a preliminary screening for VEC beneath the Site using the Tier 1 vapor encroachment screening evaluation[1]. The Tier I screening included performing a *Search*

[1] The Preliminary Screen for Vapor Encroachment Conditions was based on the guidelines presented in the ASTM *E 2600-15 Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*.

Distance Test to identify if there are any known or suspect contaminated properties surrounding or upgradient of the Site within specific search radii, and a *Chemicals of Concern (COC) Test* (for those known or suspect contaminated properties identified within the *Search Distance Test*) to evaluate whether or not COC are likely to be present. The Vapor Encroachment Screening Matrix is included in Appendix E.

Based on the completion of the VEC-screening matrix, a VEC cannot be ruled out due to potential impacts to groundwater on Parcel G. The SCEMD has requested additional investigation of the property including soil vapor sampling. The VEC should be evaluated after the soil vapor investigation has been completed. In addition, if petroleum impacts are identified beneath the automotive repair facilities on Parcels B and C, the VEC should be re-evaluated.

4.3.3 Environmental Lien Search

Security First Title Resource performed a search for environmental liens for the parcels comprising the Site, no environmental liens or activity or use limitations (AULs) were recorded for the parcels (SFTR 2020). Copies of the Environmental Lien Search Reports are included in Appendix C.

5.0 CONCLUSIONS AND RECOMMENDATIONS

5.1 Data Gaps

The time intervals between the Standard Historical Sources (i.e., topographic maps, aerial photographs, other historical sources) exceeded the ASTM minimum five-year period. However, the use of the Site appears unchanged within the time gaps, and therefore, research of the Site use during the time gaps is not required by the ASTM Standard (Refer to *Section 8.3.2.1 – Intervals* of the ASTM E 1527-13 standard).

WKA was not provided access to the US Bank, Red Robin, and JC Penney structures. WKA did not access the non-public portions of occupied suites in the Sunrise Mall.

Mr. Andy Liu, owner of Parcel D, declined to provide information.

Mr. Larry Smith, JC Penney owner of Parcel C, declined to provide information.

It is the opinion of WKA that the lack of access to the US Bank, Red Robin, and JC Penney structures and owner interview for Parcel D are not significant data gaps. The lack of an owner interview for Parcels C, specifically for information concerning the Firestone Auto Center is considered a significant data gap.

5.2 Conclusions

- The Site was vacant, grass-covered land from at least 1937 to at least 1966 and has been developed with the Sunrise Mall since at least 1972.
- Parcel A has been developed with one structure and associated parking areas, which has been occupied by various banks, since at least 1972. WKA was not provided access to the interior of the structure located on Parcel A.
- Parcel B has been developed with two structures, one on the south-central portion and one on the northeastern portion, and associated parking areas since at least 1972. The structure on the south-central is attached to the main mall structure and has been occupied by Weinstock's and Macy's. WKA observed the elevator room in the structure and no evidence of leaks were observed. The structure on the northeastern portion of the Site has been occupied by Goodyear since at least 2005.
- The Goodyear Tire facility currently has seven hydraulic lifts. Six of the lifts have aboveground hydraulic fluid tanks and one lift appeared to have an underground hydraulic fluid tank. WKA observed markings on the floor of the service area that would

indicate the hydraulic lifts have been replaced. Former hydraulic lifts may have had underground hydraulic fluid tanks. An oil/water separator is located adjacent to the east of the structure. Hazardous waste is stored in an enclosure adjacent to the west of the structure. WKA observed Underground Service Alert (USA) markings to the north, east, south, and west of the structure. An area of patched asphalt indicating the location of a boring was observed in each USA marked area. WKA was not provided information regarding the purpose of the borings.

- Parcel C has been developed with two structures, one on the western portion and one on the eastern portion, and associated parking areas since 1972. The western structure is attached to the main mall structure and has been occupied by JC Penney since at least 1975. WKA was not provided access to the JC Penney building. The structure on the eastern portion is currently occupied by a Firestone Auto Center.
- The Firestone Auto Center consists of a customer lobby area in the northern portion and a service area in the southern portion. WKA observed a canopy area that extends off the Firestone Auto Center to the west. Concrete islands with square concrete patches were observed under the canopy. The physical appearance of the canopy area is similar to a gasoline station. WKA observed concrete patches in the concrete islands under the canopy that may indicate the former presence of fuel dispensers, and vertical pipes along one of the canopy columns that may be vent piping for an underground storage tank (UST). One of the concrete squares had “1984” written in it. WKA reviewed records for the Firestone Auto Center on the Sacramento County Environmental Management Department NextRequest website. The earliest document for the facility was dated June 1984. It is possible that a gasoline station operated at the Firestone Auto Center before 1984. If a gasoline station operated at the facility, WKA was unable to locate any assessment reports of the underground storage tanks or product lines that would have been present.
- The service area of the Firestone Auto Center consisted of 20 service bays. Four of the bays did not have hydraulic lifts; however, ground markings were visible that would indicate hydraulic lifts had been present in those bays. Sixteen hydraulic lifts are located within the service area and four of the lifts may have underground hydraulic tanks. The remainder of the lifts appeared to have aboveground hydraulic tanks. WKA observed six 110-gallon plastic totes containing new oil in the central portion of the service area. Hazardous wastes are stored in the southwestern portion of the service area, which has a concrete floor. WKA observed a waste oil tank in the hazardous waste storage area. WKA did not observe significant staining in the area where hazardous waste was stored. An oil/water separator is located to the east of the building.
- A 550-gallon underground waste oil tank was removed from the Firestone Auto Center in 1990; however, no soil samples were collected from the tank pit.

