Address:	6101 SUNRISE BLVD
City,State,Zip:	CITRUS HEIGHTS, CA 95610
Site ID:	426739

BATH & BODY WORKS #1860 (Continued) **S121782590**

CERS ID: 10745272
CERS Description: Hazardous Waste Generator

Violations:

Site ID: 426739
Site Name: BATH & BODY WORKS #1860
Violation Date: 09-11-2018
Citation: 40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description: Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes: Returned to compliance on 09/24/2018. OBSERVATION: Employees are not thoroughly familiar with proper waste handling and emergency procedures as demonstrated by the number and type of hazardous waste violations observed at the time of inspection. CORRECTIVE ACTION: Submit documentation to this department demonstrating that employees have been properly trained.
Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS

Site ID: 426739
Site Name: BATH & BODY WORKS #1860
Violation Date: 09-11-2018
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 09/24/2018. OBSERVATION: 1. Hazardous waste items from customer returns or damaged items are placed in plastic bags and placed in two bins under the cash register in the store. These items are not sorted and the bins are not labeled with a hazardous waste label. The items are moved to hazardous waste storage area in the back of the store when the bins in front are full, approximately weekly. 2. Observed 1 x 55 gal full drum of state regulated / toxic wastes in the hazardous waste area in the back of the store that was stacked on top of another empty 55 gal drum. 3. Observed candles in broken glass containers placed in paper bags and placed on top of the hazardous waste bins. Candles have been determined by Bath & Body Works to be a state regulated /toxic hazardous waste. 4. No aisle space has been provided for the electrical panel. CORRECTIVE ACTION: 1. Submit a statement / copy of procedure / other documentation that the items accumulated under the cash register are [Truncated]

- Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
- Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
- Violation Notes: Returned to compliance on 07/08/2014. OBSERVATION: One 55 gallon drum of antifreeze waste, one ~30 gallon drum of brake fluid waste, one 55 gallon drum of brake grinding waste, and one 55 gallon drum of oily water waste in the hazardous waste storage room did not have accumulation start dates on the labels. A small pile of spent oily absorbent pads were observed on top of an oil filter drum in the hazardous waste storage room without a label. One 5 gallon bucket of brake grindings in the shop area was observed without a hazardous

BRAKE MASTERS #220 (Continued) **S117338542**

waste label. CORRECTIVE ACTION: Submit photos to this department demonstrating that the containers listed above have been properly labeled.

Violation Description: Failure of the LQG and/or TP generator, on all new and existing hazardous waste tank systems and ancillary equipment, to meet the following secondary containment requirements: 1) Designed, installed, and operated to prevent any migration of wastes or accumulated liquid out of the system to the soil, ground water, or surface water at any time during the use of the tank system; and 2) Capable of detecting and collecting releases and accumulated liquids until the collected material is removed. 3) Constructed of or lined with materials that

BRAKE MASTERS #220 (Continued) **S117338542**

are compatible with the waste(s) to be placed in the tank system and shall have sufficient strength and thickness to prevent failure due to pressure gradients (including static head and external hydrological forces), physical contact with the waste to which they are exposed, climatic conditions, the stress of installation, and the stress of daily operation (including stresses from nearby vehicular traffic); 4) Placed on a foundation or base capable of providing support to the secondary containment system and resistance to pressure gradients above and below the system and capable of preventing failure due to settlement, compression, or uplift; 5) Provided with a leak detection system that is designed and operated so that it will detect the failure of either the primary and secondary containment structure or any release of hazardous waste or accumulated liquid in the secondary containment system within 24 hours, or at the earliest practicable time if the existing detection technology or site conditions will not allow detection of a release within 24 hours; 6) Sloped or otherwise designed or operated to drain and remove liquids resulting from leaks, spills, or precipitation. Spilled or leaked waste and accumulated precipitation shall be removed from the secondary containment system within 24 hours, or in as timely a manner as is possible to prevent harm to human health or the environment, if removal of the released waste or accumulated precipitation cannot be accomplished within 24

Violation Source: CERS

Site ID: 13343
Site Name: Brake Masters #220
Violation Date: 05-23-2014
Citation: HSC 6.95 25504(c) - California Health and Safety Code, Chapter 6.95, Section(s) 25504(c)
Violation Description: Failure to include provisions in the business plan to ensure that appropriate personnel receive initial and annual training.
Violation Notes: Returned to compliance on 02/08/2016. OBSERVATION: A hazardous materials plan has not been established and implemented. As a result employees have not been trained on safe handling of hazardous materials and the emergency response plan. CORRECTIVE ACTION: Submit documentation to this department demonstrating that employees have received training on safe handling of hazardous materials and the emergency response plan.

Site Name: Brake Masters #220
Violation Date: 05-23-2014
Citation: HSC 6.95 Multiple - California Health and Safety Code, Chapter 6.95, Section(s) Multiple
Violation Description: Business Plan Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 08/22/2014. OBSERVATION: The facility does not have a current permit for hazardous materials storage/handling. CORRECTIVE ACTION: Immediately pay all permit fees to this department to obtain a new or renewed hazardous materials storage permit and maintain that permit as active as long as the facility is in operation and continues to store/handle hazardous materials.

CERS HAZ WASTE:

Name:	MARSHALLS 0485
Address:	7975 GREENBACK LN STE A
City,State,Zip:	CITRUS HEIGHTS, CA 95610
Site ID:	46812
CERS ID:	10489198
CERS Description:	Hazardous Waste Generator

Violations:

Site ID:	46812
Site Name:	Marshalls 0485
Violation Date:	12-22-2014
Citation:	40 CFR 1 265.177 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.177
Violation Description:	Failure to ensure incompatible waste and/or materials are not placed or stored in the same container or nearby or into an unwashed container, which previously contained incompatible waste and/or materials, so that it does not potentially result in the following: 1) Generate extreme heat or pressure, fire or explosion, or violent reaction; 2) Produce uncontrolled toxic mists, fumes, dusts, or gases in sufficient quantities to threaten human health or the environment; 3) Produce uncontrolled flammable fumes or gases in sufficient quantities to pose a risk of fire or explosions; 4) Damage the structural integrity of the device or facility containing the waste; or 5) Through other like means threaten human health or the environment.
Violation Notes:	OBSERVATION: There is currently no hazardous waste container or label for items that may be characterized as oxidizers. Examples of these items could include hair color, cleaning products containing bleach or teeth whitener. Oxidizers may not be co-mingled with Flammables. CORRECTIVE ACTION: Either submit a statement to this department verifying the inventory in the store will never include items that could be considered oxidizers or obtain a container and a label from your hazardous waste hauler and train employees on how to identify products that may be oxidizers.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HW
Violation Source:	CERS

Site ID:	46812
Site Name:	Marshalls 0485
Violation Date:	12-22-2014
Citation:	22 CCR 12 66262.23(a)(4) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.23(a)(4)
Violation Description:	Failure to send hazardous waste manifest copies to DTSC.

MARSHALLS 0485 (Continued) **S118236969**

Violation Notes:	OBSERVATION: It is unknown if the generator sends a legible copy of each generator Uniform Hazardous Waste Manifest to the California Department of Toxic Substances Control (DTSC) within 30 days. CORRECTIVE ACTION: Send a copy of all generator copies of the hazardous waste manifests to DTSC and submit a statement to this department demonstrating completion.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HW
Violation Source:	CERS
Site ID:	46812
Site Name:	Marshalls 0485
Violation Date:	12-22-2014
Citation:	40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description:	Failure to ensure employees are familiar with the handling and compliance of hazardous waste regulations and emergency response.
Violation Notes:	OBSERVATION: Employees are not thoroughly familiar with proper waste handling and emergency procedures as demonstrated by the type of hazardous waste violations observed at the time of inspection. CORRECTIVE ACTION: Submit documentation to this department demonstrating that employees have received additional training on managing hazardous waste and the proper safety equipment to wear when cleaning spills.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HW
Violation Source:	CERS
Site ID:	46812
Site Name:	Marshalls 0485
Violation Date:	09-26-2018
Citation:	40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description:	Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes:	OBSERVATION: Observed several leaking and damaged beauty products on the clearance shelf during inspection. Employees are following the procedure dated 6/2018 titled "Beauty Tank Product Categories Job Aid," however, damaged items are not being removed from the sales floor daily. CORRECTIVE ACTION: Damaged and leaking products removed from shelf at time of inspection. Submit documentation to this department demonstrating that procedure has been updated to instruct employees to remove damaged and leaking products that have been determined to be hazardous waste more frequently, daily at a minimum, in order to prevent spills, releases, and potential co-mingling of incompatible materials.

MARSHALLS 0485 (Continued) **S118236969**

Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.
Violation Notes: OBSERVATION: Uniform Hazardous Waste Manifests for shipments dated June 20, 2013, December 20, 2013 and June 6, 2014 were not available at the time of inspection. CORRECTIVE ACTION: Locate a copy of all Uniform Hazardous Waste Manifests for the listed dates and submit copies to this department. Manifests must be kept on site or be available electronically for a minimum of three years.
Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS

Site ID: 46812
Site Name: Marshalls 0485
Violation Date: 12-22-2014
Citation: 40 CFR 1 265.174 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.174
Violation Description: Failure to inspect hazardous waste storage areas at least weekly.
Violation Notes: OBSERVATION: There was an unknown liquid coating the bottom of the hazardous waste container marked Flammable. The back room coordinator stated she does weekly inspections but could not recall when the previous weekly inspection was completed. CORRECTIVE ACTION: Submit a copy of the inspection log to this department demonstrating that the hazardous waste storage area is being inspected weekly.
Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS

Site ID: 46812
Site Name: Marshalls 0485
Violation Date: 09-26-2018
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: OBSERVATION: The following final signed copies of Uniform Hazardous Waste Manifests were not available at the time of inspection: 8/13/18 - 011410588 FLE and 011410589 FLE 1/30/18 - 010867214 FLE and 010867215 FLE 5/13/16 - 008550511 FLE CORRECTIVE ACTION: Locate a copy of all Uniform Hazardous Waste Manifests listed above and submit copies to this department.

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS HAZ WASTE:

Name:	ULTA BEAUTY #124
Address:	5927 SUNRISE BLVD
City,State,Zip:	CITRUS HEIGHTS, CA 95610
Site ID:	362099
CERS ID:	10650955
CERS Description:	Hazardous Waste Generator

Violations:

Site ID:	362099
Site Name:	ULTA BEAUTY #124
Violation Date:	11-29-2017
Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description:	Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes:	Returned to compliance on 11/30/2017. OBSERVATION: 1. The following final signed Uniform Hazardous Waste Manifests were not available at the time of inspection: Manifest # 008676378 FLE - pick up date 7/10/17 Manifest # 008666148 FLE - pick up date 2/28/17 2. There appear to be regular monthly pickups of hazardous waste, however, no disposal records observed for August 2017 or October 2017. CORRECTIVE ACTION: Locate a copy of the two Uniform Hazardous Waste Manifests for the two manifests listed above and submit copies to this department. Verify that there were no disposals of hazardous waste in August or October 2017, and submit a copy of any missing manifests to this department.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HW
Violation Source:	CERS

Site ID:	362099
Site Name:	ULTA BEAUTY #124
Violation Date:	11-29-2017
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 11/29/2017. OBSERVATION: The bin of oxidizer waste was observed without the accumulation start date on the hazardous waste label. CORRECTIVE ACTION: Corrected during inspection. No further action needed.

ULTA BEAUTY #124 (Continued) **S117311582**

Violation Date:	11-29-2017
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Returned to compliance on 12/13/2017. OBSERVATION: Ulta's previous hazardous waste management procedure was to place all customer returns and unsalable/damaged/leaky/broken items into grey totes to be characterized weekly. Items that were determined to be a hazardous waste were then placed into appropriate hazardous waste bin. Company procedures were recently updated to begin placing damaged/broken/leaky items into hazardous waste bins immediately rather than weekly. However, items that are clearly unsellable (i.e. opened items returned by customer) must also be managed and characterized daily at a minimum and not weekly. In addition, at this location, salable products are segregated nightly, and all items that are in the grey totes awaiting weekly characterization are a hazardous waste. CORRECTIVE ACTION: Update procedures to include characterizing unsalable items that are clearly a hazardous waste daily at a minimum, rather than weekly. Hazardous wastes must be accumulated in a properly labeled and [Truncated]

Violation Program:	HW
Violation Source:	CERS

Site ID:	362099
Site Name:	ULTA BEAUTY #124
Violation Date:	11-29-2017
Citation:	Un-Specified
Violation Description:	Hazardous Waste Generator Program - Administration/Documentation - General Local Ordinance
Violation Notes:	Returned to compliance on 12/01/2017. OBSERVATION: The generator has not obtained a hazardous waste generator permit from this department. Fees for current year hazardous waste generator permit are overdue. CORRECTIVE ACTION: Immediately pay all permit fees to obtain a new or renewed hazardous waste generator permit and maintain that permit as active as long as the facility is in operation and continues to generate hazardous waste. Copy of invoice dated 10/19/2017 provided at inspection.

Contact telephone:	301-419-0000
Contact email:	Not reported
EPA Region:	09
Classification:	Small Small Quantity Generator
Description:	Handler: generates more than 100 and less than 1000 kg of hazardous waste during any calendar month and accumulates less than 6000 kg of hazardous waste at any time; or generates 100 kg or less of hazardous

KITS CAMERS 1 HOUR NO 147 (Continued) **1001217301**

waste during any calendar month, and accumulates more than 1000 kg of hazardous waste at any time

Owner/Operator Summary:
- Owner/operator name: RITZ CAMERA CENTERS INC
- Owner/operator address: 6711 RITZ WY
  BELTSVILLE, MD 20705
- Owner/operator country: Not reported
- Owner/operator telephone: 301-419-0000
- Owner/operator email: Not reported
- Owner/operator fax: Not reported
- Owner/operator extension: Not reported
- Legal status: Private
- Owner/Operator Type: Owner
- Owner/Op start date: Not reported
- Owner/Op end date: Not reported

Handler Activities Summary:
- U.S. importer of hazardous waste: No
- Mixed waste (haz. and radioactive): No
- Recycler of hazardous waste: No
- Transporter of hazardous waste: No
- Treater, storer or disposer of HW: No
- Underground injection activity: No
- On-site burner exemption: No
- Furnace exemption: No
- Used oil fuel burner: No
- Used oil processor: No
- User oil refiner: No
- Used oil fuel marketer to burner: No
- Used oil Specification marketer: No
- Used oil transfer facility: No
- Used oil transporter: No

Historical Generators:
- Date form received by agency: 1997-09-23 00:00:00.0
- Site name: KITS CAMERS 1 HOUR NO 147
- Classification: Small Quantity Generator

Hazardous Waste Summary:

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D011
. Waste name: SILVER

Violation Status: No violations found

Violation Date: 01-11-2018
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 01/30/2018. OBSERVATION: The Hazardous Materials Inventory Chemical Description page for concrete sweepings, waste aerosols, and broken fluorescent tubes is kept stored in 5 gallon buckets, but the largest container listed on the inventory forms is 55 gallons for each. CORRECTIVE ACTION: Complete and submit the Hazardous Materials Inventory Chemical Description page showing the corrected 'largest container size' for all materials listed above electronically in the California Environmental Reporting System.
Violation Division: Sacramento County Env Management Department
Violation Program: HMRRP

Citation:	22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)
Violation Description:	Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.
Violation Notes:	Returned to compliance on 06/09/2015. OBSERVATION: The key shavings located in the key machine at the front of the store are currently being removed by the vendor and a proper waste determination has not been made. . It is unknown how this waste stream is handled by the vendor. CORRECTIVE ACTION: Submit documentation to this department demonstrating that the key shavings have been properly characterized to determine if they are a hazardous waste. If determined to be hazardous submit a manifest/receipt documenting proper disposal and a statement demonstrating how you will manage it in the future. Keep the test results, waste analyses, or other determinations at least three years from the date that the waste was last sent to on-site or off-site treatment, storage, or disposal.

Site Name:	HD Supply Repair & Remodel, LLC
Violation Date:	05-19-2015
Citation:	40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description:	Failure to ensure employees are familiar with the handling and compliance of hazardous waste regulations and emergency response.
Violation Notes:	Returned to compliance on 06/09/2015. OBSERVATION: Employees training documentation showing employees are thoroughly familiar with proper waste handling and emergency procedures was not available for review during the inspection. CORRECTIVE ACTION: Submit documentation (i.e. training certificates) to this department demonstrating that employees responsible for the management of hazardous waste have been properly trained.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HW

Site ID: 394528
Site Name: HD Supply Repair & Remodel, LLC
Violation Date: 05-19-2015
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 06/09/2015. OBSERVATION: The facility submitted the Hazardous Materials Inventory Chemical Description page for propane with a maximum daily amount of 2,509 cubic feet. The total amount of propane on site during the inspection was 2,810 cubic feet. CORRECTIVE ACTION: Correct the maximum daily amount on the Hazardous Materials Inventory Chemical Description page for propane and submit in the California Environmental Reporting System.

Classification: Conditionally Exempt Small Quantity Generator

Hazardous Waste Summary:

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 131
. Waste name: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 311
. Waste name: Pharmaceutical waste

WALGREENS #7191 (Continued) **1016954455**

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D009
. Waste name: MERCURY

. Waste code: D010
. Waste name: SELENIUM

. Waste code: D024
. Waste name: M-CRESOL

. Waste code: P001
. Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

. Waste code: P075
. Waste name: NICOTINE, & SALTS (OR) PYRIDINE, 3-(1-METHYL-2-PYRROLIDINYL)-,(S)-, & SALTS

. Waste code: U034
. Waste name: ACETALDEHYDE, TRICHLORO- (OR) CHLORAL

. Waste code: U165
. Waste name: NAPHTHALENE

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 131

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 92

WALGREENS #7191 (Continued) **1016954455**

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 3

Waste code: D010
Waste name: SELENIUM
Amount (Lbs): 3

Waste code: P001
Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%
Amount (Lbs): 5

Waste code: P075
Waste name: NICOTINE, & SALTS
Amount (Lbs): 9

Violation Status: No violations found

Violations:
Site ID: 120626
Site Name: Greenback Shell #21
Violation Date: 03-04-2019
Citation: HSC 6.75 25299.30-25299.34 - California Health and Safety Code, Chapter 6.75, Section(s) 25299.30-25299.34
Violation Description: Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance.
Violation Notes: Returned to compliance on 03/20/2019. OBSERVATION: The UST Letter From Chief Financial Officer submitted through the California Environmental Reporting System (CERS) as the mechanism of financial assurance is expired. This document needs to be re-certified annually. CORRECTIVE ACTION: Log into CERS (http://cers.calepa.ca.gov) and submit an updated UST Letter From Chief Financial Officer. NOTE: This violation applies to all three tank systems on-site.
Violation Division: Sacramento County Env Management Department
Violation Program: UST
Violation Source: CERS

SHELL #204-1566-0800 (Continued) **U001612458**

Site ID:	120626
Site Name:	Greenback Shell #21
Violation Date:	03-04-2019
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 07/24/2019. OBSERVATION: The Hazardous Materials Inventory submitted through the California Environmental Reporting System (CERS) contains incorrect information. CORRECTIVE ACTION: Log into CERS (http://cers.calepa.ca.gov) and re-submit the Hazardous Materials Inventory component with the following updates: 1.) Update the chemical storage location for "Propane." This material is stored in front of the convenience store.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HMRRP
Violation Source:	CERS

Site ID:	120626
Site Name:	Greenback Shell #21
Violation Date:	03-04-2019
Citation:	23 CCR 16 2716(a) through (e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(a) through (e)
Violation Description:	For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes:	Returned to compliance on 03/04/2019. OBSERVATION: The Designated UST Operator (D.O.) Monthly Reports for 10/24/2018, 01/29/2019, and 02/27/2019 were missing UST Owner/Operator signatures. D.O. Monthly Reports were signed by the manager at time of inspection. CORRECTIVE ACTION: Moving forward, ensure that the Designated UST Operator Monthly reports are signed/addressed by the UST Owner/Operator within 48 hours of receiving the report from the D.O. NOTE: This violation applies to all three tank systems on-site.

Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to establish and electronically submit an adequate emergency

SHELL #204-1566-0800 (Continued) **U001612458**

response plan and procedures for a release or threatened release of a hazardous material.

Violation Notes: Returned to compliance on 07/24/2019. OBSERVATION: The Emergency Response/Contingency Plan submitted through the California Environmental Reporting System (CERS) contains inaccurate information. CORRECTIVE ACTION: Log into CERS (http://cers.calepa.ca.gov) and update Section H - "Earthquake Vulnerability." Propane cage, car wash, and USTs should be included in the list of vulnerable areas. Update the location for propane under the "vulnerable systems" section. Propane is located in front of the convenience store.

Citation: 23 CCR 16 2715(a)(1)(B) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(a)(1)(B)
Violation Description: Failure to submit the G Designated Underground Storage Tank Operator Identification FormG within 30 days of installing a UST system or within 30 days of a change in DO.
Violation Notes: Returned to compliance on 04/29/2019. OBSERVATION: The Designated UST Operator (D.O.) Identification form submitted through the California Environmental Reporting System (CERS) contains expired certifications. CORRECTIVE ACTION: Log into CERS (http://cers.calepa.ca.gov) and submit an updated Designated UST Operator Identification form. NOTE: This violation applies to all three tank systems on-site.
Violation Division: Sacramento County Env Management Department
Violation Program: UST
Violation Source: CERS

Site ID: 120626
Site Name: Greenback Shell #21
Violation Date: 03-04-2019
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 03/04/2019. OBSERVATION: The 55 gallon drum of "Waste gasoline mixture" stored behind the convenience store was observed open. The manager closed the drum at time of inspection. CORRECTIVE ACTION: Moving forward, keep drums closed unless adding or removing hazardous waste.
Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS

Site ID: 120626
Site Name: Greenback Shell #21
Violation Date: 03-09-2015
Citation: 40 CFR 1 265.35 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.35
Violation Description: Failure to maintain aisle space to allow the unobstructed movement of personnel, fire protection, spill control equipment, and decontamination equipment to any area of facility operation in an emergency, unless it can be demonstrated to the Department that aisle space is not needed for any of these purposes.
Violation Notes: OBSERVATION: The hazardous waste storage area located outside the rear of the building did not have adequate aisle space allowing for

SHELL #204-1566-0800 (Continued) **U001612458**

unobstructed movement. CORRECTIVE ACTION: Submit photos to this department demonstrating that adequate aisle space has been provided.

Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS

Site ID: 120626
Site Name: Greenback Shell #21
Violation Date: 03-06-2017
Citation: HSC 6.7 25290.1(c)(3), 25290.2(c)(3) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.1(c)(3), 25290.2(c)(3)
Violation Description: Failure to keep water out of the secondary containment of UST systems installed on or after July 1, 2003 and before July 1, 2004, or on or after July 1, 2004.
Violation Notes: Returned to compliance on 03/24/2017. -87-1 TANK VIOLATION- UNDETERMINED - 1. OBSERVATION: The facility had low-liquid alarms in the annular in November 2016, December 2016, and January 2016. It took multiple months to properly address/clear the alarm. Alarms must be properly addressed, which includes finding the root cause of alarms and taking care of any issue(s) as they arise. CORRECTIVE ACTION: Submit an explain to to EMD, Attn: Megan Vaughan, explaining why the facility took multiple months to resolve the issue regarding the low-liquid alarms in the annular. Additionally, explain how the facility knows that there has not been a breach in the secondary containment. NOTE: THIS VIOLATION IS UNDETERMINED. RESOLVE WITHIN 30 DAYS.
Violation Division: Sacramento County Env Management Department
Violation Program: UST
Violation Source: CERS

Site ID: 120626
Site Name: Greenback Shell #21
Violation Date: 03-06-2017
Citation: 23 CCR 16 2641(a) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(a)
Violation Description: Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity.
Violation Notes: Returned to compliance on 03/06/2017. -91 TANK VIOLATION- 1. OBSERVATION: The facility's 91 fill sump's 208 was sitting completely on its side in liquid prior to starting today's monitoring system certification. 208s must be properly located so that they can detect a leak at the earliest opportunity. CORRECTIVE ACTION: No immediate action is required. The 208 passed when properly located/tested, but had to be replaced anyways when the Walton Engineering technicians could not get it to go out of alarm. Walton would have properly located the sensor prior to wrapping up today's monitoring system certification.

Violation Date:	03-09-2015
Citation:	23 CCR 16 2715(f) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(f)
Violation Description:	Failure to comply with one or more of the following: provide training to facility employee(s) responsible for proper operation and maintenance every 12 months and/or train new employee(s) who are responsible for proper operation and maintenance within 30-days of hire and/or to have at least one employee present during operating hours that has been trained in the proper operation and maintenance of the UST system.
Violation Notes:	Returned to compliance on 03/07/2016. OBSERVATION: Between March 2014 through September 2014 the Owner/Operator did not provide training to facility employee(s) responsible for proper operation and maintenance every 12 months and/or train new employee(s) who are responsible for proper operation and maintenance within 30-days of hire and/or at least one employee present during operating hours that has been trained in the proper operation and maintenance of the UST system. CORRECTIVE ACTION: Provide training to facility employee(s) responsible for proper operation and maintenance every 12 months and/or train new employee(s) who are responsible for proper operation and maintenance within 30-days of hire and/or at least one employee present during operating hours that has been trained in the proper operation and maintenance of the UST system. NOTE: Corrected at time of inspection.

Violation Description:	Failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit.
Violation Notes:	Returned to compliance on 03/22/2017. -87-1, 87-2, AND 91 TANK VIOLATION(S)- UNDETERMINED - 1. OBSERVATION: The facility reported in its May 2016 CERS submission that its tanks are double-wall fiberglass/fiberglass tanks. However, I believe, per today's inspection, that the tanks are double-wall steel, fiberglass-clad tanks. Information submitted to CERS must be correct. UNDETERMINED - 2. OBSERVATION: The facility reported that it uses both audible/visual alarms and flappers as overfill protection in the May 2016 CERS submission. The facility's ATGs were not tested during today's inspection. They must be certified annually if they are used as overfill protection in conjunction with flappers. CORRECTIVE ACTION (1-2): Address any discrepancies in the facility's CERS submission and make updates as necessary. Additionally, if the facility does use its ATGs (in conjunction with flappers) as the facility's overfill protection, then submit documentation to EMD, Attn: Megan Vaughan, showing that they have [Truncated]

Site ID: 120626
Site Name: Greenback Shell #21
Violation Date: 03-04-2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 03/04/2019. OBSERVATION: The Overfill Prevention Equipment Inspection was required to be performed by October 13th, 2018, and was not performed until today. CORRECTIVE ACTION: Send results to this department within 30 days of performing the inspection, and perform the Overfill Prevention Equipment Inspection every 36 months thereafter. NOTE: This violation applies to all three tank systems on-site. Correction of these violations may not preclude any enforcement action being taken against this facility.

FIRESTONE COMPLETE AUTO CARE #017655 (Continued) **S121739958**

Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	OBSERVATION: The rotor and brake grindings located in the shop were observed being stored in a bin that was overflowing onto the ground with no lid or label and a proper waste determination has not been made. CORRECTIVE ACTION: Accumulate the grindings ina container that can be closed and clean the area to collect all grindings from the equipment. Submit documentation to this department demonstrating that the rotor and brake grindings have been properly characterized to determine if it is a hazardous waste. If determined to be hazardous submit a manifest/receipt documenting proper disposal and a statement demonstrating how you will manage it in the future. Keep the test results, waste analyses, or other determinations at least three years from the date that the waste was last sent to on-site or off-site treatment, storage, or disposal.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HW
Violation Source:	CERS
Site ID:	116603
Site Name:	Firestone Complete Auto Care #017655
Violation Date:	12-30-2019
Citation:	22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	1. OBSERVATION: The used brake fluid drum in the service area had an open bung at the time of inspection. CORRECTIVE ACTION: No 'return to compliance' documentation is required to be submitted to EMD, Attn: Megan Vaughan, but ensure that all hazardous waste containers are closed in the future when they are not actively being utilized.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HW
Violation Source:	CERS
Site ID:	116603
Site Name:	Firestone Complete Auto Care #017655
Violation Date:	09-27-2016
Citation:	HSC 6.5 25201 - California Health and Safety Code, Chapter 6.5, Section(s) 25201
Violation Description:	Failure to obtain a permit or grant of interim status after generator has accumulated hazardous waste on-site for longer than 90 days.
Violation Notes:	Returned to compliance on 12/02/2016. OBSERVATION: A 150 gallon tank of oily mop water located in the storage area was observed WITH AN ACCUMULATED START DATE OF 12/20/15 or 6/30/15 and a manifest/receipt demonstrating disposal within the past 90 days was not available. CORRECTIVE ACTION: Dispose of oily mop water and submit a copy of the manifest/receipt to this department. OBSERVATION: One 55 gallon drum of non RCRA parts washer solution waste located in the shop was observed WITH AN ACCUMULATED START DATE OF 3/22/13 and a manifest/receipt demonstrating disposal within the past 90 days was not available. CORRECTIVE ACTION: Dispose of non RCRA parts washer solution waste and submit a copy of the manifest/receipt to this

Violation Program:	HW
Violation Source:	CERS
Site ID:	116603
Site Name:	Firestone Complete Auto Care #017655
Violation Date:	12-30-2019
Citation:	22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7
Violation Description:	Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or re manufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or re-manufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.
Violation Notes:	1. OBSERVATION: There were two 55-gallon drums in the supply storage room that were labeled as hazardous waste(s). Both had accumulation start dates of 5/13/05. One felt empty when tapped, and the other contained what appeared to be scrap metal. Additionally, there was a 55-gallon drum in the service area that also had a hazardous waste label, but appeared to only store scrap metal. CORRECTIVE ACTION: Hazardous waste containers may be re-purposed for other purposes. However, containers no longer used to store hazardous waste should not be labeled as such. Remove these drums' hazardous waste labels; submit photographs documenting compliance to EMD, Attn: Megan Vaughan. 2. OBSERVATION: There is a mobile unit in the supply storage area whose use is for drained waste fluids. It was not labeled, either with a hazardous waste label or as "empty." CORRECTIVE ACTION: Appropriately label this device, and then submit proof of compliance to EMD, Attn: Megan Vaughan.

Violation Date:	12-30-2019
Citation:	22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description:	Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.

FIRESTONE COMPLETE AUTO CARE #017655 (Continued) **S121739958**

Violation Notes: 1. OBSERVATION: At the time of inspection, mostly empty oil bladders were stored in a drum in the service area that were labeled as "non-regulated waste;" however, there were several bladders that were not CA empty. NOTE: Used oil bladders were disposed of as non-regulated waste on 9/18/19. CORRECTIVE ACTION: These containers, less than five gallons in capacity, may be disposed of as non-hazardous waste as long as they are CA empty. Therefore, re-train your employees on how to properly empty hazardous material containers. Submit proof of compliance to EMD, Attn: Megan Vaughan. 2. OBSERVATION: The facility's metal fines were overflowing the bucket next to the lathe machine in the service area; subsequently, the fines were on the floor around the lathe machine and not properly containerized. NOTE: Brake shavings last went out as universal waste per 8/2/17 per available records. CORRECTIVE ACTION: Properly containerize these fines before correctly dispose of [Truncated]

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS AIR POLLUTANT MAJOR

SCOTT'S AFFORDABLE CAR CARE & FAST LUBE (Continued) **S121739433**

Violation Description:	Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer prior to placing the tank system in service. The written assessment shall state that, the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed to meet the regulation.
Violation Notes:	OBSERVATION: A written hazardous waste tank assessment has not been obtained for the used oil tank system. CORRECTIVE ACTION: Obtain a written hazardous waste tank system assessment for the used oil tank system in accordance with 22 CCR 15 66265.192 and submit a copy to this department.

Citation:	22 CCR 15 66265.192(a) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(a)
Violation Description:	Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer prior to placing the tank system in service. The written assessment shall state that, the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed to meet the regulation.
Violation Notes:	OBSERVATION: A written hazardous waste tank assessment has not been obtained for the used oil tank systems. CORRECTIVE ACTION: Obtain a written hazardous waste tank system assessment for the used oil tank systems in accordance with 22 CCR 15 66265.192 and submit a copy to this department.

CERS HAZ WASTE:

Name:	SPROUTS FARMERS MARKET #263
Address:	7905 GREENBACK LN
City,State,Zip:	CITRUS HEIGHTS, CA 95610
Site ID:	418414
CERS ID:	10724206
CERS Description:	Hazardous Waste Generator

Violations:

Site ID:	418414
Site Name:	Sprouts Farmers Market #263
Violation Date:	06-17-2017
Citation:	40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description:	Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes:	Returned to compliance on 07/14/2017. OBSERVATION: Employees are not thoroughly familiar with proper waste handling and emergency procedures as demonstrated by the number and type of hazardous waste violations observed at the time of inspection. CORRECTIVE ACTION: Submit documentation to this department demonstrating that employees have been properly trained.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HW
Violation Source:	CERS

Site ID:	418414
Site Name:	Sprouts Farmers Market #263
Violation Date:	06-17-2017
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during

SPROUTS FARMERS MARKET #263 (Continued) **S121143859**

storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 09/21/2017. OBSERVATION: Bin of Toxic waste observed to be overflowing and lid unable to be securely closed. No backup bins available for use by store until next pick up of hazardous waste. CORRECTIVE ACTION: Submit photos to this department demonstrating that the container listed above has been properly closed. Recommend obtaining additional bins to be available if needed.
Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS

Site ID: 418414
Site Name: Sprouts Farmers Market #263
Violation Date: 06-17-2017
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 09/21/2017. OBSERVATION: All containers of hazardous waste were observed with a blank hazardous waste label. CORRECTIVE ACTION: Submit a photo to this department demonstrating that the containers listed above have been properly labeled with a fully completed hazardous waste label.
Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-17-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Note that hazardous waste generator permit fees are currently due. Pay fees by due date to obtain permit and avoid late fees and penalties.
Eval Division: Sacramento County Env Management Department
Eval Program: HW
Eval Source: CERS

CERS HAZ WASTE:

Name:	COSMOPROF SUPPLY
Address:	7859 GREENBACK LN
City,State,Zip:	CITRUS HEIGHTS, CA 95610
Site ID:	434210
CERS ID:	10665013
CERS Description:	Hazardous Waste Generator

Violations:

Site ID:	434210
Site Name:	COSMOPROF SUPPLY
Violation Date:	06-24-2016
Citation:	40 CFR 1 265.174 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.174
Violation Description:	Failure to inspect hazardous waste storage areas at least weekly and look for leaking and deteriorating containers.
Violation Notes:	OBSERVATION: Due to the violations observed during the inspection it does not appear that weekly inspections of the hazardous waste area are being conducted. CORRECTIVE ACTION: Submit a statement regarding how Cosmoprof will ensure that weekly inspections of the hazardous

COSMOPROF SUPPLY (Continued) **S121784537**

waste storage area will be conducted in the future.
Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS

Site ID: 434210
Site Name: COSMOPROF SUPPLY
Violation Date: 03-10-2020
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 03/11/2020. 1. OBSERVATION: Echo Joseph (Manager) last received hazardous waste training on 7/28/19 per the available training log; she is the primary person that sorts any waste(s) generated into their appropriate totes if they are deemed hazardous. However, there was not a training log available for the remaining employees at the time of inspection. All applicable employees must receive (at least) basic training on what to do if there is a hazardous waste spill, proper handling, etc. CORRECTIVE ACTION: Refresher training must be done annually. Train all applicable employees on hazardous waste handling/management and then submit proof of compliance to EMD, Attn: Megan Vaughan. 2. OBSERVATION: The hazardous waste storage area is in an enclosed room; the enclosed room's door was somewhat blocked by folded up cardboard boxes and other boxes from a recent shipment. NOTE: Access to hazardous waste storage areas should be unimpeded in the event of an emergency. CORRECTIVE [Truncated]

Citation: 40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description: Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes: OBSERVATION: Employees are not thoroughly familiar with proper waste handling and emergency procedures as demonstrated by the number and type of hazardous waste violations observed at the time of inspection. CORRECTIVE ACTION: Submit documentation to this department demonstrating that employees have received additional training on the handling and management of hazardous waste.

COSMOPROF SUPPLY (Continued) **S121784537**

	Chapter 12, Section(s) 66262.23(a)(4)
Violation Description:	Failure to send a legible copy of each hazardous waste manifest to the Department within 30 days of each shipment of hazardous waste.
Violation Notes:	OBSERVATION: It is not known if the generator has sent a legible copy of each Uniform Hazardous Waste Manifest to the California Department of Toxic Substances Control (DTSC) within 30 days. CORRECTIVE ACTION: Contact your hazardous waste hauler to determine if a copy of the generator manifest is mailed to DTSC. Submit a statement regarding who will be responsible for mailing a copy of all hazardous waste manifests to DTSC .

Site Name:	COSMOPROF SUPPLY
Violation Date:	06-24-2016
Citation:	HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description:	Hazardous Waste Generator Program - Administration/Documentation - General
Violation Notes:	Returned to compliance on 06/30/2016. OBSERVATION: The generator has not obtained a hazardous waste generator permit from this department. CORRECTIVE ACTION: An invoice was mailed to the Corporate office. A permit will be issued once the fees have been paid. A hazardous waste generator must maintain that permit as active as long as the facility is in operation and continues to generate hazardous waste.

Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	OBSERVATION: Wax beads were observed stored in the hazardous waste container labeled "corrosive basic". When the store manager contacted the phone number on the poster she was asked which container to place the wax beads. Employees are expected to use their own judgment on which items are placed in the different hazardous waste containers. Employees have not received training on how to properly characterize the waste. A basket of items marked "DM or DL Inventory Review" was observed on the floor next to the hazardous waste storage area. Once it has been determined that an product will be managed as a hazardous waste it must be characterized and placed in the proper container. CORRECTIVE ACTION: Immediately cease storing hazardous waste in a basket waiting for the DM to sort. Submit documentation to this department demonstrating how Cosmoprof will handle these items in the future. Employees must have resources available to assist with waste characterization when there is a [Truncated]

Address: 7840 GREENBACK LN
City,State,Zip: CITRUS HEIGHTS, CA 95610
Site ID: 396776
CERS ID: 10224412
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 396776
Site Name: LOWE'S #1540
Violation Date: 06-17-2017
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 06/17/2017. OBSERVATION: The 15-gallon drum used to collect waste fuel in the hazardous waste storage area did not have a hazardous waste label at the time of inspection. I did not observe whether or not it was empty at the time of inspection. CORRECTIVE ACTION: Submit a picture to EMD, Attn: Megan Vaughan, demonstrating that this drum has been properly labeled.
Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS

Site ID: 396776
Site Name: LOWE'S #1540
Violation Date: 06-17-2017
Citation: 22 CCR 12 66262.42(a), (b), (d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.42(a), (b), (d)
Violation Description: Failure to determine the status of any hazardous waste if a signed copy of the manifest isnG t received within 35 days of the date the waste was accepted by the initial transporter and/or to submit an

LOWE'S #1540 (Continued) **S121774199**

	Exception Report to DTSC if a signed copy of the manifest isnG t received within 45 days of the date the waste was accepted by the initial transporter.
Violation Notes:	Returned to compliance on 06/20/2017. OBSERVATION: The facility is missing the final, TSDF copy for its 4/17/17 pickup (manifest #: 001531733 PSC). CORRECTIVE ACTION: Locate the TSDF copy and submit a copy of it to EMD, Attn: Megan Vaughan.
Violation Division:	Sacramento County Env Management Department

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	06-17-2017
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	1. The facility has two staging areas. The area in the back of the store, by the office, has a random assortment of products that are stored together on one shelf. Some products will be used in the store, some will be fixed/repaired and returned to the main part of the store to be sold, and some will be disposed of as hazardous waste. Products that are not leaking are not bagged. I did not observe incompatible products being stored together during today's inspection, but the facility should have a process in place to ensure that a) incompatibles are not being stored together and b) that products in this staging area are being stored in a manner to prevent leaking/a release. 2. The facility has a tote for unknown waste in its hazardous waste accumulation area. At the time of inspection, it appeared to only have trash (eg. gloves, clear plastic). Ensure that you have a policy in place for ensuring that incompatible waste streams are not stored in this container to where can [Truncated]

CERS Description: Hazardous Waste Generator

Violations:
Site ID: 368338
Site Name: CVS Pharmacy #16489
Violation Date: 06-17-2017
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 06/17/2017. 1. OBSERVATION: The facility's hazardous waste label for its "CIII-CV DEA Controlled Pharmaceuticals" appears to be outdated. CVS took over running the pharmacy mid-2016, but the label still lists the generator as the Target Corporation. CORRECTIVE ACTION: Submit a photograph to EMD, Attn: Megan Vaughan, demonstrating that the tote has been properly labeled.

Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	OBSERVATION: The facility has a propane tank on site. The propane tank is listed in the business plan inventory with a volume of 49.23 gallons. The tank appears larger. I was unable to determine the volume of the tank. CORRECTIVE ACTION: Determine propane tank volume. If it is 49.23 gallons submit an email documenting the volume is correct per the HMBP inventory. If the propane volume is greater, update the inventory record electronically in the California Environmental Reporting System. OBSERVATION: The Hazardous Materials Inventory Chemical Description page for Non RCRA Waste (Soaps & Lotions) is listed in the disposal manifests in accumulation amounts of up to 1600 pounds on site at the time of pick up for hazardous waste disposal. CORRECTIVE ACTION: Update the HMBP inventory for the maximum amount of

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 1885

TARGET STORE T1121 (Continued) **1014465471**

Waste code:	D002
Waste name:	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Program: HMRRP
Violation Source: CERS

Site ID: 376034
Site Name: Party City #882 Citrus Heights
Violation Date: 10-07-2016
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes: Returned to compliance on 10/17/2016. OBSERVATION: The facility's manager, Soledad Morgan, was unsure if the hazardous material training included training the facility's applicable employees on proper management/uses/hazards of its helium and/or nitrogen cylinder(s) as well as hazardous waste management. Applicable employees must be trained on proper hazardous material/waste management and training documentation must be retained for three years. CORRECTIVE ACTION: Submit a copy of the hazcom training curriculum for the facility's employees to EMD, Attn: Megan Vaughan. If the training curriculum does not include training on proper management/use of the helium and nitrogen cylinders, submit documentation to EMD, Attn: Megan Vaughan, that demonstrates that the facility has trained all of its employees on management/use/hazardous of its compressed gases. Retain all training documentation for three years. NOTE: Facilities have 14 days to resolve UNDETERMINED violations or they turn into ACTUAL violations.

Site Name: Party City #882 Citrus Heights
Violation Date: 10-07-2016
Citation: HSC 6.95 Multiple - California Health and Safety Code, Chapter 6.95, Section(s) Multiple
Violation Description: Business Plan Program - Release/Leaks/Spills - General
Violation Notes: Returned to compliance on 10/17/2016. 1. OBSERVATION: The facility listed fire extinguishers as part of its emergency equipment in the HMP submitted to CERS on 7/30/2016. However, per my inspection on 10/7/2026, the facility's fire extinguisher near the restroom was last serviced/certified in June 2014. Fire extinguishers must be certified/serviced annually. CORRECTIVE ACTION: Submit documentation to EMD, Attn: Megan Vaughan, that demonstrates that the facility has serviced/certified all of the fire extinguishers that it uses as emergency response equipment within the past year. 2. OBSERVATION: The facility's compressed gas cylinders were not all secured at the time of inspection. The cylinders that were secured with a chain had the chain located at the bottom of the cylinders instead of midway up. Compressed gas cylinders must be secured in a manner that will minimize the possibility of a fire/explosion/release. CORRECTIVE ACTION: Submit documentation to EMD, Attn: Megan Vaughan, that demonstrates [Truncated]

Site ID:	376034
Site Name:	Party City #882 Citrus Heights
Violation Date:	01-30-2020
Citation:	HSC 6.95 Multiple - California Health and Safety Code, Chapter 6.95, Section(s) Multiple
Violation Description:	Business Plan Program - Release/Leaks/Spills - General
Violation Notes:	Returned to compliance on 02/03/2020. OBSERVATION: Access to the helium cylinders/hazardous waste storage area is very limited and not easily maneuverable. CORRECTIVE ACTION: This area should be readily accessible in the event of an emergency. Properly clear out this space, and then submit a statement of compliance to Sacramento County's Environmental Management Department, Attn: Megan Vaughan.

Citation:	19 CCR 6.95 25508(a)(1) - California Code of Regulations, Title 19, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page.
Violation Notes:	Returned to compliance on 12/20/2016. OBSERVATION: The facility's primary emergency contact listed in its HMP (submitted to CERS on 7/30/2016) lists Todd Wright as the primary emergency contact. Per my inspection on 10/7/2016, Todd Wright is no longer the acting District Manager (DM). A follow-up call to the facility on 10/11/16 confirmed that Michael Zamecnik is the new DM; Todd Wright has not been the DM for approximately three months. Facilities must update their HMPs within 30 days of a substantial change. CORRECTIVE ACTION: Resubmit the facility's HMP in CERS after making the necessary updates.

Tons:	0.00650
Year:	2018
Gepaid:	CAR000213736
TSD EPA ID:	IDD073114654
CA Waste Code:	181 - Other inorganic solid waste
Disposal Method:	H132 - Landfill Or Surface Impoundment That Will Be Closed As

RITE AID #6046 (Continued) **S113468807**

Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons: 0.02750

Year: 2018
Gepaid: CAR000213736
TSD EPA ID: IDD073114654
CA Waste Code: 331 - Off-specification, aged or surplus organics
Disposal Method: H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons: 0.06250

Year: 2018
Gepaid: CAR000213736
TSD EPA ID: NVT330010000
CA Waste Code: 141 - Off-specification, aged or surplus inorganics
Disposal Method: H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons: 0.00050

Year: 2018
Gepaid: CAR000213736
TSD EPA ID: IDD073114654
CA Waste Code: 141 - Off-specification, aged or surplus inorganics
Disposal Method: H110 -
Tons: 0.00050

Year: 2018
Gepaid: CAR000213736
TSD EPA ID: IDD073114654
CA Waste Code: 214 - Unspecified solvent mixture
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.00650

CERS:

Name:	KELLY MOORE PAINTS
Address:	7841 GREENBACK LN
City,State,Zip:	CITRUS HEIGHTS, CA 95610
Site ID:	560393
CERS ID:	10479829
CERS Description:	Chemical Storage Facilities

Violations:

Site ID:	560393
Site Name:	Kelly Moore Paints
Violation Date:	02-27-2020
Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description:	Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes:	Returned to compliance on 02/28/2020. 1. OBSERVATION: The final, TSDF-signed copies of the listed manifest(s) were missing at the time

KELLY-MOORE PAINT CO INC (Continued) **S108054263**

of inspection: - 000306010 - 000306009 - 015362370 CORRECTIVE ACTION: Obtain the final, TSDF-signed copies of these manifests. Submit copies of the copies to Sacramento County's Environmental Management Department, Attn: Megan Vaughan.

Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-27-2020
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: - No violations noted at the time of inspection. GENERAL: 1. Geoffery York is/was no longer the Store Manager as of 2/17/2020; he was listed as the primary emergency contact in the Business Plan submitted to the California Environmental Reporting System (CERS) on 1/31/2020. Summarily, the site has 30 days from 2/17/2020 to update their emergency contacts in CERS. 2. Fire extinguishers were last serviced 9/16/2019. 3. Hazardous material-related training was last completed in December 2019. 4. Facility is part of PaintCare Program; facility estimated that related-material are picked up (on average) once a week. Documentation reviewed indicated that pickups are relatively small, or roughly 500-750 pounds at a time.
Eval Division: Sacramento County Env Management Department
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-27-2020
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: 1. The facility's EPA ID number (CAL000331231) is active as of today's inspection. 2. The facility's hazardous waste hauler, Ingenium, has picked up the following in the last three years: - Hazardous waste, solid, nos (barium): 8/29/19 (15 lbs) and 11/14/19 (400 lbs); - Hazardous waste, liquid, nos (paint colorant with barium): 1/10/19 (174 lbs) and 12/24/19 (110 lbs); - Hazardous waste, liquid (latex paint spill cleanup): 1/10/19 (149 lbs) and 12/24/19 (75 lbs); - Waste aerosols: 1/10/19 (35 lbs) and 12/24/19 (25 lbs); - Waste paint: 4/19/17 (10 lbs); - Spent alkaline batteries: 1/10/19 (19 lbs) and 12/24/19 (10 lbs); and - Fluorescent light tubes: 1/10/19 (9 lbs) 3. Spent material in line(s) for equipment used to mix paint(s) is regularly purged. 4. Facility has spill kit onsite, and Aramark handles facility's rags.

CERS HAZ WASTE:

Name:	HARBOR FREIGHT TOOLS USA, INC.
Address:	7829 GREENBACK LN
City,State,Zip:	CITRUS HEIGHTS, CA 95610
Site ID:	365624
CERS ID:	10662760
CERS Description:	Hazardous Waste Generator

Violations:

Site ID:	365624
Site Name:	Harbor Freight Tools USA, Inc.
Violation Date:	06-17-2017
Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description:	Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes:	Returned to compliance on 12/18/2017. OBSERVATION: Not all Uniform Hazardous Waste Manifests for the last three years were available at the time of inspection. Per store manager older manifests are kept in storage in year end boxes. It appears that there are several 2016 manifests missing as well. CORRECTIVE ACTION: Locate a copy of all Uniform Hazardous Waste Manifests for the last three years and submit copies to this department.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HW
Violation Source:	CERS

Site ID:	365624
Site Name:	Harbor Freight Tools USA, Inc.

HARBOR FREIGHT TOOLS USA, INC. (Continued) **S121767667**

Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 12/18/2017. OBSERVATION: 1 x 5 gal bucket of "state regulated waste" was observed without a hazardous waste label. It appears that it is not part of the company's procedure to label this waste stream as a hazardous waste. CORRECTIVE ACTION: Submit a photo to this department demonstrating that the container listed above has been properly labeled. Revise company policy and training to include labeling this waste stream and send copy of revised policy and training to this department.

Address:	7800 GREENBACK LN
City,State,Zip:	CITRUS HEIGHTS, CA 95610
Site ID:	564922
CERS ID:	10640815
CERS Description:	Hazardous Waste Generator

Violations:

Site ID:	564922
Site Name:	TOYS R US
Violation Date:	10-14-2017
Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description:	Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes:	Returned to compliance on 08/07/2019. OBSERVATION: Uniform Hazardous Waste Manifests were not available at the time of inspection. CORRECTIVE ACTION: Locate a copy of all Uniform Hazardous Waste Manifests for the past three years and submit copies to this

TOYS R US (Continued) **S126106073**

department.
Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS

Site ID: 564922
Site Name: TOYS R US
Violation Date: 10-14-2017
Citation: 22 CCR 23 66273.35 - California Code of Regulations, Title 22, Chapter 23, Section(s) 66273.35
Violation Description: Failure to accumulate universal waste for one year or less and to demonstrate the length of time that the universal waste has been accumulated from the date it became a waste or was received.
Violation Notes: Returned to compliance on 10/28/2017. OBSERVATION: Universal waste handler accumulated universal waste longer than one year or failed to demonstrate the length of time that the universal waste has been accumulated. Bucket of batteries was not labeled with the accumulation start date, and no manifests for disposal within the last year observed during inspection. CORRECTIVE ACTION: Properly manage accumulated universal waste within one year and or demonstrate the length of time that the universal waste has been accumulated. Submit documentation to this Department demonstrating that the universal waste has been properly managed within one year.
Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS

Site ID: 564922
Site Name: TOYS R US
Violation Date: 10-14-2017
Citation: HSC 6.5 25163(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25163(a)
Violation Description: Failure to use a DTSC registered hazardous waste transporter to transport hazardous waste or transporting hazardous waste without being a DTSC registered hazardous waste transporter.
Violation Notes: Returned to compliance on 08/07/2019. OBSERVATION: Unknown if facility is using a registered hazardous waste transporter for all hazardous wastes generated at the store. Procedure for disposal of damaged / broken / unsellable items that are unable to be used for their intended purpose and are potentially a hazardous waste (e.g. paints and glues) is unclear. Unknown if facility is shipping (via mail) these wastes to the manufacturer. CORRECTIVE ACTION: Submit a statement to this department demonstrating how unsellable items that are unable to be used for their intended purpose and are potentially a hazardous waste will be characterized and managed. Submit documentation that hazardous wastes generated at this store are transported by a registered transporter to an authorized location.
Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS

Site ID: 564922
Site Name: TOYS R US
Violation Date: 10-14-2017
Citation: 40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description: Failure to ensure that all employees are thoroughly familiar with

TOYS R US (Continued) **S126106073**

proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.

Violation Notes: Returned to compliance on 08/07/2019. OBSERVATION: Employees are not thoroughly familiar with proper waste handling and emergency procedures as demonstrated by the number and type of hazardous waste violations observed at the time of inspection. Observed a bin labeled as Hazardous Waste - Oxidizer, containing metal racks and price tags. Hazardous waste management program does not appear to be in use. CORRECTIVE ACTION: Submit documentation to this department demonstrating that employees have been properly trained on hazardous waste management procedures.

CERS HAZ WASTE:

Name:	BEST BUY #0364
Address:	6110 BIRDCAGE CENTRE LN
City,State,Zip:	CITRUS HEIGHTS, CA 95610
Site ID:	420778
CERS ID:	10731745
CERS Description:	Hazardous Waste Generator

Violations:

Site ID:	420778
Site Name:	Best Buy #0364
Violation Date:	02-27-2020
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to

BEST BUY #0364 (Continued) **S112989402**

leak.

Violation Notes: OBSERVATIONS: While observing the hazardous waste designated accumulation area, there was a tote labeled as "Corrosive Acidic Waste" that was accumulating cleaning chemicals (most of them empty) that did not have a lid to demonstrate compliance. The container was full and the contents observed inside exceeded the capacity of which it could contain. When the facility representative was asked if a lid was available, one could not be located. Containers accumulating hazardous wastes must be closed in between use if not actively being used as to prevent a potential leak/spill from occurring. CORRECTIVE ACTION: Within 30 days, Submit photos to this department demonstrating that the container listed above has been properly closed and that the extra waste items have been placed into another bin.
Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS

Site ID: 420778
Site Name: Best Buy #0364
Violation Date: 02-27-2020
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: OBSERVATION: While reviewing the Uniform Hazardous Waste Manifests, the one shipment dating back to 11/01/2019 was missing it’s associated signed TSDF copy to indicate that the waste reached its final destination. The facility maintained all other copies for dates preceding the date of: 11/01/2019. CORRECTIVE ACTION: Within the time frame specified, obtain the signed TSDF copies for the manifests dated 11/01/2019 and submit proof of doing so to this department. The facility must submit an exception report if one was not received.
Violation Division: Sacramento County Env Management Department
Violation Program: HW

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-27-2020
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On 02/27/2020, a hazardous waste generator inspection was conducted at Best Buy #0364 to verify compliance with applicable rules and regulations, specifically the California Health & Safety Code, Chapter 6.5 and Title 22 of the California Code of Regulations. Best Buy is a retailer of electronic devices (small to large) and offers geek squad services via in-home requests and is a handler of universal waste electronic devices. In addition, hazardous waste is generated on site as a result of on-site damages or cleaning products used in house by the custodians. The following hazardous wastes were observed on site and accumulating waste at time of inspection: Waste Corrosive Basics, Waste Corrosive Acids, Universal Waste Electronic Devices, Lamps and Batteries, Non-RCRA State Regulated Wastes and Waste Aerosols (Flammables). Universal Waste electronic devices are being shipped to

CERS HAZ WASTE:

Name:	STAPLES THE OFFICE SUPERSTORE #0674
Address:	6330 SUNRISE NLVD
City,State,Zip:	CITRUS HEIGHTS, CA 95610
Site ID:	354601
CERS ID:	10636054
CERS Description:	Hazardous Waste Generator

Violations:

Site ID:	354601
Site Name:	Staples the Office Superstore #0674
Violation Date:	08-12-2017
Citation:	40 CFR 1 265.174 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.174
Violation Description:	Failure to inspect hazardous waste storage areas at least weekly and look for leaking and deteriorating containers.
Violation Notes:	Returned to compliance on 08/22/2017. OBSERVATION: Per store policy and training, weekly hazardous waste area inspections are to be documented. Observed weekly hazardous waste area inspection logs for previous years, but the most recent inspection log is for 9/2016. CORRECTIVE ACTION: Submit a copy of a current inspection log to this department demonstrating that the hazardous waste storage area is being inspected weekly.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HW
Violation Source:	CERS

Site ID:	354601
Site Name:	Staples the Office Superstore #0674
Violation Date:	08-12-2017
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 08/12/2017. OBSERVATION: Observed several hazardous waste bins with incomplete or incorrectly filled out hazardous waste labels. Generator name and address missing from labels. Observed waste pharmaceuticals in the Universal Waste bin rather than the designated Toxic / State Regulated bin. No other wastes observed in the UW bin other than the pharmaceuticals. Individual bags containing the wastes within the bins are labeled with a date in 2016, while the hazardous waste labels on the outside of the bin has a more recent date in 2017. CORRECTIVE ACTION: Corrected during inspection. No further action needed. Ensure that hazardous waste labels list the correct accumulation start date, when an item is first placed into the bin.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HW
Violation Source:	CERS

Site ID:	354601

STAPLES THE OFFICE SUPERSTORE #0674 (Continued) **S121765031**

Site Name: Staples the Office Superstore #0674
Violation Date: 08-12-2017
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 08/14/2017. OBSERVATION: Per the HWTS database, there were two hazardous waste disposals in 2015. One one Uniform Hazardous Waste Manifest was available for review at the time of inspection. CORRECTIVE ACTION: Locate a copy of all Uniform Hazardous Waste Manifests for all hazardous waste disposals for the last three years and submit copies to this department.
Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-12-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Recommend including guidance in training materials differentiating between items that are to be returned to the vendor or the warehouse and items that are damaged and are potentially hazardous waste and that should be disposed of from the store. "Best Practices for Returns" poster hanging on damaged cage does not mention items that could be a hazardous waste in the "damaged goods" portion of the poster. Items that are scanned to determine proper disposition and come up as "return to vendor" or "return to warehouse" make no mention of the items needing to be disposed of at the store if the item is broken/leaky/damaged/unable to be used for its intended purpose. Recommend obtaining additional spill control material for hazardous waste accumulation area.