- Parcel D was developed with two structures, one on the northern portion and a second structure on the southern portion, and associated parking areas by 1972. The structure on the northern portion was occupied by various restaurants prior to being demolished by 1993. A new structure was built by 2006 and has been occupied by a Red Robin restaurant since being constructed. WKA was not provided access to the Red Robin restaurant. The structure on the southern portion of the parcel was a multi-suite commercial building, which was demolished by 2016. One of the occupants of the former multi-suite commercial building was Sky Cleaners.
- Prior to the demolition of the multi-tenant commercial structure on Parcel D, assessment of the suite formerly occupied by Sky Cleaners was conducted. Laboratory analysis of soil and groundwater samples collected from the former Sky Cleaners suite indicated that concentrations of tetrachloroethylene detected in soils were below environmental screening levels. See Section 4.2.10 for further discussion of the previous assessment of the former Sky Cleaners.
- Parcel E has been developed with two structures, one on the west-central portion and one on the eastern portion, and associated parking areas since 1972. The structure on the western portion was occupied by various restaurants but is currently vacant. The structure on the eastern portion is the main Sunrise Mall building. The mall has had many occupants over the years including clothing stores, toy stores, and fast food restaurants. WKA was escorted by the property manager through randomly selected vacant suites in the mall, storage areas, SMUD rooms, and the security/janitorial area.
- Parcel F has been developed with the existing structure and associated parking area since 1972. The structure has been occupied by Macy's since at least 1992.
- Parcel G has been developed with three structures and associated parking areas since 1972. The structures were formerly occupied by Sears. The southern-most structure was occupied by the Sear's Auto Center. All three structures have basements beneath them.
- The southernmost structure on Parcel G was formerly occupied by a Sears Auto Service Center. The building is currently unoccupied. WKA observed an area to the east of the structure that was used for the storage of hazardous materials. WKA did not observe heavy staining in the former hazardous materials storage area and the concrete floor appeared to be in good condition. Hydraulic lifts were observed within the former service area. A basement is located beneath the structure and the hydraulic lifts extended into the basement and not the ground beneath the structure. WKA observed an oil/water separator and the location of a monitor well to the north of the structure. WKA observed four square metal plates located to the north of the western portion of the structure. WKA was unable to remove the metal plates to determine the features that are located beneath them. The facility is a Leaking Underground Storage Tank (LUST)

facility that has been undergoing assessment under the oversight of the Sacramento County Environmental Management Department. See Section 4.3.1. for a summary of the work that has been completed at the property.

- Given the age of development on the Site, it is likely that asbestos containing building materials and lead-based paints were used in the construction and/or maintenance of the Site buildings. The previous property manager for the Sunrise Mall stated that the buildings underwent extensive renovation in 1999 and asbestos-containing building materials were removed. In addition, as suites within the mall are remodeled between tenants, asbestos containing building material surveys and remediation are conducted.
- According to an environmental lien search, no environmental liens are associated with the Site.
- Given the documentation reviewed concerning the agency listings for neighboring facilities, none of the facilities reviewed is likely to have a negative impact on the Site.
- Based on the completion of the VEC-screening matrix, a VEC cannot be ruled out due to potential impacts to groundwater on Parcel G. The SCEMD has requested additional investigation of the property including soil vapor sampling. The VEC for Parcel G should be evaluated after the soil vapor investigation has been completed. In addition, if petroleum impacts are identified beneath the automotive repair facilities on Parcels B and C, the VEC should be re-evaluated for those areas.

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-13 for the Sunrise Tomorrow Property. Any exceptions to, or deletions from, this practice are described in Section 5.4 of this report. This assessment has revealed no evidence of RECs in connection with the Site except the following:

- On-site concerns were noted from the historical and current operations of an automotive repair shop on the eastern portion of Parcel C.
- On-site concerns were noted from the historical and current operations of an automotive repair shop on the northeastern portion of Parcel D.
- On-site concerns were noted from the lack of assessment conducted when a 550-gallon waste oil tank was removed from the Firestone Auto Center located on Parcel D.
- On-site concerns were noted from a potential gasoline station that operated at the Firestone Auto Center on Parcel D. WKA observed a canopy extending to the west of the structure with concrete features that appeared to be dispenser islands. Square concrete patches are located within the concrete islands that would indicate the location of fuel dispensers. WKA observed “1984” in one of the concrete patches. The earliest record for the facility that the Sacramento County Environmental Management Department (SCEMD) has is dated June 1984. There is a possibility that underground

storage tanks, fuel dispensers, and product lines were removed prior to the SCEMD's records.

- On-site concerns were noted from the potential petroleum hydrocarbon impacts to groundwater on Parcel G.

5.3 Recommendations

Based on the conclusions presented and the documentation contained herein, WKA makes the following recommendations:

- The owner of Parcel G should continue the investigation of the potential petroleum hydrocarbon impacts to groundwater under the oversight of the SCEMD.
- Prior to the demolition of the auto repair facilities located on Parcels B and C, area specific evaluations should be conducted to determine if sampling is required. Investigation should include evaluating the locations of hydraulic lifts that have had in-ground hydraulic fluid tanks, oil/water separators, and former locations of underground waste oil tanks.
- Additional investigation into the canopy area off the Firestone Auto Center building on Parcel C should be conducted to determine if it was a gasoline station. If underground storage tanks were located in the vicinity of the canopy area, assessment of the tank area should be conducted to evaluate potential impacts from petroleum hydrocarbons.
- The containers with unknown contents within SMUD Room 6047 should be identified and property disposed.
- Prior to any renovations or demolition for the Site buildings, asbestos-containing building material and lead-based paint surveys should be conducted, if necessary.
- If the owners of Parcels C and D, that declined to respond to the provided questionnaires give information in the future that would change the findings of this report, WKA should be given the opportunity to review the information and modify the report.

5.4 Exceptions and/or Deletions

No exceptions or deletions from the ASTM E 1527-13 standard were made during the performance of this ESA.

5.5 Additional Services

Non-scope considerations, such as assessment for naturally occurring asbestos (NOA), wetlands evaluation, indoor air quality, laboratory testing of the soils and groundwater beneath the Site for environmental contaminants (such as agricultural-related pesticides, termiticides, polychlorinated biphenyls [PCBs], or arsenic and lead), and assessments for asbestos containing materials and lead-based paint were not included or requested as part of this ESA. Additionally, this ESA included conducting a Tier 1 vapor encroachment screening in accordance with the ASTM *E 2600-15 Vapor Encroachment Screening on Property Involved in Real Estate Transactions.*

6.0 LIMITATIONS

The statements and conclusions in this report are based upon the scope of work described above and on observations made only on the dates of the field reconnaissance, October 8, 9, 16, and 20, 2020. Work was performed using a degree of skill consistent with that of competent environmental consulting firms performing similar work in the area. Information regarding the Site that is *publicly available* and *practically reviewable,* as described in the ASTM standard, was obtained. Additional research or receipt of information regarding the Site that was not disclosed or available to WKA during this assessment may result in revision of the conclusions. The conclusions in this report should be reevaluated if site conditions change. No recommendation is made as to the suitability of the Site for any purpose. The results of this assessment do not preclude the possibility that materials currently or in the future defined as hazardous are present on the Site, nor do the results of this work guarantee the potability of groundwater beneath the Site. This report is applicable only to the investigated Site and should not be used for any other property. No warranty is expressed or implied.

This report is viable for one year from the publication date of the report provided the following components are updated within 180 days of the date of purchase or (for transactions not involving an acquisition) the date of the intended transaction:

- Interviews with current owners/occupants and/or in order to identify changes in Site conditions or uses since the publication date of this report
- Searches for recorded environmental cleanup liens
- Visual inspection of the Site and of adjoining properties with emphasis on changes in conditions or uses since the publication date of this report
- A current review of federal, state, tribal and county databases
- The declaration by the environmental professional responsible for the assessment.

Environmental Site Assessments completed more than one year prior to the date of purchase must be reviewed and updated in order for the *Environmental Site Assessment* to be considered valid per Section 4.6 (*Continued Viability of Environmental Site Assessment*), and Sections 4.7 and 8.4 (*Prior Assessment Usage*) of the ASTM E 1527-13 Standard.

APPENDIX A
RESUMES

NANCY M. MALARET

PROJECT ENVIRONMENTAL SCIENTIST

Ms. Malaret has been employed in the environmental field since 2003. She graduated from University of California, Davis with a degree in Hydrologic Science.

Ms. Malaret worked for the Florida Department of Health for four years. She assisted with the coordination of sampling potable water wells throughout the state of Florida. Ms. Malaret used GIS mapping techniques to identify private potable wells located near commercial and industrial facilities that may have contaminated the groundwater. She coordinated the sampling of the wells and the analysis of water samples collected. She worked with the Florida Department of Environmental Protection to place filters on the private wells with contaminated water. Ms. Malaret also worked with the Health Assessment Team at the Florida Department of Health. She conducted human health risk assessments based on groundwater and soil data collected during contamination assessments of industrial facilities. Ms. Malaret used the Agency for Toxic Substances and Disease Registry's Public Health Assessment Guidelines to evaluate resident's risk of illness from exposure to contaminated groundwater and surface soils. Ms. Malaret used Risk Assistant software to determine dose estimates and compared the results with toxicological studies. Ms. Malaret's human health risk assessments focused on sites with Volatile Organic Compounds, Semi-volatile Organic Compounds, and metals contamination.

Ms. Malaret has six years of experience in due diligence. Her Phase I Environmental Site Assessment experience includes wooded, rural, and urban properties. Her investigations have involved multiple parcel sites with extensive history, large-scale residential subdivisions, office buildings, gasoline stations, dry cleaners, and heavy equipment manufacturing and repair facilities. Ms. Malaret has conducted multiple corridor assessments along roadways being prepared for expansion or improvements. She also conducted a Hazardous, Toxic, and Radioactive Waste Assessment for the United States Army Corps of Engineers on a 20-mile stretch of the St. Johns River in Jacksonville, Florida. Ms. Malaret conducted soil and groundwater sampling associated with Phase II Environmental Site Assessments. Ms. Malaret coordinated long-term groundwater sampling events for sites with residual petroleum contamination.

Ms. Malaret has worked with communities impacted by contamination, local, state, and federal government agencies, banks and developers.

Moody Property, Vacaville, CA: Ms. Malaret managed the Phase I Environmental Site Assessment of a 38.5-acre property of undeveloped land located in Vacaville to support the redevelopment of the property into a residential development.

Woodmere Property, Folsom, CA: Ms. Malaret managed the Phase I Environmental Site Assessment of a 2.5-acre property developed with an office building. Historical research of the property included evaluating former mining operations at the site.

Mercantile Property, Rancho Cordova, CA: Ms. Malaret managed the Phase I Environmental Site Assessment of a 4.1-acre property developed with a commercial building. Evaluation of regulatory facilities within the site vicinity included the former Aerojet Facility.