CERS HAZ WASTE:

Name:	MICHAEL'S STORE # 1614
Address:	6120 BIRDCAGE CENTER LN
City,State,Zip:	CITRUS HEIGHTS, CA 95610
Site ID:	48713
CERS ID:	10228750
CERS Description:	Hazardous Waste Generator

Violations:

Site ID:	48713
Site Name:	Michael's Store # 1614
Violation Date:	01-18-2019
Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description:	Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes:	Returned to compliance on 01/31/2019. OBSERVATION: Uniform Hazardous Waste Manifests for 2016 and 2018 were not available for review at the time of inspection. CORRECTIVE ACTION: Locate a copy of all Uniform Hazardous Waste Manifests for 2016 and 2018 and submit copies to this department. OBSERVATION: The designated facility copy for manifest #010868970FLE was not available for review at the time of inspection. CORRECTIVE ACTION: Additionally, locate a copy of the designated facility copy of manifest #010868970FLE and submit a copy to this department.

CERS Description:	Chemical Storage Facilities

Violations:

Site ID:	22533
Site Name:	United #5424
Violation Date:	12-02-2015
Citation:	23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description:	Failure of the spill bucket to have a minimum capacity of five gallons.
Violation Notes:	Returned to compliance on 12/02/2015. OBSERVATION: The facility's diesel tank's spill bucket could not retain five gallons at the time of inspection. Spill buckets are required to have a five gallon capacity. CORRECTIVE ACTION: None. The Tank Tek technician replaced the diesel tank's swivel adapter; the spill bucket was then able to retain five gallons during the annual lake test.
Violation Division:	Sacramento County Env Management Department
Violation Program:	UST
Violation Source:	CERS

Site ID:	22533
Site Name:	United #5424
Violation Date:	10-16-2019
Citation:	23 CCR 16 2637(f) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2637(f)
Violation Description:	Failure to submit a copy of the secondary containment test results on the G Secondary Containment Testing report FormG to the UPA within 30 days after the test.
Violation Notes:	Returned to compliance on 01/24/2020. OBSERVATION: Secondary containment testing was performed on 07/31/2019 and a test report has not been submitted to the CUPA. A copy of the test report must be submitted within 30 days of the test. The test report maintained on site, indicates a failed monitoring component: 87 Product Tightness failed when tested. The facility must detect what is causing the leak and ensure that this monitoring component is repaired if necessary.

BP (FORMER MOBILE) (Continued) **S102425616**

Test results must be submitted to this department indicating the passed components. CORRECTIVE ACTION: Immediately submit a copy of the test report or schedule this test and provide 48 hours notification to the CUPA. If repairs are needed, please consult with this department prior to making any repairs. **This violation applies to all tanks maintained on site.**

Violation Division: Sacramento County Env Management Department
Violation Program: UST
Violation Source: CERS

Site ID: 22533
Site Name: United #5424
Violation Date: 12-01-2016
Citation: 23 CCR 16 2636(f)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(2)
Violation Description: Failure of the line leak detector (LLD) monitoring pressurized piping to meet one or more of the following requirements:Monitor at least hourly.Be capable of detecting a release of 3.0 gallons per hour at 10 p.s.i.g. Restrict or shut off the flow of product through the piping when a leak is detected.
Violation Notes: Returned to compliance on 12/01/2016. Refer to Violation Q710.
Violation Division: Sacramento County Env Management Department
Violation Program: UST
Violation Source: CERS

Site ID: 22533
Site Name: United #5424
Violation Date: 12-02-2015
Citation: 23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description: Failure of the double wall pressurized piping in the under dispenser containment to be continuously monitored by a method that either shuts down the flow of product to the dispenser or activates an audible/visual alarm when a leak is detected.
Violation Notes: Returned to compliance on 12/02/2015. OBSERVATION: One of the facility's float and chain assemblies failed to trigger the shear valve in the 1/2 UDC during the annual monitoring system certification testing. Floats and chain assemblies must trigger the shear valve when they detect a leak. CORRECTIVE ACTION: None. The Tank Tek technician fixed/repaired the issue and the float and chain assembly passed during the retest.
Violation Division: Sacramento County Env Management Department
Violation Program: UST
Violation Source: CERS

Site ID: 22533
Site Name: United #5424
Violation Date: 11-29-2017
Citation: 23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description: Failure of the double-walled pressurized piping to be continuously monitored with a system that activates an audible and visual alarm or stops flow at the dispenser when a leak is detected.
Violation Notes: Returned to compliance on 11/29/2017. OBSERVATION: The float and chain mechanism for the premium line in both UDC #1/2 and UDC #3/4 failed to stop flow at dispenser when a leak was presented. CORRECTIVE ACTION: Maintain a continuous monitoring system that activates an audible and

BP (FORMER MOBILE) (Continued) **S102425616**

visual alarm or restricts or stops flow at dispenser when a leak is detected. NOTE: THIS VIOLATION APPLIES TO THE 91 TANK SYSTEM. NOTE: THE FLOAT AND CHAINS MECHANISMS IN UDC #1/2 AND UDC # 3/4 WERE ADJUSTED AND RETESTED AT THE TIME OF INSPECTION

Violation Division: Sacramento County Env Management Department
Violation Program: UST
Violation Source: CERS

Site ID: 22533
Site Name: United #5424
Violation Date: 09-17-2015
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.
Violation Notes: Returned to compliance on 09/30/2015. OBSERVATION: Uniform Hazardous Waste Manifests for used oily water and used fuel filters/hoses/nozzles/absorbent for the years 2012 and 2015 were not available at the time of inspection. CORRECTIVE ACTION: Locate a copy of all Uniform Hazardous Waste Manifests for the disposal of wastes noted above for the years 2012 and 2015, and submit copies to this department. (Corrected onsite at time of inspection)
Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS

Site ID: 22533
Site Name: United #5424
Violation Date: 10-16-2019
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes: OBSERVATION: Owner/Operator did not maintain entry fitting such that it properly seals to the containment. The spill bucket for the 87 Regular Unleaded Fuel Tank failed the lake test. When 5-8 gallons of testing liquid was introduced to the spill bucket (height measured at 15.25"), it was observed at approximately 10:00AM, that the spill bucket could not containerize all the liquid and some fell into the fill sump from the bottom of the spill bucket. **This violation applies to the 87 tank system only.** CORRECTIVE ACTION: Ensure the spill bucket is maintained such that it can containerize at least 5 gallons of liquid as required and if repairs are necessary, ensure permits are obtained prior to conducting any work. Submit course of corrective action to this department within 30 days (by 11/15/2019).

Citation:	22 CCR 12 66262.34(b)(1) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(b)(1)
Violation Description:	Failure to dispose of hazardous waste after the first 100-kilogram threshold amount was accumulated within a 90 day period.
Violation Notes:	Returned to compliance on 09/30/2015. OBSERVATION: A 1 x55-gal container of used oily water and a 1 x 55-gal container of used fuel filters/nozzles/absorbent in the dumpster enclosure area were observed without accumulation start dates and manifests/receipts demonstrating disposal within the 180 days was not available. CORRECTIVE ACTION: Dispose of the two containers noted above and submit a copy of the manifest/receipt to John Williams (williamsjohn@saccounty.net).

Citation:	23 CCR 16 2636(f)(4) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(4)
Violation Description:	Failure to meet one or more of the following monitoring requirements in lieu of the requirement to be tightness tested every 12 months: The monitoring system maintains all product piping outside the dispenser to be fail-safe and shut down the pump when a leak is detected. The monitoring system shuts down the pump or stops flow when a leak is detected in the under dispenser containment (UDC).
Violation Notes:	OBSERVATION: When testing float and chain assemblies, it was determined that UDC #1/2 and UDC #7/8 failed to restrict flow of product at the dispenser when testing the 91 float and chains. These components were isolated after "tripping" the float and chains and pumping 91 fuel into a cannister. It was determined that 91 product lines failed to meet regulatory requirements. **This violation applies to the 91 tank system** CORRECTIVE ACTION: Within 30 days, submit a course of action on how this will be corrected. If repairs are necessary and beyond like for like repairs, the facility will need to obtain a UST Install/Upgrade/Repair permit prior to conducting any work. Once these components are re-tested to indicate they are in working order, submit proof of corrective action to this department accordingly.

Eval Notes:	On 10/16/2019, an Underground Storage Tank (UST) inspection was conducted at United #5424 to verify compliance with applicable rules and regulations, specifically that of Chapter 6.7 of the California Health & Safety Code and Title 23 of the California Code of Regulations. This gas station is run by Apro, LLC, which owns and operates three USTs with the following products: 12,000 gallons of Regular Unleaded Fuel, 10,000 gallons of Premium Unleaded fuel and 10,000 gallons of Diesel Fuel. Today's inspection was scheduled to annually recertify that all leak detection equipment installed for the USTs operate as intended and produce an audible/visual alarm as programmed. The following equipment was tested during today's inspection: - Turbine Sump Sensors (208) - Spill Buckets - Line Leak Detectors (Mechanical LD2000) - Tank Annulars (409s) - Float and Chain assemblies for the Under Dispenser Containment Sumps - Fail Safe/Sensor Out/Power Out [Truncated]

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Data Release Frequency: Quarterly

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing
A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

East Map:	5629054 FOLSOM, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

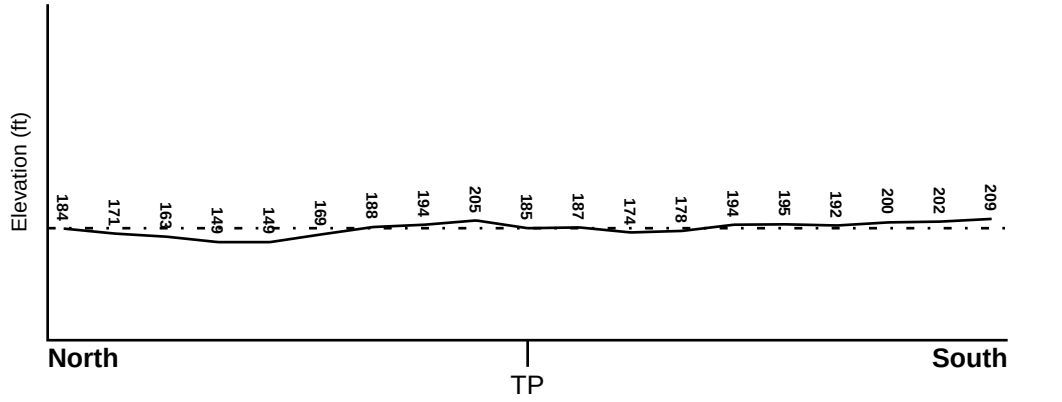
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

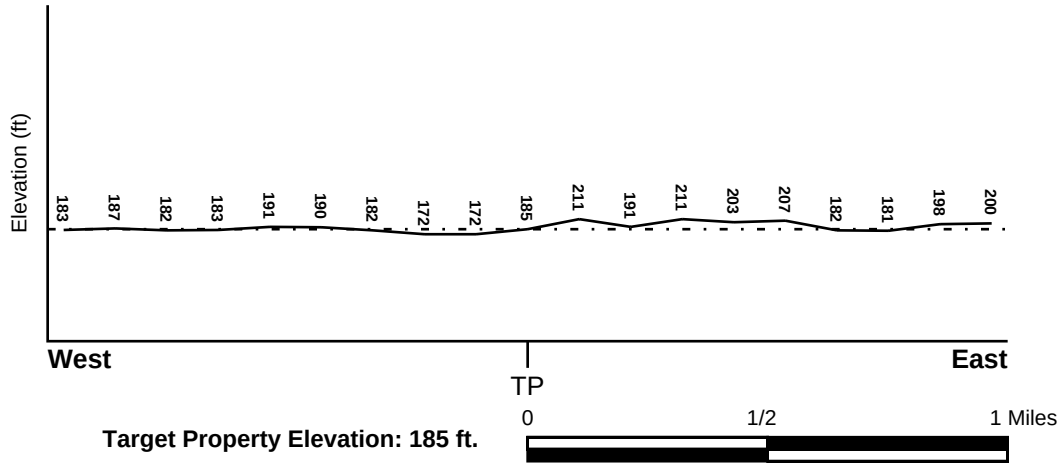
GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION



Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

0 1/2 1 Miles

Target Property Elevation: 185 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06067C0092H	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06067C0084H	FEMA FIRM Flood data
06067C0091H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CITRUS HEIGHTS	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
4	1/2 - 1 Mile WNW	W
1G	1/2 - 1 Mile WNW	W

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	variable	Not reported	Not reported	Max: Min:	Max: Min:

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

APPENDIX E

Preliminary Screen for Vapor Encroachment Conditions Matrix

Screen for Vapor Encroachment Conditions Matrix
SUNRISE TOMORROW PROPERTY
WKA No. 12864.01

Phase I ESA Screen for Vapor Encroachment Conditions (VEC) matrix includes a (1) **Search Radius Test,** (2) **Chemicals of Concern Test (COC),** and (3) a **Critical Distance Test**[1].

(1) Search Radius Test: Are there any known or suspect contaminated sites in the primary area of concern within the corresponding search radii? (if yes, see attached Table A).

(Yes) No If No, then screening for a VEC is complete and no VEC *currently* exists, go to #4. If Yes, then:

(2) **Chemicals of Concern**[2] **Test**: Are COC likely to be present within the area of concern for those known or suspect contaminated sites identified based on the Search Distance Test?

(Yes) No If No, then screening for a VEC is complete and no VEC *currently* exists, go to #4. If Yes, then:

If Yes, check all COC that apply on attached Table B.

(3) Critical Distance Test: A plume test to determine whether or not COC in the contaminated plume(s) may be within the critical distance.

(3a) Is information related to the contaminated(s) plume available (i.e. isoconcentration maps, site drawings, etc.)?
(Yes) No

(3b) If ***No***, then screening for a VEC is complete and no VEC *currently* exists, go to #4. If ***Yes***, then:

(3c) Is the site less than 100 feet to the nearest edge of a contaminated [non-petroleum hydrocarbon] plume(s)?
Yes No

(3d) Is the site less than 30 feet to the nearest edge of a dissolved petroleum hydrocarbon plume(s)?
(Yes) No

If the distance from the nearest edge of a contaminated plume to the nearest existing or planned structure on the site is less than 100 feet for non-petroleum hydrocarbon COC, or less than 30 feet for dissolved petroleum hydrocarbons, then it is presumed that a VEC *currently* exists beneath the site. If the distance from the nearest edge of the contaminated plume is greater than or equal to 100 feet for non-petroleum hydrocarbons, or 30 feet for dissolved petroleum hydrocarbon chemicals of concern, then it is presumed unlikely that a VEC *currently* exists beneath the site.

(4) Is it likely that a VEC *currently* exists beneath the site?
(Yes) No If *Yes,* then recommend performing a full scope VEC assessment according to ASTM E 2600-15.

[1] Based on guidance presented in the ASTM E 2600-15 Standard.
[2] Chemical(s) of concern (COC): See attached table for typical chemicals of concern (as presented in Appendix X6.1 of the ASTM E 2600-15 Standard).

APPENDIX E

Market Impact Analysis

Sunrise Tomorrow Specific Plan

To: Jaymes Dunsmore

Date: October 8, 2020

Subject: Sunrise Mall Market Impact Analysis

Sunrise Tomorrow is a project to re-imagine the heart of Citrus Heights and transform the 100-acre Sunrise Mall property into a premier regional destination and a flourishing center of community life where residents, workers and visitors live, work, play and come together. This report summarizes the Projected Development Program for the property and demonstrates the viability of each use, without negatively impacting surrounding businesses in Citrus Heights.

A detailed economic and market analysis was conducted to determine the optimal mix of land uses and development typologies at the site. The market analysis reviewed all appropriate real estate asset classes including retail, office, hotel, and multi-family residential (including seniors housing). A specific mix of uses emerged as a "Preliminary Development Program" that was used by the planning and design team for the recommended land use plan.

The Projected Development Program is the potential future build-out of the 100-acre property based on the projected market demand from the market analysis, along with refinements from land use planning, urban design, and financial feasibility analysis. This is summarized below in Table 1.

Table 1 – Projected Development Program

	TOTAL	PA - 1	PA - 2	PA -3	PA - 4	PA -5	PA - 6
Residential (Units)	**1,125 Units**		**585 Units**	**245 Units**	**100 Units**	**195 Units**

Hotel (Rooms)	**455 Rooms**	**110 Rooms**	**235 Rooms**				**110 Rooms**
Full Service	235 Rooms		235 Rooms				
Limited Service	110 Rooms	110 Rooms					
Extended Stay	110 Rooms						110 Rooms
Community / Other	**35,000 SF**	**12,000 SF**		**7,000 SF**	**6,000 SF**	**10,000 SF**	
Parking (Spaces)	**5,400 Spaces**	**1,325 Spaces**	**1,585 Spaces**	**495 Spaces**	**805 Spaces**	**885 Spaces**	**305 Spaces**
Surface Parking	1,485 Spaces	685 Spaces	170 Spaces	295 Spaces		30 Spaces	305 Spaces
Structured Parking	3,330 Spaces	640 Spaces	1,415 Spaces		600 Sapces	675 Spaces	
Tuck-Under Parking	585 Spaces			200 Spaces	205 Spaces	180 Spaces	

The following provides a summary of market findings and the explanation of each recommended land use for the property.

Retail

For the purpose of this study, primary and secondary trade areas were identified to understand the amount of retail demand for the property. The primary trade area consists largely of the City of Citrus Heights, as well as sections of Orangevale and Fair Oaks. The secondary trade area includes sections of North Highlands and Northeast Sacramento. The property has a constricted trade area due to strong retail competition from Roseville/Rocklin, Folsom, Arden Arcade, and the Highway 50 corridor. While Sunrise Mall was once a regional destination, newer and more exciting forms of retail have been developed over the past several decades, truncating the properties destination appeal from adjacent jurisdictions.

There are 60.8 square feet of retail per capita in the Citrus Heights submarket, which is much higher than the regional average of 45.3 square feet. Additionally, retail expenditures per capita are slightly below the regional average. From a positive perspective, since 2009, taxable retail sales grew by 30% in Citrus Heights when excluding Sunrise Mall. Declining taxable retail sales at Sunrise Mall coupled with an over supplied retail market demonstrates a need to create the "right-sized" mix for retail at the property.

A retail demand analysis was conducted using the primary and secondary trade areas, as well as miscellaneous inflow spending. Demand for new retail space in Citrus Heights will rise moderately over the next twenty years. Projected new demand is 591,000 square feet by 2040.