KURT M. BALASEK

SENIOR HYDROGEOLOGIST/DIRECTOR OF ENVIRONMENTAL SERVICES

Mr. Balasek has provided a leadership role in hydrogeologic and environmental consulting in the Western US. since 1989. His experience includes, residential and commercial land development, litigation support, permitting, regulatory compliance and technical team building. Mr. Balasek and his team have conducted a wide range of impacted soil and groundwater investigations, mine location and reclamation activities, water resource evaluations and conjunctive use studies. Mr. Balasek has supported municipal efforts to redevelop blighted neighborhoods using private and federal funding and has prepared successful grant applications for EPA Brownfield funding. Mr. Balasek has facilitated public stakeholder processes, organized public comments and used the information gathered from these efforts to prioritize neighborhood and regional site investigations and remedial activities.

Mr. Balasek specializes in unique approaches to problem solving and leverages nearly 30 years of regulatory relationships to assist clients facing enforcement actions. Mr. Balasek has saved his clients hundreds of thousands of dollars in reduced fines, monitoring requirements or realized project efficiencies.

SELECTED PROJECT EXPERIENCE

Stockton Worknet, Stockton, CA: Project was conducted for the City of Stockton Redevelopment Agency and involved delineation, removal and disposal for hydrocarbon and lead-contaminated soil discovered during a construction project. The project also involved a component of public outreach because a children's museum was located immediately adjacent to the site.

Hayden Hill Mine, Lassen, CA: Project consisted of third party review of mine closure plan for Lassen County. Provided technical assistance to Lassen County Planning Commission to facilitate permanent closure of large open pit mine.

Willow Creek, Folsom, CA: Project involved site investigation and subsequent removal of petroleum hydrocarbon-contaminated soil to facilitate private development of commercial property. Under my direction, I facilitated the investigation, excavation and coordination of closure petitions.

City of West Sacramento, West Sacramento, CA: Multiple Projects. These projects involved initial site evaluation of several hundred individual sites for the redevelopment of West Sacramento. Subsequent work involved site investigation and remediation of several sites under U.S. EPA Grants. Provided technical assistance to City staff and collaborated with them to best utilize the public funds and coordinate public outreach. Provided emergency consultation related to peroxide release at city water treatment plant and provides on-going management and monitoring of groundwater pump and treat system at the Port of Sacramento

Rominger Property, Winters, CA (on-going): This project involves detailed site investigation, hydrogeologic analysis and evaluation, and the selection of appropriate remediation technologies for a large plume of (MTBE) contamination on an Ag-industrial site. Project involvement included client and regulatory interaction.

ASTM E 1527-13 User Questionnaire
and Helpful Documents Checklist

E 1527-13 USER QUESTIONNAIRE
SUNRISE MALL PROPERTY

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"), the *user*[2] must provide the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that "*all appropriate inquiry*" is not complete.

(1.) Have you performed a search for environmental cleanup liens and AULs, as described under *User Obligations* in the attached proposal, for the *property?*

No

(2.) Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state or local law?

I don't know

(3.) Are you aware of any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

I don't know

(4.) As the *user* of the report, do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

No

(5.) Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present on the *property*?

I don't know

(6.) Are you aware of commonly known or reasonably ascertainable information about the *property* that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

(a.) Do you know the past uses of the *property*? If so, what were they?

Sunrise Mall (shopping center)

(b.) What, if any, specific chemicals are present or once were present at the *property*?

I don't know

[2] User, as defined in the ASTM Standard is "the party seeking to use Practice E 1527 to complete an environmental site assessment of the property. A user may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager. The user has specific obligations for completing a successful application of this practice as outline in Section 6 [of the ASTM Standard]."

E 1527-13 USER QUESTIONNAIRE (cont.)
SUNRISE MALL

Questions 6 continued:

(c.) What, if any, spills or other chemical releases have taken place at the *property*?

I don't know

(d.) What, if any, environmental cleanups have taken place at the *property*?

I don't know

(7.) As the *user* of this ESA, based on your knowledge and experience related to the *property* are there any obvious indicators that point to the presence or likely presence of contamination at the *property*?

I don't know

United States Department of Agriculture

NRCS

Natural Resources Conservation Service

A product of the National Cooperative Soil Survey, a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local participants

Custom Soil Resource Report for Sacramento County, California

August 12, 2020

Preface

Soil surveys contain information that affects land use planning in survey areas. They highlight soil limitations that affect various land uses and provide information about the properties of the soils in the survey areas. Soil surveys are designed for many different users, including farmers, ranchers, foresters, agronomists, urban planners, community officials, engineers, developers, builders, and home buyers. Also, conservationists, teachers, students, and specialists in recreation, waste disposal, and pollution control can use the surveys to help them understand, protect, or enhance the environment.

Various land use regulations of Federal, State, and local governments may impose special restrictions on land use or land treatment. Soil surveys identify soil properties that are used in making various land use or land treatment decisions. The information is intended to help the land users identify and reduce the effects of soil limitations on various land uses. The landowner or user is responsible for identifying and complying with existing laws and regulations.

Although soil survey information can be used for general farm, local, and wider area planning, onsite investigation is needed to supplement this information in some cases. Examples include soil quality assessments (http://www.nrcs.usda.gov/wps/portal/nrcs/main/soils/health/) and certain conservation and engineering applications. For more detailed information, contact your local USDA Service Center (https://offices.sc.egov.usda.gov/locator/app?agency=nrcs) or your NRCS State Soil Scientist (http://www.nrcs.usda.gov/wps/portal/nrcs/detail/soils/contactus/?cid=nrcs142p2_053951).