The Sunrise Mall property (as of January 2020) has a leasable floor area of 1.125 million square feet of leasable space. This includes the vacant Sears anchor, as well as standalone buildings. The Projected Development Program of 297,000 square feet at build-out is significantly less than the amount of leasable retail space on-site. The program is similar in size to the current inline tenant space within the enclosed portion of the mall. Overall the recommended retail program at the redevelopment would result in **a net decrease of retail space in the local market.**

Neighboring retail properties such as the Marketplace at the Birdcage and Citrus Town Center may have concerns on risks of losing tenants to a newer development. The market analysis demonstrates that there are areas of potential growth opportunity including food and beverage and entertainment over the next twenty years. Approximately half of the retail program is recommended to be dining and entertainment and thus occupies a niche market position able to draw regional traffic to the local area as Sunrise Mall once did.

Furthermore, the projected development program recommends a total of 1,125 new residential units. Thousands of new residents at build-out will generate further spending potential that will not only be captured on-site, but also at neighboring retail properties. New on-site residents are expected to support a total of 60,000 SF of retail at the Sunrise Mall property as well as the local area. New residents coupled with the mixed-use nature of the project will also make these neighboring properties desirable for new retail tenants to fill any vacancies that may emerge. Therefore, this retail impact is considered not significant.

Office

The office market in the Greater Sacramento region has performed well in recent years (pre Covid-19). Steady employment growth in professional and business-service sectors as well as government employment has reduced vacancy rates from a high of 16.5% in 2011 to 8.4% in 2019. These driving forces of absorption have increased asking rental rates to a high of $25.73. While these rental rates are considered an all-time high for Greater Sacramento, they are still 35% to 50% lower than average Bay Area rents. A reduction in development activity over the past decade across the region has also played a major factor in lower vacancy rates and increasing rents. Only 3 million square feet of new office development was delivered between 2010 and 2019.

The Greater Sacramento Economic Council has stated that there is an acute shortage of Class A office space with larger 25,000 to 50,000 square foot floorplates. To attract large companies, the Greater Sacramento region needs to provide newer and larger office product in amenity-rich environments.

The Citrus Heights/Orangevale submarket is not considered a major office submarket and has one of the smallest inventories in the region. The majority of office product in this submarket is considered Class B or Class C. No new Class A product has been delivered in the Citrus Heights/Orangevale submarket over the past decade. Other suburban markets have been more successful in constructing office for professional employment sectors including Roseville/Rocklin, Rancho Cordova, and Folsom. These submarkets have strong demographics and desirable locations for new tenants looking to expand in the Greater Sacramento region.

The lack of Class A inventory in Citrus Heights causes professional, corporate and government tenants to overlook Citrus Heights and look elsewhere for space. Current office product in the city is characterized as older and smaller spaces that primarily serve small tenants under 5,000 square feet in size. This type of product is less desirable, thus office asking rents average $20.24 per square foot (2019). This is significantly below the regional average of $25.73. However rents have increased in the submarket since hitting a low in 2013 and now exceed that necessary to support new development. Vacancy rates for all office product are steady at 9.5% (2019). Significantly, Class A office in Citrus Heights has been at 0% vacancy for over a decade.

An office demand model that uses historical real estate absorption and future employment data from the Greater Sacramento Economic Council and 2016 Metropolitan Transportation Plan/Sustainable Community Strategy projects market demand of 484,000 square feet of Class A office space over a twenty year period. Upwards of 67,000 square feet of medical office could also be absorbed by the Sunrise Mall property.

The projected development program allocates up to 876,000 square feet of Class A office and medical office space. This is higher than the market analysis baseline projections as it accounts for a potential educational or major medical anchor to locate on the Sunrise Mall property. The lack of new Class A office space built in the Citrus Heights/Orangevale submarket, as well as shortage of available large floorplate office in the region demonstrates the viability of projected office demand at the property. Existing office in this submarket will not be impacted by new development at the property due to each product type competing for different market tenants at different price points.

Multi-Family Residential

The Greater Sacramento multi-family residential market has seen strong demand in recent years that is driven primarily by healthy employment growth and in-migration from Southern California and the Bay Area. The rental market has especially been a solid performer due to relatively unaffordable sale prices in most submarkets. Rental vacancy has dropped below 5% and rent growth is amongst the strongest in the nation. Recent developments that have performed very well include BDX at Capital Village in Rancho Cordova and Hub Apartments in Folsom. Affluent submarkets such as Roseville/Rocklin and Folsom have seen newer construction of multi-family product, while older product in inner-ring suburbs have experienced value-add renovations.

The Carmichael/Citrus Heights submarket is considered one of Greater Sacramento's largest and most affordable multi-family submarkets with asking rents 14% below the average. This is primarily due to limited new construction and inventory that skews towards aging and/or low-end product. There has been limited interest from the private development community to build new product in this submarket, primarily due to lack of developable land, high construction costs and higher returns for refurbishment projects over new development in recent years.

There are currently 14,787 multi-family rental units in the Carmichael/Citrus Heights submarket. The multi-family demand model estimates how many multi-family units will be in demand throughout the submarket over the next twenty years (to 2040). This analysis is based on historic absorption, price points, vacancy rates, population projections, land availability, and demographics. The demand projections estimate 1,317 multi-family rental units by 2040 in the submarket. The market analysis demonstrates demand for approximately 600 to 1,000 multi-family rental units at the Sunrise Mall property, plus additional seniors housing. With limited available land in the submarket, the projected development program allocates 585 apartment units (including mixed-use above commercial), 195 stacked flats, 220 townhouses, and 125 seniors housing units. This totals 1,125 units.

Housing supply in Greater Sacramento has not kept pace with demand, displayed by the resounding success of rental projects such as BDX at Capital Village. Rents continues to increase while vacancy decreases. Residential is also a property asset class that has reduced effects from the 2020 Covid-19 pandemic compared to commercial asset classes. New high-quality housing built on the Sunrise Mall property will provide the City of Citrus Heights with a residential property type that is currently not available in the submarket but is much needed. The mixed-use, amenity rich, and walkable nature of the development will also lend itself to creating an environment that will entice a younger professional demographic of considering Citrus Heights as a home. Multi-family impact in the submarket is considered insignificant and may in fact spur additional residential development nearby as has been the case in comparable redevelopments nationwide.

Hotel

The hotel market in Greater Sacramento was one of the strongest in the nation as of 2019. Upper-priced hotels (4+ stars) exceeded 75% occupancy. Lower-priced hotels (3.5 stars and under) also performed very well, with occupancy rates just above 70%. Typically, a healthy market that requires new hotel construction experiences occupancy rates of 70% or above. Capitalization rates also were trending down in 2019, making new development profitable.

New development activity has primarily occurred in downtown Sacramento in recent years, especially in the upper-priced hotel segment. Sacramento County has nine hotels with more than 1,000 rooms under construction as of December 2019. The Covid-19 pandemic has placed a pause on the success of the Greater Sacramento hotel market, however expectations are that recovery to similar levels can be met by 2023/2024.

There are currently no hotels in the Citrus Heights submarket. Most hotels near Citrus Heights are lower priced facilities with highway adjacency. The Crowne Plaza Sacramento Northeast is the most notable hotel in adjacency to Citrus Heights, located at Madison Avenue and the I-80. This lack of hotel availability in Citrus Heights presents an opportunity if placed in a mixed-use, walkable, and amenity rich environment.

Market analysis findings suggest 160 to 320 new upper-priced hotel rooms, and between 140 and 290 lower priced hotel rooms. The projected development program allocates 455 hotel rooms across three properties. This is considered a moderate amount of hotel space when compared to the market demand to 2040. The lack of any existing hotels in Citrus Heights, coupled with an aging and limited inventory in the general submarket exhibits limited impact on hotels in the surrounding area. Given the lack of hotels in Citrus Heights, and the gradual introduction of hotel product at the Sunrise Mall property over the next 20 years, the anticipated impact on the local hotel market is expected to be minimal.

Conclusion

This market impact analysis report demonstrates the latent market demand over the next twenty years (to 2040) for each real estate asset class within the projected development program of the Sunrise Mall property. The project's impacts on the submarket would be considered less than significant due to demand factors and differentiated typologies and positioning.

Roseville, CA 95678

This section provides a general description of the existing noise sources in the Specific Plan Area vicinity, a discussion of the regulatory setting, and identifies potential noise impacts associated with the Specific Plan. Project impacts are evaluated relative to applicable noise level criteria and to the existing ambient noise environment. Mitigation measures have been identified for significant noise-related impacts. This section is based on the Environmental Noise Assessment completed for the proposed Specific Plan (Saxelby Acoustics, 2021). See Appendix F.

There were no comments received during the public review period for the Notice of Preparation regarding noise.

As discussed in the Initial Study for the proposed Specific Plan (see Appendix A), the Specific Plan Area is not located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport. The closest airport is the Sacramento McClellan Airport, located approximately 6.8 miles west of the Plan Area. As such, there is ***no impact*** related to exposure of persons or workers in the area to excessive airport noise levels.

3.9.1 ENVIRONMENTAL SETTING

KEY TERMS

Acoustics	The science of sound.
Ambient Noise	The distinctive acoustical characteristics of a given area consisting of all noise sources audible at that location. In many cases, the term ambient is used to describe an existing or pre-project condition such as the setting in an environmental noise study.
Attenuation	The reduction of noise.
A-Weighting	A frequency-response adjustment of a sound level meter that conditions the output signal to approximate human response.
Decibel or dB	Fundamental unit of sound, defined as ten times the logarithm of the ratio of the sound pressure squared over the reference pressure squared.
CNEL	Community noise equivalent level. Defined as the 24-hour average noise level with noise occurring during evening hours (7 - 10 p.m.) weighted by a factor of three and nighttime hours weighted by a factor of 10 prior to averaging.
Frequency	The measure of the rapidity of alterations of a periodic acoustic signal, expressed in cycles per second or Hertz.
Impulsive	Sound of short duration, usually less than one second, with an abrupt onset and rapid decay.
L_{dn}	Day/Night Average Sound Level. Similar to CNEL but with no evening weighting.
L_{eq}	Equivalent or energy-averaged sound level.
L_{max}	The highest root-mean-square (RMS) sound level measured over a given period of time.

$L_{(n)}$	The sound level exceeded a described percentile over a measurement period. For instance, an hourly L_{50} is the sound level exceeded 50 percent of the time during the one-hour period.
Loudness	A subjective term for the sensation of the magnitude of sound.
Noise	Unwanted sound.
SEL	Sound exposure levels. A rating, in decibels, of a discrete event, such as an aircraft flyover or train passby, that compresses the total sound energy into a one-second event.

FUNDAMENTALS OF ACOUSTICS

Acoustics is the science of sound. Sound may be thought of as mechanical energy of a vibrating object transmitted by pressure waves through a medium to human (or animal) ears. If the pressure variations occur frequently enough (at least 20 times per second), then they can be heard and are called sound. The number of pressure variations per second is called the frequency of sound, and is expressed as cycles per second or Hertz (Hz).

Noise is a subjective reaction to different types of sounds. Noise is typically defined as (airborne) sound that is loud, unpleasant, unexpected or undesired, and may therefore be classified as a more specific group of sounds. Perceptions of sound and noise are highly subjective from person to person.

Measuring sound directly in terms of pressure would require a very large and awkward range of numbers. To avoid this, the decibel scale was devised. The decibel scale uses the hearing threshold (20 micropascals), as a point of reference, defined as 0 dB. Other sound pressures are then compared to this reference pressure, and the logarithm is taken to keep the numbers in a practical range. The decibel scale allows a million-fold increase in pressure to be expressed as 120 dB, and changes in levels (dB) correspond closely to human perception of relative loudness.

The perceived loudness of sounds is dependent upon many factors, including sound pressure level and frequency content. However, within the usual range of environmental noise levels, perception of loudness is relatively predictable, and can be approximated by A-weighted sound levels. There is a strong correlation between A-weighted sound levels (expressed as dBA) and the way the human ear perceives sound. For this reason, the A-weighted sound level has become the standard tool of environmental noise assessment. All noise levels reported in this section are in terms of A-weighted levels, but are expressed as dB, unless otherwise noted.

The decibel scale is logarithmic, not linear. In other words, two sound levels 10 dB apart differ in acoustic energy by a factor of 10. When the standard logarithmic decibel is A-weighted, an increase of 10 dBA is generally perceived as a doubling in loudness. For example, a 70-dBA sound is half as loud as an 80-dBA sound, and twice as loud as a 60-dBA sound.

Community noise is commonly described in terms of the ambient noise level, which is defined as the all-encompassing noise level associated with a given environment. A common statistical tool to measure the ambient noise level is the average, or equivalent, sound level (L_{eq}), which corresponds

to a steady-state A weighted sound level containing the same total energy as a time varying signal over a given time period (usually one hour). The L_{eq} is the foundation of the composite noise descriptor, L_{dn}, and shows very good correlation with community response to noise.

The day/night average level (L_{dn}) is based upon the average noise level over a 24-hour day, with a +10-decibel weighing applied to noise occurring during nighttime (10:00 p.m. to 7:00 a.m.) hours. The nighttime penalty is based upon the assumption that people react to nighttime noise exposures as though they were twice as loud as daytime exposures. Because L_{dn} represents a 24-hour average, it tends to disguise short-term variations in the noise environment. CNEL is similar to L_{dn}, but includes a +5-dB penalty for evening noise. Table 3.9-1 lists several examples of the noise levels associated with common situations.

TABLE 3.9-1: TYPICAL NOISE LEVELS

COMMON OUTDOOR ACTIVITIES	*NOISE LEVEL (DBA)*	*COMMON INDOOR ACTIVITIES*
	--110--	Rock Band
Jet Fly-over at 300 m (1,000 ft)	--100--	
Gas Lawn Mower at 1 m (3 ft)	--90--	
Diesel Truck at 15 m (50 ft), at 80 km/hr (50 mph)	--80--	Food Blender at 1 m (3 ft) Garbage Disposal at 1 m (3 ft)
Noisy Urban Area, Daytime Gas Lawn Mower, 30 m (100 ft)	--70--	Vacuum Cleaner at 3 m (10 ft)
Commercial Area Heavy Traffic at 90 m (300 ft)	--60--	Normal Speech at 1 m (3 ft)
Quiet Urban Daytime	--50--	Large Business Office Dishwasher in Next Room
Quiet Urban Nighttime	--40--	Theater, Large Conference Room (Background)
Quiet Suburban Nighttime	--30--	Library
Quiet Rural Nighttime	--20--	Bedroom at Night, Concert Hall (Background)
	--10--	Broadcast/Recording Studio
Lowest Threshold of Human Hearing	--0--	Lowest Threshold of Human Hearing

SOURCE: CALTRANS, TECHNICAL NOISE SUPPLEMENT, TRAFFIC NOISE ANALYSIS PROTOCOL. SEPTEMBER 2013.

EFFECTS OF NOISE ON PEOPLE

The effects of noise on people can be placed in three categories:

- Subjective effects of annoyance, nuisance, and dissatisfaction;
- Interference with activities such as speech, sleep, and learning; and
- Physiological effects such as hearing loss or sudden startling.

Environmental noise typically produces effects in the first two categories. Workers in industrial plants can experience noise in the last category. There is no completely satisfactory way to measure the subjective effects of noise or the corresponding reactions of annoyance and dissatisfaction. A wide variation in individual thresholds of annoyance exists and different tolerances to noise tend to develop based on an individual's past experiences with noise.

Thus, an important way of predicting a human reaction to a new noise environment is the way it compares to the existing environment to which one has adapted: the so-called ambient noise level. In general, the more a new noise exceeds the previously existing ambient noise level, the less acceptable the new noise will be judged by those hearing it. With regard to increases in A-weighted noise level, the following relationships occur:

- Except in carefully controlled laboratory experiments, a 1 dBA change cannot be perceived;
- Outside of the laboratory, a 3-dBA change is considered a just-perceivable difference;
- A change in level of at least 5-dBA is required before any noticeable change in human response would be expected; and
- A 10-dBA change is subjectively heard as approximately a doubling in loudness, and can cause an adverse response.

Stationary point sources of noise – including stationary mobile sources such as idling vehicles – attenuate (lessen) at a rate of approximately 6 dB per doubling of distance from the source, depending on environmental conditions (i.e. atmospheric conditions and either vegetative or manufactured noise barriers, etc.). Widely distributed noises, such as a large industrial facility spread over many acres, or a street with moving vehicles, would typically attenuate at a lower rate.

EXISTING NOISE AND VIBRATION ENVIRONMENTS

Existing Noise Receptors

Some land uses are considered more sensitive to noise than others. Land uses often associated with sensitive receptors generally include residences, schools, libraries, hospitals, and passive recreational areas. Sensitive noise receptors may also include threatened or endangered noise sensitive biological species, although many jurisdictions have not adopted noise standards for wildlife areas. Noise sensitive land uses are typically given special attention in order to achieve protection from excessive noise.

Sensitivity is a function of noise exposure (in terms of both exposure duration and insulation from noise) and the types of activities involved. In the vicinity of the Plan Area, sensitive land uses include existing single-family residential uses to the south of the Plan Area and multi-family residential uses to the east of the Plan Area.

Existing General Ambient Noise Levels

The existing noise environment in the Plan Area is primarily defined by traffic on Sunrise Boulevard and Greenback Lane.

To quantify the existing ambient noise environment in the project vicinity, Saxelby Acoustics conducted continuous (24-hour) noise level measurements at five locations in the Plan Area. Noise measurement locations are shown on Figure 3.9-1. A summary of the noise level measurement survey results is provided in Table 3.9-2. Appendix F contains the complete results of the noise monitoring.

The sound level meters were programmed to collect hourly noise level intervals at each site during the survey. The maximum value (L_{max}) represents the highest noise level measured during an interval. The average value (L_{eq}) represents the energy average of all of the noise measured during an interval. The median value (L_{50}) represents the sound level exceeded 50 percent of the time during an interval.

Larson Davis Laboratories (LDL) Model 820, Model 812, and Model 831 precision integrating sound level meters were used for the ambient noise level measurement survey. The meters were calibrated before and after use with an LDL Model CAL200 acoustical calibrator to ensure the accuracy of the measurements. The equipment used meets all pertinent specifications of the American National Standards Institute for Type 1 sound level meters (ANSI S1.4).

TABLE 3.9-2: SUMMARY OF EXISTING BACKGROUND NOISE MEASUREMENT DATA

SITE	LOCATION	DATE	L_{DN}	AVERAGE MEASURED HOURLY NOISE LEVELS, dBA					
				DAYTIME (7AM-10PM)			NIGHTTIME (10PM-7AM)		
				L_{EQ}	L_{50}	L_{MAX}	L_{EQ}	L_{50}	L_{MAX}
LT-1	Northern Boundary of Project Site	8/19/20 to 8/20/20	67	64	61	84	59	53	78
LT-2	Western Boundary of Project Site	8/19/20 to 8/20/20	71	67	65	82	63	55	79
LT-3	Eastern Boundary of Project Site	8/19/20 to 8/20/20	54	52	47	72	46	42	67
LT-4	Southwestern Boundary of Project Site	8/19/20 to 8/20/20	63	63	53	86	52	47	73
LT-5	Southeastern Boundary of Project Site	8/19/20 to 8/20/20	61	61	48	81	52	42	74

SOURCE: SAXELBY ACOUSTICS, 2021.