Great differences in soil properties can occur within short distances. Some soils are seasonally wet or subject to flooding. Some are too unstable to be used as a foundation for buildings or roads. Clayey or wet soils are poorly suited to use as septic tank absorption fields. A high water table makes a soil poorly suited to basements or underground installations.

The National Cooperative Soil Survey is a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local agencies. The Natural Resources Conservation Service (NRCS) has leadership for the Federal part of the National Cooperative Soil Survey.

Information about soils is updated periodically. Updated information is available through the NRCS Web Soil Survey, the site for official soil survey information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require

alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

How Soil Surveys Are Made

Soil surveys are made to provide information about the soils and miscellaneous areas in a specific area. They include a description of the soils and miscellaneous areas and their location on the landscape and tables that show soil properties and limitations affecting various uses. Soil scientists observed the steepness, length, and shape of the slopes; the general pattern of drainage; the kinds of crops and native plants; and the kinds of bedrock. They observed and described many soil profiles. A soil profile is the sequence of natural layers, or horizons, in a soil. The profile extends from the surface down into the unconsolidated material in which the soil formed or from the surface down to bedrock. The unconsolidated material is devoid of roots and other living organisms and has not been changed by other biological activity.

Currently, soils are mapped according to the boundaries of major land resource areas (MLRAs). MLRAs are geographically associated land resource units that share common characteristics related to physiography, geology, climate, water resources, soils, biological resources, and land uses (USDA, 2006). Soil survey areas typically consist of parts of one or more MLRA.

The soils and miscellaneous areas in a survey area occur in an orderly pattern that is related to the geology, landforms, relief, climate, and natural vegetation of the area. Each kind of soil and miscellaneous area is associated with a particular kind of landform or with a segment of the landform. By observing the soils and miscellaneous areas in the survey area and relating their position to specific segments of the landform, a soil scientist develops a concept, or model, of how they were formed. Thus, during mapping, this model enables the soil scientist to predict with a considerable degree of accuracy the kind of soil or miscellaneous area at a specific location on the landscape.

Commonly, individual soils on the landscape merge into one another as their characteristics gradually change. To construct an accurate soil map, however, soil scientists must determine the boundaries between the soils. They can observe only a limited number of soil profiles. Nevertheless, these observations, supplemented by an understanding of the soil-vegetation-landscape relationship, are sufficient to verify predictions of the kinds of soil in an area and to determine the boundaries.

Soil scientists recorded the characteristics of the soil profiles that they studied. They noted soil color, texture, size and shape of soil aggregates, kind and amount of rock fragments, distribution of plant roots, reaction, and other features that enable them to identify soils. After describing the soils in the survey area and determining their properties, the soil scientists assigned the soils to taxonomic classes (units). Taxonomic classes are concepts. Each taxonomic class has a set of soil characteristics with precisely defined limits. The classes are used as a basis for comparison to classify soils systematically. Soil taxonomy, the system of taxonomic classification used in the United States, is based mainly on the kind and character of soil properties and the arrangement of horizons within the profile. After the soil

scientists classified and named the soils in the survey area, they compared the individual soils with similar soils in the same taxonomic class in other areas so that they could confirm data and assemble additional data based on experience and research.

The objective of soil mapping is not to delineate pure map unit components; the objective is to separate the landscape into landforms or landform segments that have similar use and management requirements. Each map unit is defined by a unique combination of soil components and/or miscellaneous areas in predictable proportions. Some components may be highly contrasting to the other components of the map unit. The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The delineation of such landforms and landform segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, onsite investigation is needed to define and locate the soils and miscellaneous areas.

Soil scientists make many field observations in the process of producing a soil map. The frequency of observation is dependent upon several factors, including scale of mapping, intensity of mapping, design of map units, complexity of the landscape, and experience of the soil scientist. Observations are made to test and refine the soil-landscape model and predictions and to verify the classification of the soils at specific locations. Once the soil-landscape model is refined, a significantly smaller number of measurements of individual soil properties are made and recorded. These measurements may include field measurements, such as those for color, depth to bedrock, and texture, and laboratory measurements, such as those for content of sand, silt, clay, salt, and other components. Properties of each soil typically vary from one point to another across the landscape.

Observations for map unit components are aggregated to develop ranges of characteristics for the components. The aggregated values are presented. Direct measurements do not exist for every property presented for every map unit component. Values for some properties are estimated from combinations of other properties.

While a soil survey is in progress, samples of some of the soils in the area generally are collected for laboratory analyses and for engineering tests. Soil scientists interpret the data from these analyses and tests as well as the field-observed characteristics and the soil properties to determine the expected behavior of the soils under different uses. Interpretations for all of the soils are field tested through observation of the soils in different uses and under different levels of management. Some interpretations are modified to fit local conditions, and some new interpretations are developed to meet local needs. Data are assembled from other sources, such as research information, production records, and field experience of specialists. For example, data on crop yields under defined levels of management are assembled from farm records and from field or plot experiments on the same kinds of soil.

Predictions about soil behavior are based not only on soil properties but also on such variables as climate and biological activity. Soil conditions are predictable over long periods of time, but they are not predictable from year to year. For example, soil scientists can predict with a fairly high degree of accuracy that a given soil will have a high water table within certain depths in most years, but they cannot predict that a high water table will always be at a specific level in the soil on a specific date.

After soil scientists located and identified the significant natural bodies of soil in the survey area, they drew the boundaries of these bodies on aerial photographs and

identified each as a specific map unit. Aerial photographs show trees, buildings, fields, roads, and rivers, all of which help in locating boundaries accurately.