It should be noted that traffic volumes during the noise measurement period were lower potentially due to the COVID-19 pandemic. This could have resulted in lower ambient noise levels than those that would occur under "normal" conditions. However, due to the logarithmic nature of sound, even if traffic volumes were down by 10 percent on Greenback Lane or Sunrise Boulevard, this would only yield an approximate noise reduction of 0.5 dBA. If volumes were down by as much as 50 percent, the noise reduction would be 3 dB which is still an imperceptible difference. Therefore, the COVID-19 pandemic is unlikely to have any substantial effect on the noise analysis.

Existing Traffic Noise Environment at Off-Site Receptors

To assess noise impacts due to project-related traffic increases on the local roadway network, traffic noise levels are predicted at sensitive receptors for existing and future, project and no-project conditions.

Existing and Cumulative noise levels due to traffic are calculated using the Federal Highway Administration (FHWA) Highway Traffic Noise Prediction Model (FHWA RD-77-108). The model is based upon the Calveno reference noise emission factors for automobiles, medium trucks, and

heavy trucks, with consideration given to vehicle volume, speed, roadway configuration, distance to the receiver, and the acoustical characteristics of the site. The FHWA model was developed to predict hourly L_{eq} values for free-flowing traffic conditions. To predict traffic noise levels in terms of L_{dn}, it is necessary to adjust the input volume to account for the day/night distribution of traffic.

Project trip generation volumes were provided by the project traffic engineer (Fehr & Peers, 2020), and truck usage and vehicle speeds on the local area roadways were estimated from field observations. The predicted increases in traffic noise levels on the local roadway network for Existing conditions are provided in terms of L_{dn}.

Table 3.9-3 summarizes the existing traffic noise levels at the nearest sensitive receptors along each roadway segment in the Plan Area. Appendix F provides the complete inputs and results of the FHWA traffic modeling.

TABLE 3.9-3: EXISTING TRAFFIC NOISE LEVELS

ROADWAY	*SEGMENT*	*EXTERIOR TRAFFIC NOISE LEVEL, DB L_{DN}*
Greenback Ln	Between Sunrise Blvd and San Juan Ave	66.2
Greenback Ln	Between Sunrise Blvd and Fair Oaks Blvd	69.3
Sunrise Blvd	Between Arcadia Dr and Woodmore Oaks	70.0
Sunrise Blvd	North of Macy Plaza Dr	68.2
Sunrise Blvd	South of Macy Plaza Dr	69.2
Macy Plaza Blvd	East of Sunrise	62.0

3.9.2 REGULATORY SETTING

FEDERAL

There are no federal regulations related to noise that apply to the Specific Plan.

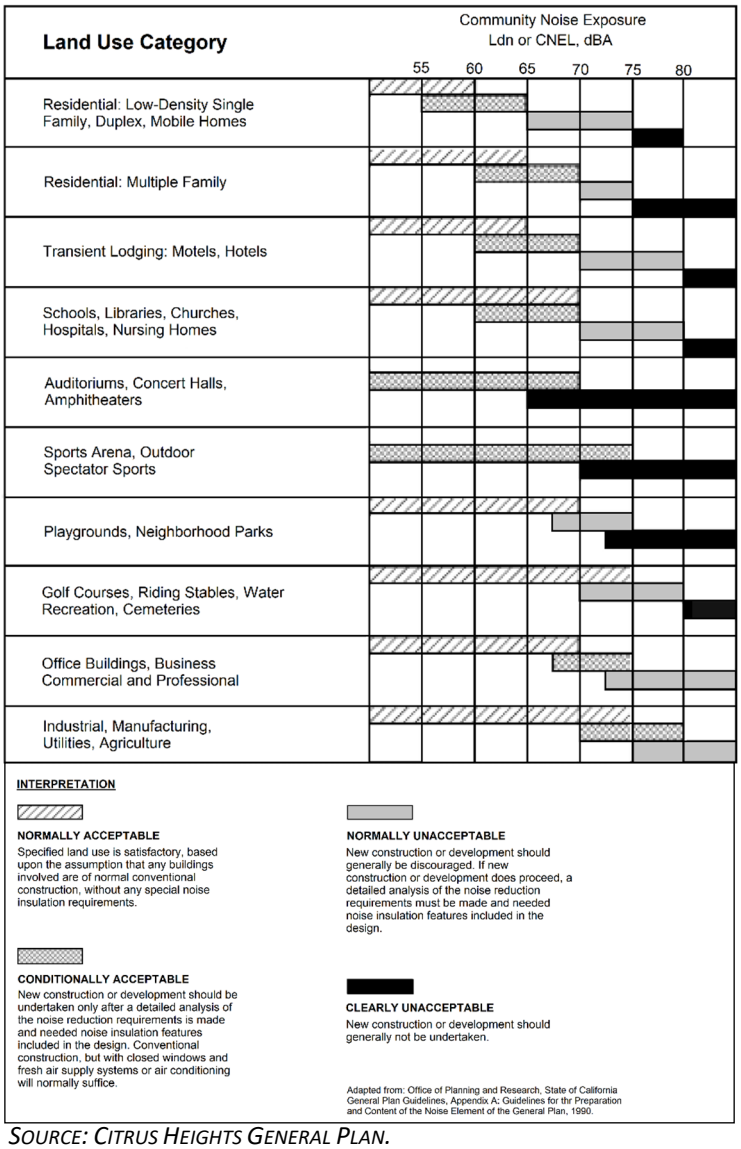
STATE

California Environmental Quality Act

The California Environmental Quality Act (CEQA) Guidelines, Appendix G, indicate that a significant noise impact may occur if a project exposes persons to noise or vibration levels in excess of local general plans or noise ordinance standards, or cause a substantial permanent or temporary increase in ambient noise levels. CEQA standards are discussed more below under the Thresholds of Significance section.

California State Building Code

The State Building Code, Title 24, Part 2 of the State of California Code of Regulations establishes uniform minimum noise insulation performance standards to protect persons within new buildings which house people, including hotels, motels, dormitories, apartment houses and dwellings other



than single-family dwellings. Title 24 mandates that interior noise levels attributable to exterior sources shall not exceed 45 dB L_{dn} or CNEL in any habitable room.

Title 24 also mandates that for structures containing noise-sensitive uses to be located where the L_{dn} or CNEL exceeds 60 dB, an acoustical analysis must be prepared to identify mechanisms for limiting exterior noise to the prescribed allowable interior levels. If the interior allowable noise levels are met by requiring that windows be kept closed, the design for the structure must also specify a ventilation or air conditioning system to provide a habitable interior environment.

Citrus Heights General Plan

New residential development projects shall be designed and constructed to meet acceptable exterior noise level standards shown in Table 3.9-4 [Table 9 of the General Plan], as follows:

TABLE 3.9-4: LAND USE COMPATIBILITY CHART

SOURCE: CITRUS HEIGHTS GENERAL PLAN.

- The maximum exterior noise level of 60 dBA L_{dn} shall be applied in residential areas where outdoor use is a major consideration (such as backyards in single family housing developments and recreation areas in multi-family housing projects). Where the City determines that providing a L_{dn} of 60 dBA or lower is not feasible, the noise level in outdoor areas shall be reduced to as close to the standard as feasible through project design.
- Indoor noise levels shall not exceed a L_{dn} of 45 dBA in new residential housing units.
- Noise levels in new residential development exposed to an exterior L_{dn} of 60 dBA or greater shall be limited to a maximum instantaneous noise level (e.g. trucks on busy streets, train warning whistles) in bedrooms of 50 dBA. Maximum instantaneous noise levels in all other habitable rooms shall not exceed 55 dBA.

When located adjacent to existing or planned sensitive residential and public / quasi-public users, require new nonresidential development to mitigate noise to a maximum of 60 dBA L_{dn} at the property line.

Additionally, the following goals and policies from the Citrus Heights General Plan will apply to the proposed Specific Plan:

COMMUNITY HEALTH ELEMENT

Goal 52: Protect City residents from the harmful and annoying effects of exposure to excessive noise through noise reduction and suppression techniques and appropriate land use policies.

Policy 52.1: Review proposed development projects for compliance with the standards in *Table 9: Acceptable Noise Levels*. If it appears that a project may exceed the limits of Table 9, require an acoustical analysis to identify potential noise levels and attenuation methods.

Policy 52.3: Protect the community, especially noise sensitive receptors, including schools, residences and care facilities, from excessive noise. Residential uses located in a commercial zone are not considered noise sensitive receptors.

Policy 52.4: Require major development proposals to reduce noise impacts on adjacent properties through appropriate techniques including, but not limited to, the following strategies:

- Permit well-designed sound walls when compatible with the surrounding area
- Screen and control noise sources such as parking, loading docks and mechanical equipment
- Increase setbacks for noise sources from adjacent dwellings
- Whenever possible, retain fences, walls or landscaping that serve as noise buffers (although design, safety and other impacts must also be addressed)
- Use soundproofing material and double-glazed windows
- Control hours of operation, including deliveries and trash pickup.

Policy 52.5: When located adjacent to existing or planned sensitive residential and public/quasi-public uses, require new nonresidential development to mitigate noise to a maximum of 60 dBA L_{dn} at the property line.

Policy 52.6: Use techniques such as roadway design, traffic signalization and other traffic management techniques (such as limiting heavy truck traffic in residential areas and requiring alternative paving material) to reduce noise caused by speed or acceleration of vehicles.

Policy 52.7: Protect receivers of roadway noise through appropriate attenuation techniques. The preference is for noise attenuation techniques that minimize the use of sound walls.

City of Citrus Heights Noise Ordinance

The City of Citrus Heights Code of Ordinances provides the follow criteria for noise generated by stationary sources:

Each of the noise limits specified in Table 3.9-6 shall be reduced by five dBA for impulsive or simple tone noises or for noises consisting of speech or music. If the ambient noise level exceeds that permitted by any of the first four noise limit categories in Table 3.9-6, the allowable noise limit shall be increases in five-dBA increments in each category to encompass the ambient noise level. If the ambient noise level exceeds the fifth noise level category, the maximum ambient noise level shall be the noise limit for that category.

TABLE 3.9-5: EXTERIOR NOISE LEVEL STANDARDS

NOISE AREA	*CITY ZONING DISTRICTS*	*TIME PERIOD*	*EXTERIOR NOISE STANDARD*

3.9.3 IMPACTS AND MITIGATION MEASURES

THRESHOLDS OF SIGNIFICANCE

Consistent with Appendix G of the CEQA Guidelines, the Specific Plan will have a significant impact related to noise if it will result in:

- Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the Project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies; and/or
- Generation of excessive groundborne vibration or groundborne noise levels.

Determination of a Significant Increase in Noise Levels

The CEQA Guidelines define a significant impact of a project if it "increases substantially the ambient noise levels for adjoining areas." Generally, a project may have a significant effect on the environment if it will substantially increase the ambient noise levels for adjoining areas or expose people to severe noise levels. In practice, more specific professional standards have been developed. These standards state that a noise impact may be considered significant if it would generate noise that would conflict with local project criteria or ordinances, or substantially increase noise levels at noise sensitive land uses. The potential increase in traffic noise from the project is a factor in determining significance. Research into the human perception of changes in sound level indicates the following:

- A 3-dB change is barely perceptible,
- A 5-dB change is clearly perceptible, and
- A 10-dB change is perceived as being twice or half as loud.

A limitation of using a single noise level increase value to evaluate noise impacts is that it fails to account for pre-Project-noise conditions. Table 3.9-7 is based upon recommendations made by the Federal Interagency Committee on Noise (FICON) to provide guidance in the assessment of changes in ambient noise levels resulting from aircraft operations. The recommendations are based upon studies that relate aircraft noise levels to the percentage of persons highly annoyed by the noise. Although the FICON recommendations were specifically developed to assess aircraft noise impacts, it has been accepted that they are applicable to all sources of noise described in terms of cumulative noise exposure metrics such as the L_{dn}.

TABLE 3.9-7: SIGNIFICANCE OF CHANGES IN NOISE EXPOSURE

AMBIENT NOISE LEVEL WITHOUT PROJECT, LDN	*INCREASE REQUIRED FOR SIGNIFICANT IMPACT*
<60 dB	+5.0 dB or more
60-65 dB	+3.0 dB or more
>65 dB	+1.5 dB or more

SOURCE: FEDERAL INTERAGENCY COMMITTEE ON NOISE (FICON)

Based on the Table 3.9-7 data, an increase in the traffic noise level of 5 dB or more would be significant where the pre- project noise levels are less than 60 dB L_{dn}, or 3 dB or more where existing

noise levels are between 60 to 65 dB Ldn. Extending this concept to higher noise levels, an increase in the traffic noise level of 1.5 dB or more may be significant where the pre-project traffic noise level exceeds 65 dB L_{dn}. The rationale for the Table 3.9-7 criteria is that, as ambient noise levels increase, a smaller increase in noise resulting from a project is sufficient to cause annoyance.

Vibration Standards

Vibration is like noise in that it involves a source, a transmission path, and a receiver. While vibration is related to noise, it differs in that noise is generally considered to be pressure waves transmitted through air, whereas vibration usually consists of the excitation of a structure or surface. As with noise, vibration consists of an amplitude and frequency. A person's perception to the vibration will depend on their individual sensitivity to vibration, as well as the amplitude and frequency of the source and the response of the system which is vibrating.

Vibration can be measured in terms of acceleration, velocity, or displacement. A common practice is to monitor vibration measures in terms of peak particle velocities in inches per second. Standards pertaining to perception as well as damage to structures have been developed for vibration levels defined in terms of peak particle velocities.

Human and structural response to different vibration levels is influenced by several factors, including ground type, distance between source and receptor, duration, and the number of perceived vibration events. Table 3.9-8 indicates that the threshold for damage to structures ranges from 0.2 to 0.6 peak particle velocity in inches per second (in/sec p.p.v). 0.2 in/sec p.p.v. is considered a safe criterion that would protect against architectural or structural damage. The general threshold at which human annoyance could occur is noted as 0.1 in/sec p.p.v.

TABLE 3.9-8: EFFECTS OF VIBRATION ON PEOPLE AND BUILDINGS

PEAK PARTICLE VELOCITY		*HUMAN REACTION*	*EFFECT ON BUILDINGS*
MM/SEC.	*IN./SEC.*		
0.15-0.30	0.006-0.019	Threshold of perception; possibility of intrusion	Vibrations unlikely to cause damage of any type
2.0	0.08	Vibrations readily perceptible	Recommended upper level of the vibration to which ruins and ancient monuments should be subjected
2.5	0.10	Level at which continuous vibrations begin to annoy people	Virtually no risk of "architectural" damage to normal buildings
5.0	0.20	Vibrations annoying to people in buildings (this agrees with the levels established for people standing on bridges and subjected to relative short periods of vibrations)	Threshold at which there is a risk of "architectural" damage to normal dwelling - houses with plastered walls and ceilings. Special types of finish such as lining of walls, flexible ceiling treatment, etc., would minimize "architectural" damage
10-15	0.4-0.6	Vibrations considered unpleasant by people subjected to continuous vibrations and unacceptable to some people walking on bridges	Vibrations at a greater level than normally expected from traffic, but would cause "architectural" damage and possibly minor structural damage.

SOURCE: CALTRANS. TRANSPORTATION RELATED EARTHBORN VIBRATIONS. TAV-02-01-R9601 FEBRUARY 20, 2002.

IMPACTS AND MITIGATION MEASURES

Impact 3.9-1: Specific Plan implementation would not generate a substantial temporary or permanent increase in ambient noise levels in the vicinity of the Plan Area in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies – Operational and Traffic Noise (Less than Significant with Mitigation)

Traffic circulation, parking areas, and amplified music or speech in Sunrise Commons Park are considered to be the primary noise sources for the proposed Specific Plan. Additionally, community plazas and gathering areas as well as drive-through restaurant speakers are substantial noise-generating components. This analysis considers each of these primary noise sources along with vehicle circulation in the Plan Area.

OPERATIONAL NOISE AT EXISTING SENSITIVE RECEPTORS

As noted previously, sensitive land uses include existing single-family residential uses to the south of the Plan Area and multi-family residential uses to the east of the Plan Area. Figure 3.9-2 shows the daytime operational noise contours for existing sensitive receptors in the area. As shown on Figure 3.9-2, Specific Plan buildout is predicted to expose nearby residences to daytime noise levels up to 51 dBA, L_{eq} during daytime (7:00 a.m. to 10:00 p.m.) hours and 39 dBA, L_{eq} during daytime (10:00 p.m. to 7:00 a.m.) hours. This would comply with the City of Citrus Heights Noise Ordinance daytime standard of 55 dBA, L_{eq} and nighttime standard of 50 dBA, L_{eq}. Therefore, no exterior noise control measures would be required, and impacts resulting from exterior noise levels due to operation of the proposed Specific Plan would be considered ***less than significant***.

EXTERIOR AND INTERIOR TRAFFIC NOISE AT EXISTING SENSITIVE RECEPTORS

Tables 3.9-9 and 3.9-10 show the project-related noise level increases in the existing plus project and cumulative plus project conditions.

TABLE 3.9-9: EXISTING TRAFFIC NOISE LEVEL AND PROJECT-RELATED TRAFFIC NOISE LEVEL INCREASES

SOURCE: FHWA-RD-77-108 WITH INPUTS FROM FEHR & PEERS SAXELBY ACOUSTICS. 2021.

Based upon the Table 3.9-7 FICON criteria, where existing traffic noise levels are greater than 65 dB L_{dn}, at the outdoor activity areas of noise-sensitive uses, a +1.5 dB L_{dn} increase in roadway noise levels would be considered significant. Where existing noise levels are between 60 dB and 65 dBA L_{dn}, a +3.0 dB L_{dn} increase in roadway noise levels would be considered significant As shown in Tables 3.9-9 and 3.9-10, the maximum increase in traffic noise at the nearest sensitive receptor is predicted to be 0.7 dBA where existing noise levels exceed 65 dBA Ldn, and 1.8 dB where existing noise levels are between 60 to 65 dBA Ldn. Therefore, no noise control measures would be required, and impacts resulting from increased traffic noise would be considered ***less than significant***.

EXTERIOR AND INTERIOR TRAFFIC NOISE AT NEW PROPOSED SENSITIVE RECEPTORS

New sensitive receptors could be subject to noise levels exceeding the City of Citrus Heights 45 dBA L_{dn} interior noise standard and 60 dBA L_{dn} exterior noise standards. Figure 3.9-3 shows the traffic-related noise contours for proposed sensitive receptors in the Plan Area. Based upon Figure 3.9-3, exterior noise exposure is predicted to fall within 63 to 74 dBA L_{dn} at the proposed residential and hotel uses located along Sunrise Boulevard and Greenback Lane. It is expected that noise control measures such as noise barriers or site design measures would be required to reduce exterior noise levels to 60 dBA L_{dn}, or less, at outdoor use areas of these noise-sensitive uses.

Typical modern building construction provides a 25 dB exterior-to-interior noise reduction. Therefore, sensitive uses exposed to exterior noise levels of less than 70 dBA L_{dn} would not typically need additional noise control measures to meet the City's 45 dBA L_{dn} interior noise level standard. Based upon Figure 3.9-3, the proposed hotel use at the corner of Sunrise Boulevard and Greenback Lane is the only proposed use that is predicted to experience exterior noise levels exceeding 70 dBA L_{dn}. Therefore, interior noise control measures, such as use of acoustic windows or building façade improvements, may be required. These measures would need to be designed in a subsequent, focused noise study for this property.