Soil Map

The soil map section includes the soil map for the defined area of interest, a list of soil map units on the map and extent of each map unit, and cartographic symbols displayed on the map. Also presented are various metadata about data used to produce the map, and a description of each soil map unit.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:24,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Sacramento County, California
Survey Area Data: Version 19, May 29, 2020

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: May 11, 2019—May 12, 2019

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Legend

Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI
227	Urban land	93.9	99.9%
229	Urban land-Xerarents-Fiddyment complex, 0 to 8 percent slopes	0.1	0.1%
Totals for Area of Interest		**94.0**	**100.0%**

Map Unit Descriptions

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.

Most minor soils have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Other minor components, however, have properties and behavioral characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a given area, the contrasting minor components are identified in the map unit descriptions along with some characteristics of each. A few areas of minor components may not have been observed, and consequently they are not mentioned in the descriptions, especially where the pattern was so complex that it was impractical to make enough observations to identify all the soils and miscellaneous areas on the landscape.

The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The objective of mapping is not to delineate pure taxonomic classes but rather to separate the landscape into landforms or landform segments that have similar use and management requirements. The delineation of such segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, however,

onsite investigation is needed to define and locate the soils and miscellaneous areas.

An identifying symbol precedes the map unit name in the map unit descriptions. Each description includes general facts about the unit and gives important soil properties and qualities.

Soils that have profiles that are almost alike make up a *soil series*. Except for differences in texture of the surface layer, all the soils of a series have major horizons that are similar in composition, thickness, and arrangement.

Soils of one series can differ in texture of the surface layer, slope, stoniness, salinity, degree of erosion, and other characteristics that affect their use. On the basis of such differences, a soil series is divided into *soil phases*. Most of the areas shown on the detailed soil maps are phases of soil series. The name of a soil phase commonly indicates a feature that affects use or management. For example, Alpha silt loam, 0 to 2 percent slopes, is a phase of the Alpha series.

Some map units are made up of two or more major soils or miscellaneous areas. These map units are complexes, associations, or undifferentiated groups.

A *complex* consists of two or more soils or miscellaneous areas in such an intricate pattern or in such small areas that they cannot be shown separately on the maps. The pattern and proportion of the soils or miscellaneous areas are somewhat similar in all areas. Alpha-Beta complex, 0 to 6 percent slopes, is an example.

An *association* is made up of two or more geographically associated soils or miscellaneous areas that are shown as one unit on the maps. Because of present or anticipated uses of the map units in the survey area, it was not considered practical or necessary to map the soils or miscellaneous areas separately. The pattern and relative proportion of the soils or miscellaneous areas are somewhat similar. Alpha-Beta association, 0 to 2 percent slopes, is an example.

An *undifferentiated group* is made up of two or more soils or miscellaneous areas that could be mapped individually but are mapped as one unit because similar interpretations can be made for use and management. The pattern and proportion of the soils or miscellaneous areas in a mapped area are not uniform. An area can be made up of only one of the major soils or miscellaneous areas, or it can be made up of all of them. Alpha and Beta soils, 0 to 2 percent slopes, is an example.

Some surveys include *miscellaneous areas*. Such areas have little or no soil material and support little or no vegetation. Rock outcrop is an example.

Sacramento County, California

227—Urban land

Map Unit Composition

Urban land: 100 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Urban Land

Typical profile

H1 - 0 to 6 inches: variable

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 8
Hydric soil rating: No

229—Urban land-Xerarents-Fiddyment complex, 0 to 8 percent slopes

Map Unit Setting

National map unit symbol: hhqc
Elevation: 0 to 2,500 feet
Mean annual precipitation: 19 inches
Mean annual air temperature: 61 degrees F
Frost-free period: 230 to 300 days
Farmland classification: Not prime farmland

Map Unit Composition

Urban land: 40 percent
Xerarents and similar soils: 30 percent
Fiddyment and similar soils: 15 percent
Minor components: 15 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Urban Land

Typical profile

H1 - 0 to 6 inches: variable

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 8
Hydric soil rating: No

Description of Xerarents

Setting

Landform: Hills
Landform position (two-dimensional): Backslope
Landform position (three-dimensional): Side slope
Down-slope shape: Linear
Across-slope shape: Linear

Parent material: Alluvium derived from granite

Typical profile

H1 - 0 to 60 inches: variable

Properties and qualities

Slope: 0 to 8 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Well drained
Depth to water table: More than 80 inches
Frequency of flooding: None
Frequency of ponding: None
Available water capacity: Very low (about 0.0 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 7e
Hydric soil rating: No

Description of Fiddyment

Setting

Landform: Hills
Landform position (two-dimensional): Backslope
Landform position (three-dimensional): Side slope
Down-slope shape: Linear
Across-slope shape: Linear
Parent material: Alluvium derived from granite

Typical profile

H1 - 0 to 8 inches: fine sandy loam
H2 - 8 to 15 inches: loam
H3 - 15 to 28 inches: sandy clay loam, clay loam
H3 - 15 to 28 inches: indurated
H4 - 28 to 40 inches: weathered bedrock
H5 - 40 to 50 inches:

Properties and qualities

Slope: 1 to 8 percent
Depth to restrictive feature: 28 to 40 inches to duripan; 40 to 50 inches to paralithic bedrock
Drainage class: Well drained
Runoff class: Very high
Capacity of the most limiting layer to transmit water (Ksat): Very low to moderately low (0.00 to 0.06 in/hr)
Depth to water table: More than 80 inches
Frequency of flooding: None
Frequency of ponding: None
Available water capacity: Low (about 3.4 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 4e
Hydrologic Soil Group: D
Hydric soil rating: No

Minor Components

Kaseberg

Percent of map unit: 7 percent

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Wallace - Kuhl & Associates were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 7CE7-462B-A021

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

MAP PANELS
- Digital Data Available
- No Digital Data Available
- Unmapped

N

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 8/12/2020 at 11:59 AM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

Celebrating 33 years in business.

The Environmental Lien Search Report (ELS) provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering control and institutional controls.
Our in house professional abstractors / title examiners, following established procedure, use client supplied property data, such as property address, map, parcel number etc. to search for:

- parcel information and / or legal description
- search for ownership information
- research official recorded land title documents
- provide a copy of the deed
- search for environmental encumbering instrument (s) associated with the deed
- provide a copy of any environmental encumbrance (s) based upon a review of key words in the Instrument (s) (title, parties involved, and description).

Below is the property data information and Environmental Lien Search report of the subject property for a period ending July 30, 2020.

A copy of the current vesting deed is attached hereto and made a part hereof.

CLIENT PROJECT NO.: 12864.01 REPORT DATE: August 7, 2020

SUBJECT PROPERTY: 6000 Sunrise Blvd, Citrus Heights, CA 95610

COUNTY / JURISDICTION: Sacramento, California

PROPERTY IDENTIFIER: 243-0192-012-0000

CURRENT OWNER INFORMATION (Vesting)

The Environmental Lien Search Report (ELS) provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering control and institutional controls.
Our in house professional abstractors / title examiners, following established procedure, use client supplied property data, such as property address, map, parcel number etc. to search for:

- parcel information and / or legal description
- search for ownership information
- research official recorded land title documents
- provide a copy of the deed
- search for environmental encumbering instrument (s) associated with the deed
- provide a copy of any environmental encumbrance (s) based upon a review of key words in the Instrument (s) (title, parties involved, and description).

Below is the property data information and Environmental Lien Search report of the subject property for a period ending July 30, 2020.

A copy of the current vesting deed is attached hereto and made a part hereof.

ASSIGNMENT, ASSUMPTION AND TERMINATION OF GROUND LEASE

THIS ASSIGNMENT, ASSUMPTION AND TERMINATION OF GROUND LEASE (the "Assignment"), made as of March 2, 2012, between SUSAN SANDELMAN AS TRUSTEE OF THE MUFFREY TRUST, as to an undivided one-half interest in Lessor's interest in the Ground Lease, as same are hereinafter described, and SUSAN SANDELMAN AS TRUSTEE OF THE LAURIE INDUSTRIES TRUST, as to an undivided one-half interest in Lessor's interest in the Ground Lease, as same are hereinafter described, (" ("Ground Lessor"), and HILLSBOROUGH ASSOCIATES, the lessee under the Ground Lease ("Ground Lessee"), (the Ground Lessor and Ground Lessee are collectively referred to as the "Assignor"), all having an address of c/o Kin Properties, Inc., 185 NW Spanish River Boulevard, Suite 100, Boca Raton, FL 33431 ("Assignor") and J.C. PENNEY PROPERTIES, INC., a Delaware corporation having an address of 6501 Legacy Drive (MS 1106), Plano, Texas 75024-3698, Attn.: Associate General Counsel - Real Estate ("Assignee").

Term of lease is less than 35 years

RECITALS:

WHEREAS, on March 1, 1972, Peerage Equities Corporation, Ground Lessor's predecessor in interest, as lessor, and Oregano Properties, Corp., Ground Lessee's prececessor in

NCS-516160-21

interest, as lessee, entered into a Lease, as amended, assigned and/or supplemented, the "Ground Lease") for that certain real property located in the City of Citrus Heights, County of Sacramento, California, such real property being more particularly described on Exhibit A attached hereto and made a part hereof (the "Land"). A Memorandum of the Ground Lease was recorded on March 9, 1972, in Book 720308, Page 236, in the Official Records of Sacramento County, California.

WHEREAS, Assignor desires to transfer and assign to Assignee, all of Assignor's right, title and interest in the Ground Lease to Assignee, and Assignee desires to accept and assume such rights, all in accordance with the terms of this Assignment.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, and intended to be legally bound:

1. Assignor hereby transfers and assigns to Assignee all of Assignor's right, title, and interest (including the obligations thereunder) in the Ground Lease. Without limiting the generality of the foregoing, Assignor expressly transfers and assigns all of Assignor's right, title and interest under the documents listed and described on Schedule A to the Ground Lease (the "Agreements").

2. Assignee covenants to hold harmless, defend and indemnify Assignor, its partners, and their respective members, managers, directors, officers, shareholders, partners, employees, agents, successors and assigns (collectively, the "Assignor Parties") from and against any and all claims, demands, causes of actions, losses, damages, costs, expenses and liabilities, including reasonable attorneys' fees which an Assignor Party may at any time sustain or incur to any third party arising out of, or related to, the failure of Assignee to perform any of its obligations under the Ground Lease or the Agreements from and after the date hereof.

3. Assignor covenants to hold harmless, defend and indemnify Assignee, its members, managers, directors, officers, shareholders, partners, employees, agents, successors and assigns (collectively, the "Assignee Parties") from and against any and all claims, demands, causes of actions, losses, damages, costs, expenses and liabilities, including reasonable attorneys' fees which an Assignee Party may at any time sustain or incur to any third party arising out of, or related to, the failure of Assignor to perform any of its obligations under the Ground Lease or the Agreements prior to the date hereof.