Mitigation Measures 3.9-1a and 3.9-1b require noise studies for the proposed mixed-use residential, senior housing, and hotel uses which demonstrate compliance with the City's exterior noise standards at proposed outdoor areas. With mitigation, impacts resulting from traffic noise on proposed sensitive uses would be considered ***less than significant***.

EXTERIOR AND INTERIOR NON-TRANSPORTATION NOISE AT NEW SENSITIVE RECEPTORS

As noted previously, non-transportation noise associated with the community plazas and gathering areas would occur upon buildout of the Plan Area. New sensitive receptors could be subject to noise levels exceeding the City of Citrus Heights noise ordinance, which outlines 55 dBA L_{eq} daytime and 50 dBA L_{eq} nighttime exterior noise standards. Figure 3.9-4 shows the daytime non-transportation noise contours for proposed sensitive receptors in the Plan Area. Figure 3.9-5 shows the nighttime non-transportation noise contours for proposed sensitive receptors in the Plan Area.

Based upon Figures 3.9-4 and 3.9-5, exterior noise exposure at new sensitive receptors is generally expected to be less than 55 dBA L_{eq} and 50 dBA L_{eq} at future on-site receptors. However, mixed-use residential uses located around the proposed Sunrise Commons Park area could experience daytime noise levels up to 81 to 82 dBA L_{eq} during large music events. It is expected that these mixed-use residential uses would be located at second floor, or higher, elevations over retail uses. Therefore, there is no practical way to reduce exterior noise levels during these types of events as noise barriers would not shield these elevated uses.

The City's noise ordinance Section 34-88(2) provides an exemption for outdoor gatherings, public dances, shows, and sporting and entertainment events, provided the events are conducted pursuant to a license or permit issued by the City. Therefore, future uses should be required to obtain such a permit for use of amplified music events occurring in the proposed Sunrise Commons Park area. Mitigation Measures 3.9-1a and 3-1b require focused noise studies for the proposed mixed-use residential, senior housing, and hotel uses. The future noise studies would be required to demonstrate compliance with the City's exterior noise standards at proposed outdoor areas, as well as interior noise standards for the proposed hotel use. Mitigation Measure 3.9-2 requires future events held in the Sunrise Commons Park area which use amplified sound exceeding 60 dBA L_{eq} at 50 feet to obtain a permit from the City pursuant to Section 34-88(2) of the City's Noise Ordinance. With mitigation, this impact would be considered ***less than significant***.

MITIGATION MEASURE(S)

Mitigation Measure 3.9-1a: *The proposed mixed-use residential, senior housing, and hotel uses located along Sunrise Boulevard or Greenback Lane shall have noise studies prepared to demonstrate compliance with the City's exterior noise standards at proposed outdoor areas. The noise studies shall, as applicable, include recommendations for the appropriate methods for reducing noise levels at the sites to within the City's exterior noise standards. The effectiveness of the mitigation, if required, shall be documented by the noise studies. The noise studies shall be submitted prior to the approval of tentative maps or site plans for the mixed-use residential, senior housing, and hotel uses located along Sunrise Boulevard or Greenback Lane, and shall be subject to review and approval by the City of Citrus Heights.*

Mitigation Measure 3.9-1b: *The proposed hotel use located at the corner of Sunrise Boulevard and Greenback Lane shall have a noise study prepared to demonstrate compliance with the City's interior noise standard. The noise study shall, as applicable, include recommendations for the appropriate methods for reducing noise levels at the site to within the City's interior noise standards. The effectiveness of the mitigation, if required, shall be documented by the noise study. The noise study shall be submitted prior to the approval of the site plan for the hotel use located along Sunrise Boulevard or Greenback Lane, and shall be subject to review and approval by the City of Citrus Heights.*

Mitigation Measure 3.9-2: *Events held in the proposed Sunrise Commons Park which require the use of amplified sound exceeding 60 dBA L_{eq} at 50 feet shall require a permit obtained from the City pursuant to Section 34-88(2) of the City's Noise Ordinance. Noise levels from such events shall not exceed 90 dBA at 50 feet from the sound system and shall be monitored to verify compliance.*

Mitigation Measure 3.9-3: *To address noise levels from special events and music, the following conditions shall apply to the project:*

- *Amplified sound shall not continue past 10:00 p.m.*
- *Buyers and renters shall be notified of potential noise due to special events, including the use occasional use of amplified sound.*
- *Windows of residential units with a direct view of the Sunrise Commons Park, shall be acoustically upgraded with windows having a minimum sound transmission class (STC) rating of 35.*
- *Mixed-use residential units located over commercial-use areas, which may include the use of indoor or outdoor amplified sound, shall be acoustically upgraded with minimum STC 35 exterior windows and a floor-ceiling assembly having a minimum laboratory STC rating of 60 (55 if field-tested), as determined by a qualified acoustic engineer.*

Impact 3.9-2: Specific Plan implementation would not generate a substantial temporary or permanent increase in ambient noise levels in the vicinity of the Plan Area in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies – Construction Noise (Less than Significant with Mitigation)

During the future construction phases for development projects in the Plan Area, noise from construction activities would add to the noise environment in the immediate project vicinity. As indicated in Table 3.9-11, construction activities would generate maximum noise levels ranging from 76 to 90 dBA L_{max} at a distance of 50 feet. Noise would also be generated during the construction phase by increased truck traffic associated with the transport of heavy materials and equipment to and from the construction site. Although construction noise, including noise from increased construction truck traffic, would be temporary in nature and these activities are anticipated to occur

during normal daytime working hours, there are several residential uses approximately 30 feet from the Plan Area which may be subject to construction noise. As a result, noise-generating construction activities would be considered to have a potentially significant short-term impact.

TABLE 3.9-11: CONSTRUCTION EQUIPMENT NOISE

TYPE OF EQUIPMENT	PREDICTED NOISE LEVELS, L_{MAX} dB				DISTANCES TO NOISE CONTOURS (FEET)	
	NOISE LEVEL AT 25 FEET	NOISE LEVEL AT 50 FEET	NOISE LEVEL AT 100 FEET	NOISE LEVEL AT 200 FEET	70 dB L_{MAX} CONTOUR	65 dB L_{MAX} CONTOUR

SOURCE: ROADWAY CONSTRUCTION NOISE MODEL USER'S GUIDE. FEDERAL HIGHWAY ADMINISTRATION. FHWA-HEP-05-054. JANUARY 2006.

Construction activities associated with implementation of the Specific Plan would be required to comply with the City of Citrus Heights Noise Ordinance, which exempts construction activities from the noise standards, provided that they do not take place between the hours of 8:00 p.m. and 6:00 a.m. on weekdays and Friday commencing at 8:00 p.m. through and including 7:00 a.m. on Saturday, Saturdays commencing at 8:00 p.m. through and including 7:00 a.m. on the next following Sunday, and on each Sunday after 8:00 p.m. Additionally, Mitigation Measure 3.9-3 would require preparation of a construction noise management plan to ensure measures are implemented to minimize construction noise on surrounding sensitive land uses. With mitigation, this impact would be considered ***less-than-significant***.

MITIGATION MEASURE(S)

Mitigation Measure 3.9-3: *Prior to issuance of a grading, building, or demolition permit, the project applicant(s) shall prepare a construction noise management plan that identifies measures to be taken to minimize construction noise on surrounding sensitive land uses. The plan shall include specific noise management measures to be included within the project plans and specifications, subject to review and approval by the City Community Development Department. Noise management measures may include, but are not limited to, using temporary noise walls or curtains around specific areas, staging lay down areas away from sensitive uses, locating truck routes away from receptors, reducing hours of operation, limiting certain loud noise activities to certain hours, etc. The project applicant(s) shall demonstrate, to the satisfaction of the City, that the project complies with the following:*

- *Construction activities shall only take place between the hours limited 6:00 a.m. to 8:00 p.m. on weekdays, and 7:00 a.m. to 8:00 p.m. on Saturday and Sunday.*
- *Construction equipment shall be properly maintained and equipped with noise-reduction intake and exhaust mufflers and engine shrouds, in accordance with manufacturers' recommendations. Equipment engine shrouds shall be closed during equipment operation.*
- *When not in use, motorized construction equipment shall not be left idling for more than 5 minutes.*
- *Stationary equipment (power generators, compressors, etc.) shall be located at the furthest practical distance from nearby noise-sensitive land uses or sufficiently shielded to reduce noise-related impacts.*

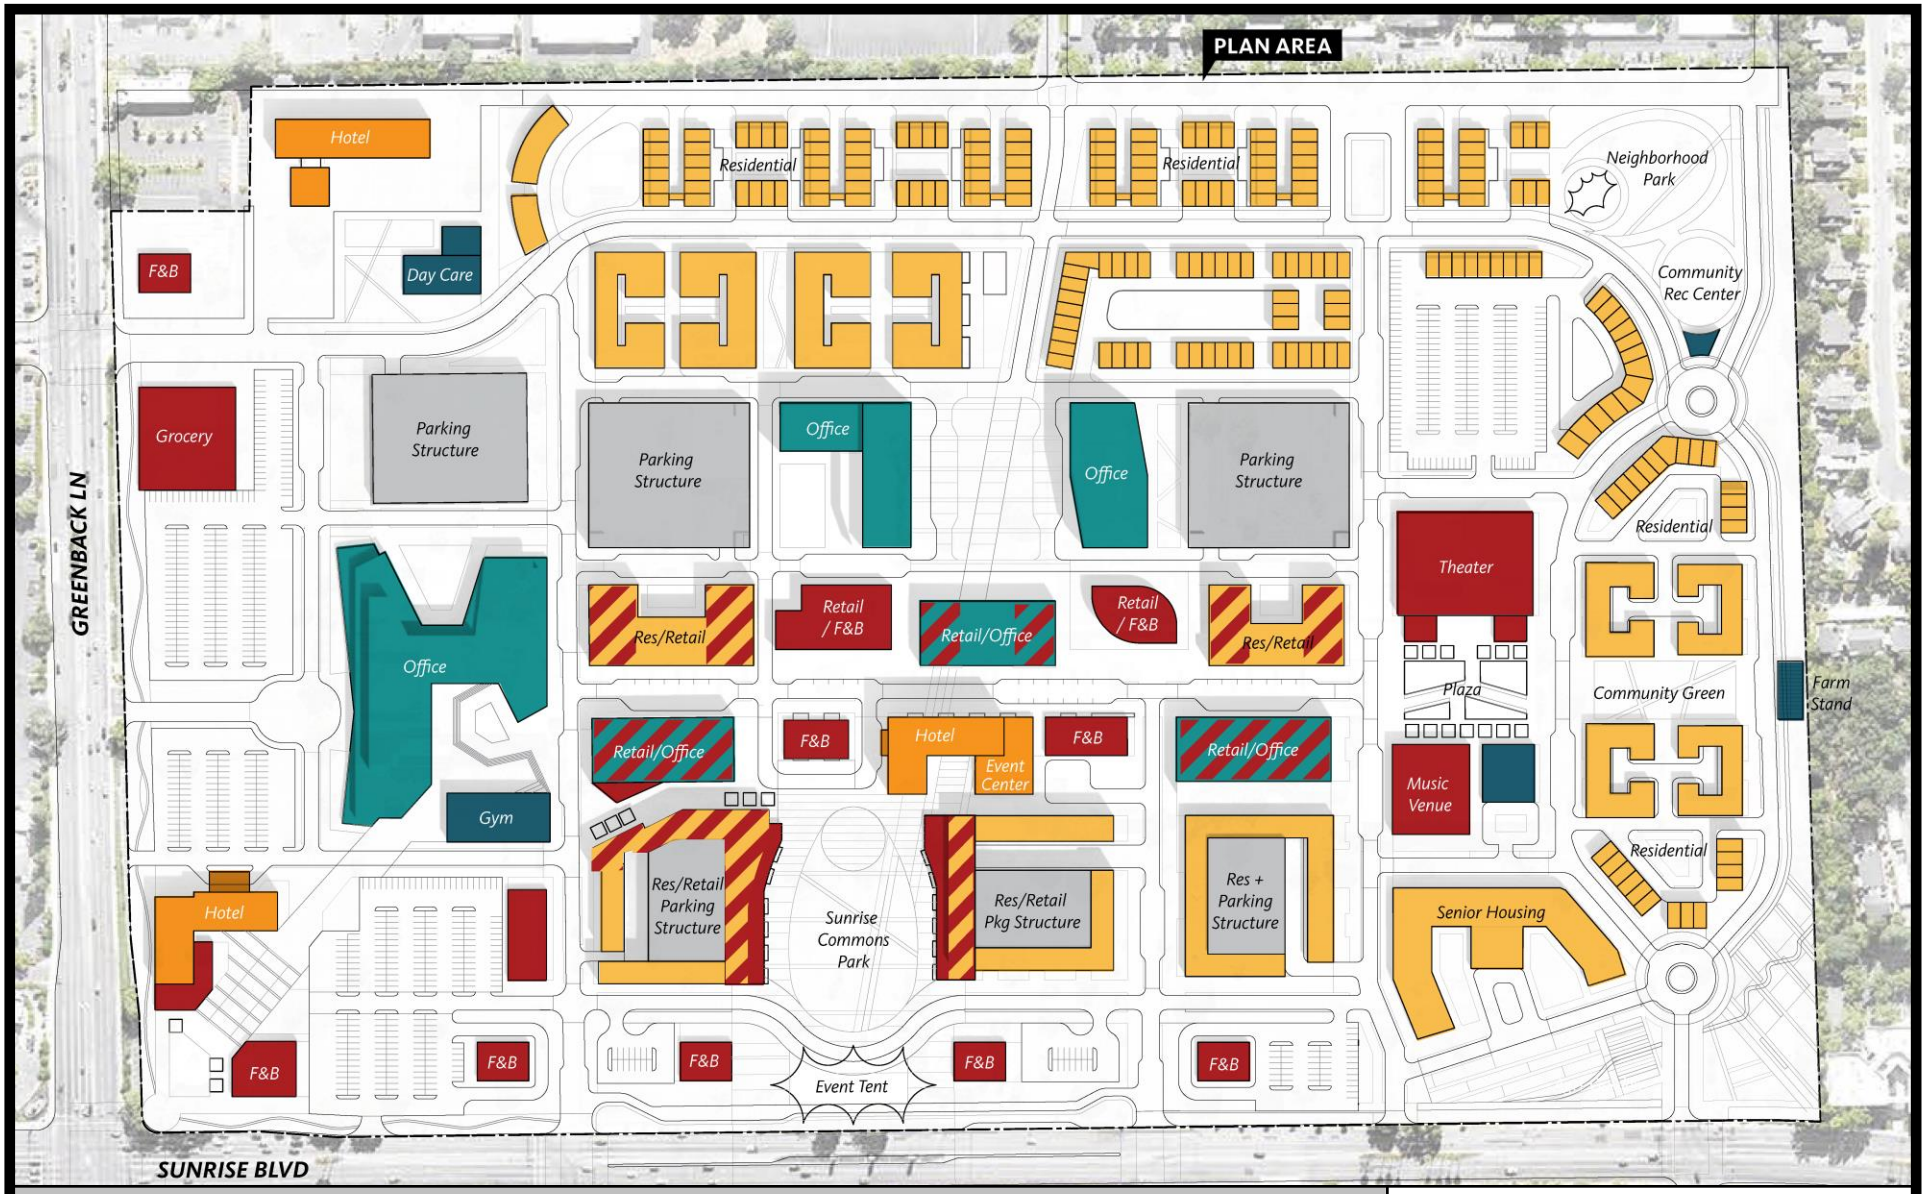
Impact 3.9-3: Specific Plan implementation would not generate excessive groundborne vibration or groundborne noise levels (Less than Significant with Mitigation)

Construction vibration impacts include human annoyance and building structural damage. Human annoyance occurs when construction vibration rises significantly above the threshold of perception. Building damage can take the form of cosmetic or structural damage.

The Table 3.9-12 data indicate that construction vibration levels anticipated for the project are less than the 0.2 inches per second threshold at distances of 26 feet for the most typical construction equipment. Sensitive receptors which could be impacted by construction related vibrations, especially vibratory compactors/rollers, are located approximately 26 feet, or further, from typical construction activities. At these distances, construction vibrations are not predicted to exceed acceptable levels. Additionally, construction activities would be temporary in nature and would occur during normal daytime working hours, as required by Mitigation Measure 3.9-1. However, pile driving could cause exceedance of the 0.2 in/sec criteria at distances of up to approximately 75 feet. It is not clear at this time whether pile driving would be a required construction technique for future development projects in the Plan Area.

TABLE 3.9-12: VIBRATION LEVELS FOR VARYING CONSTRUCTION EQUIPMENT

TYPE OF EQUIPMENT	*P.P.V. @ 25 FEET (INCHES/SECOND)*	*P.P.V. @ 50 FEET (INCHES/SECOND)*	*P.P.V. @ 75 FEET (INCHES/SECOND)*	*P.P.V. @ 100 FEET (INCHES/SECOND)*
Pile Drive (Impact)	0.644	0.226	0.124	0.080
Pile Drive (Sonic)	0.170	0.060	0.033	0.021
Large Bulldozer	0.089	0.031	0.017	0.011
Loaded Trucks	0.076	0.027	0.015	0.010
Small Bulldozer	0.003	0.001	0.000	0.000
Auger/Drill Rigs	0.089	0.031	0.017	0.011
Jackhammer	0.035	0.012	0.006	0.004
Vibratory Hammer	0.070	0.025	0.0135	0.009
Vibratory Compactor/Roller	0.210 (Less than 0.20 at 26 feet)	0.074	0.040	0.026



SOURCE: FEDERAL TRANSIT ADMINISTRATION, TRANSIT NOISE AND VIBRATION IMPACT ASSESSMENT GUIDELINES, MAY 2006

While construction vibrations are not predicted to cause damage to existing buildings or cause annoyance to sensitive receptors, should pile driving be required within 75 feet of a residential structure, mitigation would be required to ensure that construction vibrations do not cause damage to any adjacent structures. With implementation of Mitigation Measure 3.9-2 below, the proposed project would have a ***less than significant*** impact relative to this environmental topic.