4. Assignor hereby covenants, warrants and represents that they are currently the Ground Lessor and the Ground Lessee under the Ground Lease and that they have not assigned, conveyed or pledged any interest in all or part of the Ground Lease or the property demised thereunder to any person or entity under any agreement in effect as of the date hereof, and has not encumbered (whether by act or omission) the Ground Lease or the property demised thereunder with any charges, restrictions or exceptions.

5. This Assignment and all other instruments referred to herein shall be governed by, and shall be construed in accordance with, the laws of the State of California.

6. This Assignment and the terms and provisions hereof shall inure to the benefit of, and shall be binding upon, the respective successors and assigns of Assignor and Assignee.

7. This Assignment may be executed in multiple counterparts, and each counterpart shall be deemed to be one and the same agreement. Facsimile and electronic (.pdf) signatures shall be binding on the party so signing.

8. By Assignee's acceptance of this Assignment the interests of the Ground Lessor and the Ground Lessee under the Ground Lease will merge and the Ground Lease shall terminate.

[SIGNATURES APPEAR ON THE FOLLOWING PAGES]

IN WITNESS WHEREOF, Assignor and Assignee have caused this Assignment to be executed on its behalf by its duly authorized representative as of the date first above written.

Celebrating 33 years in business.

The Environmental Lien Search Report (ELS) provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering control and institutional controls.
Our in house professional abstractors / title examiners, following established procedure, use client supplied property data, such as property address, map, parcel number etc. to search for:

- parcel information and / or legal description
- search for ownership information
- research official recorded land title documents
- provide a copy of the deed
- search for environmental encumbering instrument (s) associated with the deed
- provide a copy of any environmental encumbrance (s) based upon a review of key words in the Instrument (s) (title, parties involved, and description).

Below is the property data information and Environmental Lien Search report of the subject property for a period ending July 30, 2020.

A copy of the current vesting deed is attached hereto and made a part hereof.

CLIENT PROJECT NO.: 12864.01 REPORT DATE: August 7, 2020

SUBJECT PROPERTY: Sunrise Blvd, Citrus Heights, CA 95610

COUNTY / JURISDICTION: Sacramento, California

PROPERTY IDENTIFIER: 243-0192-013-0000

CURRENT OWNER INFORMATION (Vesting)

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/23/2020 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
SEARS SERVICE CENTER EPA ID:: CAD982349011	***5901 SUNRISE MALL***	***SW 0 - 1/8 (0.018 mi.)***	***D88***	***553***

CVS PHARMACY #9814 EPA ID:: CAR000231605	8101 GREENBACK LN	ENE 1/8 - 1/4 (0.209 mi.)	AH278	1380

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/23/2020 has revealed that there are 7 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 03/23/2020 has revealed that there are 2 RCRA-VSQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/27/2020 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CERS HAZ WASTE list, as provided by EDR, and dated 04/20/2020 has revealed that there are 32 CERS HAZ WASTE sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 8 SWEEPS UST sites within approximately 0.25 miles of the target property.

EPA Id: CAL000178975				

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2019 has revealed that there are 157 HAZNET sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 10 EDR Hist Auto sites within approximately 0.25 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and

operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 6 EDR Hist Cleaner sites within approximately 0.25 miles of the target property.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the State Water Resources Control Board in California.

A review of the RGA LUST list, as provided by EDR, has revealed that there are 18 RGA LUST sites within approximately 0.5 miles of the target property.

CERS HAZ WASTE:
Name: JC PENNEY #1206
Address: 6100 SUNRISE BLVD
City,State,Zip: CITRUS HEIGHTS, CA 95610
Site ID: 125723
CERS ID: 10228462
CERS Description: Hazardous Waste Generator

CERS:
Name: JC PENNEY #1206
Address: 6100 SUNRISE BLVD
City,State,Zip: CITRUS HEIGHTS, CA 95610
Site ID: 125723
CERS ID: 10228462
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 125723
Site Name: JC PENNEY #1206
Violation Date: 07-18-2014
Citation: 40 CFR 1 265.35 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.35
Violation Description: Failure to maintain aisle space to allow the unobstructed movement of personnel, fire protection, spill control equipment, and decontamination equipment to any area of facility operation in an emergency, unless it can be demonstrated to the Department that aisle space is not needed for any of these purposes.
Violation Notes: Returned to compliance on 08/07/2014. OBSERVATION: The hazardous waste storage area located on the second floor did not have adequate aisle space allowing for unobstructed movement. CORRECTIVE ACTION: Submit photos to this department demonstrating that adequate aisle space has been provided.
Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS

Site ID: 125723
Site Name: JC PENNEY #1206
Violation Date: 07-18-2014
Citation: 40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description: Failure to ensure employees are familiar with the handling and compliance of hazardous waste regulations and emergency response.
Violation Notes: Returned to compliance on 08/04/2014. OBSERVATION: Employees are not thoroughly familiar with proper waste handling and emergency procedures as demonstrated by the number and type of hazardous waste violations observed at the time of inspection. CORRECTIVE ACTION: Submit documentation to this department demonstrating that employees responsible for handling and management of hazardous waste have been properly trained.

Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 08/07/2014. OBSERVATION: Internal labeling on the hazardous waste drums is conflicting. For example, the blue poly drum with label "non-hazardous materials" was also labeled with a hazardous waste label describing the contents as "non-RCRA hazardous wase liquid". In addition, labels on the containers in the salon are not descriptive of their contents. The segregation chart above two of the containers describes five seperate waste streams. Only three containers are available in the salon. If the items in these containers are determined to be hazardous waste, they must be labled with a properly completed hazardous waste label. CORRECTIVE ACTION: Submit photos to this department demonstrating that the containers listed above have been properly labeled and submit statement regarding how the waste generated in the salon will be managed.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