MITIGATION MEASURE(S)

Mitigation Measure 3.9-4: *If pile driving is required within 75 feet of a residential structure, pre-construction crack documentation and construction vibration monitoring shall be conducted to ensure that construction vibrations do not cause damage to any adjacent structures. The results of the documentation and monitoring shall be submitted to the City Community Development Department prior to the start of construction activities which would occur within 75 feet of a residential structure.*

Appendix A: Acoustical Terminology

Acoustics	The science of sound.
Ambient Noise	The distinctive acoustical characteristics of a given space consisting of all noise sources audible at that location. In many cases, the term ambient is used to describe an existing or pre-project condition such as the setting in an environmental noise study.
ASTC	Apparent Sound Transmission Class. Similar to STC but includes sound from flanking paths and correct for room reverberation. A larger number means more attenuation. The scale, like the decibel scale for sound, is logarithmic.
Attenuation	The reduction of an acoustic signal.
A-Weighting	A frequency-response adjustment of a sound level meter that conditions the output signal to approximate human response.
Decibel or dB	Fundamental unit of sound, A Bell is defined as the logarithm of the ratio of the sound pressure squared over the reference pressure squared. A Decibel is one-tenth of a Bell.
CNEL	Community Noise Equivalent Level. Defined as the 24-hour average noise level with noise occurring during evening hours (7 - 10 p.m.) weighted by +5 dBA and nighttime hours weighted by +10 dBA.
DNL	See definition of Ldn.
IIC	Impact Insulation Class. An integer-number rating of how well a building floor attenuates impact sounds, such as footsteps. A larger number means more attenuation. The scale, like the decibel scale for sound, is logarithmic.
Frequency	The measure of the rapidity of alterations of a periodic signal, expressed in cycles per second or hertz (Hz).
Ldn	Day/Night Average Sound Level. Similar to CNEL but with no evening weighting.
Leq	Equivalent or energy-averaged sound level.
Lmax	The highest root-mean-square (RMS) sound level measured over a given period of time.
L(n)	The sound level exceeded a described percentile over a measurement period. For instance, an hourly L50 is the sound level exceeded 50% of the time during the one-hour period.
Loudness	A subjective term for the sensation of the magnitude of sound.
NIC	Noise Isolation Class. A rating of the noise reduction between two spaces. Similar to STC but includes sound from flanking paths and no correction for room reverberation.
NNIC	Normalized Noise Isolation Class. Similar to NIC but includes a correction for room reverberation.
Noise	Unwanted sound.
NRC	Noise Reduction Coefficient. NRC is a single-number rating of the sound-absorption of a material equal to the arithmetic mean of the sound-absorption coefficients in the 250, 500, 1000, and 2,000 Hz octave frequency bands rounded to the nearest multiple of 0.05. It is a representation of the amount of sound energy absorbed upon striking a particular surface. An NRC of 0 indicates perfect reflection; an NRC of 1 indicates perfect absorption.
RT60	The time it takes reverberant sound to decay by 60 dB once the source has been removed.
Sabin	The unit of sound absorption. One square foot of material absorbing 100% of incident sound has an absorption of 1 Sabin.
SEL	Sound Exposure Level. SEL is a rating, in decibels, of a discrete event, such as an aircraft flyover or train pass by, that compresses the total sound energy into a one-second event.
SPC	Speech Privacy Class. SPC is a method of rating speech privacy in buildings. It is designed to measure the degree of speech privacy provided by a closed room, indicating the degree to which conversations occurring within are kept private from listeners outside the room.
STC	Sound Transmission Class. STC is an integer rating of how well a building partition attenuates airborne sound. It is widely used to rate interior partitions, ceilings/floors, doors, windows and exterior wall configurations. The STC rating is typically used to rate the sound transmission of a specific building element when tested in laboratory conditions where flanking paths around the assembly don't exist. A larger number means more attenuation. The scale, like the decibel scale for sound, is logarithmic.
Threshold of Hearing	The lowest sound that can be perceived by the human auditory system, generally considered to be 0 dB for persons with perfect hearing.
Threshold of Pain	Approximately 120 dB above the threshold of hearing.
Impulsive	Sound of short duration, usually less than one second, with an abrupt onset and rapid decay.
Simple Tone	Any sound which can be judged as audible as a single pitch or set of single pitches.

Mixed-Use Trip Generation (MXD+) Model Recalibration and Validation to 2019 Conditions

July 13, 2020

FEHR PEERS

Mixed-Use Trip Generation (MXD+) Model
Recalibration and Validation to 2019 Conditions
July 13, 2020

This paper documents the recalibration and validation effort undertaken by Fehr & Peers in 2019-2020 of the MXD+ Tool. This revalidation was necessary given the myriad changes in mobility, technology, and societal behavior that have occurred since MXD+ was originally formulated in the late-2000's. This paper provides a straightforward "nuts and bolts" type description of this process.

MXD+ Model Origin

In the late-2000's, two separate research studies improved the state of practice regarding prediction of trips from mixed-use projects. Studies sponsored by the US EPA (MXD) and the Transportation Research Board (NCHRP 684) developed separate tools for improving trip generation estimates for mixed-use developments. The MXD model was originally derived from 239 mixed-use sites across the country, and validated in 2009 against 22 sites. NC*HRP 684: Enhancing Internal Trip Capture Estimation for Mixed-Use Developments* (2011) was based on six well-known MXD sites.

The principal authors of these original two methods (Reid Ewing at the University of Utah, Brian Bochner at Texas A&M, and Jerry Walters at Fehr & Peers) decided to collaborate on an integrated method that captured the best of both sets of research findings. And thus, MXD+ was created. They published a paper entitled Get*ting Trip Generation Right: Eliminating the Bias Against Mixed-Use Development* (American Planning Association, 2013). According to that paper, MXD+ achieved average errors of 2%, 12%, and 4%, for daily, AM peak hour, and PM peak hour conditions, respectively. These values suggest a good fit between the model's estimation and the counts.

Purpose/Need of Revalidation and Calibration

Excluding the unprecedented changes in travel and economic distress that have occurred in 2020 due to the COVID-19 Pandemic, there have been sweeping changes in travel behavior in the 10-plus years since MXD+ was originally validated. Some of the many examples include increased e-commerce activity, the introduction of ridehailing (i.e., Transportation Network Companies (TNCs), such as Uber and Lyft), increased telecommuting, micromobility (e.g., bikeshare, e-scooters, and microtransit), increased auto ownership, and decreased transit ridership.

Additionally, in 2017, the Institute of Transportation Engineers (ITE) released the 10th Edition of the *Trip Generation Manual*. When compared to the 9th Edition (2012), the 10th Edition demonstrates sizeable decreases in vehicle trip rates for nearly all types of employment uses (due to the replacement of very old data with new data collected after 2010). It also includes several new land use categories (i.e., fast casual restaurant), more overall data, and better definitions for land uses often found in mixed-use sites

Model Recalibration

Model recalibration involved site selection, data collection, and then calibration.

Site Selection

Fehr & Peers selected sites that were geographically diverse, both in terms of locations across the US, and as well as in their place type. They had varying levels of mode choice options, and their site trips were able to be accurately counted. The sites were well understood in terms of occupied land uses, available modes of travel, and other built environment characteristics. This diversity of use type, geographic placement, size allows for the model to be calibrated against a wider set of conditions versus an alternate approach where a more homogeneous set of sites were selected.

Consistent with standard practice in statistical analysis, the selected sites were divided into separate "calibration" and "validation" datasets. Early analysis findings indicated that model accuracy could be improved for weekday AM and PM peak hour conditions through a set of minor adjustments, which are discussed in detail later. The calibration dataset (12 sites) was used to determine the best fit provided by the adjusted set of factors. The validation dataset (4 sites), which was not included in the calibration dataset, were specifically selected to provide a diverse range of geographic settings, modal opportunities, and project sizes, which could be used to test the accuracy of the model. Those results are presented in case study format at the end of this paper.

Figure 1 shows the 12 calibration sites that were selected, as well as the four validation sites. Aside from the four case studies, individual site locations are not disclosed in this article because such information is not necessary to understand the data collection and analysis results. Case in point, transportation planners/engineers routinely use data from the *Trip Generation Manual*, which only discloses the states from which the data was collected. The traffic data collection did not require encroachment onto any private property to place cameras or hose tubes.

Data Collection

Table 1 provides an overview of the size, diversity of uses, and transit proximity of the sites that comprise the calibration database.

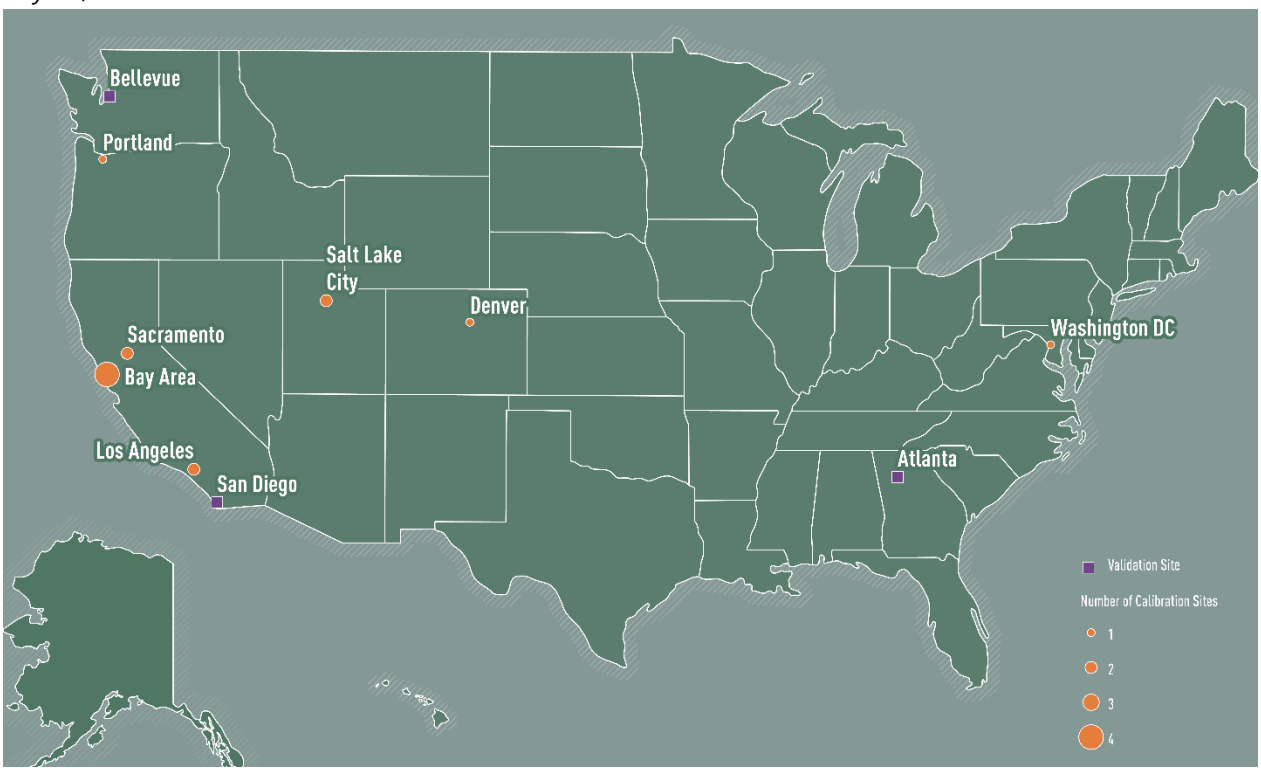

Figure 1: MXD+ Calibration and Validation Sites

Table 1 – Overview of MXD+ Calibration Sites

Metric	Range	Average	Median	Total
Acres	4 – 221 acres	50 acres	19 acres	603 acres
Number of Dwelling Units [1]	8 – 1,841 units	563 units	414 units	6,756 units
Retail	0 – 753,000 sq. ft.	168,000 sq. ft.	38,000 sq. ft.	2,013,000 sq. ft.
Office	0 – 1,084,000 sq. ft.	212,000 sq. ft.	41,000 sq. ft.	2,544,000 sq. ft.
Range of Transit Services	None, adjacent street bus stops, on-site transit centers, and nearby/on-site light rail			
Range of Land Uses	➢ Grocery Store ➢ Student Housing ➢ Medical-Office Building ➢ Restaurants	➢ Health Club ➢ Pharmacy ➢ Hotel ➢ Coffee Shop ➢ Library	➢ Schools ➢ Museum ➢ Movie Theater ➢ Bowling Alley ➢ Hospital	
Notes: [1] Over 95% of dwelling units are multi-family. Site with only 8 dwelling units also includes 315 student housing units.				

The average site was 50 acres and consisted of about 563 dwelling units (the vast majority being multi-family) and 380,000 square feet of non-residential space.

The MXD+ tool includes queries from various sources (e.g., US Census, American Community Survey, local travel demand models, etc.) to enable easy importing of built environment and surrounding area travel characteristics and demographic variables. Some of the more important variables are: Employment within a one-mile walk, Percentage of regional employment within a 30 minute transit ride, and site/adjacent area intersection density (a proxy for site walkability and internal trip-making potential), and Average vehicle ownership per household.

Measurement of vehicle trips generated by each site was a critical component of the data collection effort. It was important that the data collection was comprehensive in terms of collecting all types of vehicle trips generated by each site (including project-related vehicles parking on-site or on-street, persons being dropped-off or picked-up by a taxi, TNC, or friend/spouse/coworker, and truck/service deliveries.

To overcome the considerable cost associated with data collection via video cameras, an innovative approach was undertaken whereby collection of a site's travel during its busiest 14 hours can be used to accurately estimate its 24-hour traffic generation. Typically, these 14 hours represent about 90 percent of the land use's total daily trip generation. A factoring process was then performed using the ITE hourly trip generation data (from the *Trip Generation Manual)* to convert the 14 hour counts into 24-hour observations.

In several instances, site characteristics allowed for a multi-day hose tube count (i.e., a pneumatic tube placed across a road that would register a vehicle as it passes over) to be performed. But this was the exception and not the norm since the majority of sites were located in dense, urban environments where tube counts would have likely yielded inaccurate results.

In several cases, site reconnaissance was necessary to better understand site-specific travel behavior. This led to conclusions that on-street parking on one side of the street is project-related, while the other side is not. Other situations involved motorists parking in nearby garages/lots and walking into the MXD. In those instances, pedestrian activity (both at intersections and mid-block) were observed and classified into groups to translate pedestrian groups into vehicle trips.

Seven (7) of the 12 calibration data sites were counted in October 2019. The remaining five were counted as part of prior research efforts, in either 2015 or 2017. **Table 2** shows the number of vehicle trips these sites were observed to generate on a weekday daily basis, and during the AM and PM peak hours.

Table 2 – Trips Generated by MXD+ Calibration Sites

Time Period	External Vehicle Trips [1]		
	Range	Average	Median
Weekday (Daily)	2,383 – 35,825	12,461	9,495
Weekday AM Peak Hour [2]	100 – 2,017	752	518
Weekday PM Peak Hour [3]	181 – 3,381	1,161	712

Notes:
[1] Includes trips to/from the site for all purposes including deliveries, TNC trips, pass-by trips (i.e., already on the adjacent street) in addition to the typical trip types.
[2] AM peak hour represents the site's busiest consecutive 60-minute period of travel between 7 and 9 AM.
[3] PM peak hour represents the site's busiest consecutive 60-minute period of travel between 4 and 6 PM.

Recalibration of MXD+

The land use and built environment variables described above were input into MXD+ for each of the 12 calibration sites. MXD+ then processes that data in the following generalized steps:

- Step 1 – Gross number of vehicle trips are estimated for land uses based on published rates contained in the *Trip Generation Manual, 10th Edition*.[1]
- Step 2 – Built environment and site characteristics variables are used to estimate the likelihood for internal trip-making, and external trips being made by transit and walking/biking.
- Step 3 – The model estimates the number of internal trips made between complementary land uses within the site.
- Step 4 – The model estimates the number of external trips made by transit and walking/biking.

Nearly all data presented in the current *Trip Generation Manual* for the suburban/urban place type were collected at low-density, single-use, homogeneous developments with little or no public transit service, free parking, and little to no convenient pedestrian access. Hence, direct use of those rates for projects not aligned with those built environment factors are likely to result in an

[1] MXD+ is programmed to include trip generation rates (both weighted averages and as derived from fitted curve equations) from the 10th Edition of the *Trip Generation Manual*. Data is input only for the "suburban/urban" land use category, and not for the "rural", "multi-use urban", or "center city core" categories because their corresponding datasets generally have insufficient numbers of sites from which reliable trip generation rates could be derived.

overestimation of vehicle trips. This statement, while obvious, is intended to set the stage for why gross ITE trip generation estimates (without any adjustments) substantially overestimate trips observed at the MXD sites.

The following guidance from Page 14 of the *Trip Generation Handbook* (Institute of Transportation Engineers, 2017) was used in the calibration process:

> *"The trip generation estimate should reflect, to the extent possible, the specific uses within the known or assumed generalized (using zoning) classification."*

Thus, individual uses such as grocery stores, banks, pharmacies, restaurants, health clubs, day-care centers, etc. present at each site were entered separately into MXD+ versus being aggregated into a single 'retail shopping center' category.

In reviewing the preliminary MXD+ results, it was concluded that the daily results were sufficiently accurate so as to not require any adjustments. But for AM and PM peak hour conditions, it was observed that MXD+ tended to underestimate the observed count more often than desired. This was certainly an undesirable outcome because MXD+ applications should be reasonably conservative. If anything, they should err on the side of overestimating actual trips. The means by which internal trips and external non-auto trips were estimated for AM and PM peak hour conditions was quickly identified as a leading culprit.

The following describes the steps for how internal trips and external walk/bike trips for AM and PM peak hour conditions are estimated:

- Step 1 – Apply the MXD+ peak hour factors by trip purpose to the daily predicted probabilities of these trip reductions to obtain AM and PM peak hour percentages.
- Step 2 – Apply the following weighting of the two methods that independently estimate these trip reductions:
    - AM Peak Hour: 10% NCHRP 684 and 90% MXD+
    - PM Peak Hour: 37% NCHRP 684 and 63% MXD+

An iterative statistical analysis was performed to determine which set of peak hour factors for the MXD+ component of this calculation best fit the data from the calibration dataset. The best fit values are shown in **Table 3**.

The *NCHRP 684* procedure has been incorporated by ITE into its Trip Generation Handbook, and is hence known as the "ITE with Internalization". Note that this procedure estimates internal trips only for AM and PM peak hours (and not daily conditions).

Table 3 – Updated MXD+ Peak Hour Factors by Trip Purpose [1]

Predicted Probability [2]	AM Peak Hour			PM Peak Hour		
	HBW [3]	HBO [4]	NHB [5]	HBW [3]	HBO [4]	NHB [5]
Internal Capture	1.10	1.80	1.00	1.00	1.00	1.00
Walking/Biking External	1.20	1.30	1.00	1.00	1.00	1.00
Transit External	1.40	1.10	1.00	1.40	1.00	1.00

Notes:
[1] Source was analysis of data from the 2017 National Household Travel Survey, specifically analyzing the national dataset to understand the relative likelihood of each type of travel choice during weekday AM and PM peak hours, versus on a daily basis.
[2] These factors are multiplicatively applied (by trip purpose) to the daily predicted possibilities for each type of vehicle trip reduction
[3] HBW = Home-based work trip.
[4] HBO = Home-based other trip (e.g., shopping, school, recreation, etc.).
[5] NHB = Non-home-based trip (e.g., from office to deli).

Transparency in calculations is one of the many objectives of MXD+. By virtue of displaying these values here, it is possible for others to replicate MXD+ results, albeit through a substantial amount of data collection and analysis. The original MXD model (from 2011) is available for download from EPA's website (https://www.epa.gov/smartgrowth/mixed-use-trip-generation-model), though it is noted that model does not include the latest land use categories, trip generation rates, and equations from the 10th Edition of the *Trip Generation Manual*. However, that model does form the basis for the daily module of MXD+, but with these aforementioned adjustments added.

The calibration tests focus on the following five specific areas (from least to most statistically complex):

- Aggregate total trips
- Proportion of cases where MXD+ underestimates the actual number of trips
- Average absolute error
- Correlation coefficient[2]
- Percent RMSE[3]

[2] This statistic measures the relationship between variables. A measure close to 1 means that variables are highly positively correlated; a value of zero suggests no or weak correlation, and a value close to -1 represents strong negative correlation.

[3] This statistic is a measure of the model's accuracy. It is the square root of the mean squared error between the predicted and observed count divided by the mean of the observed count.

Table 4 displays the five calibration statistics for daily, and AM and PM peak hour conditions, as well as the applicable statistical goal/objective for the given calibration statistic.

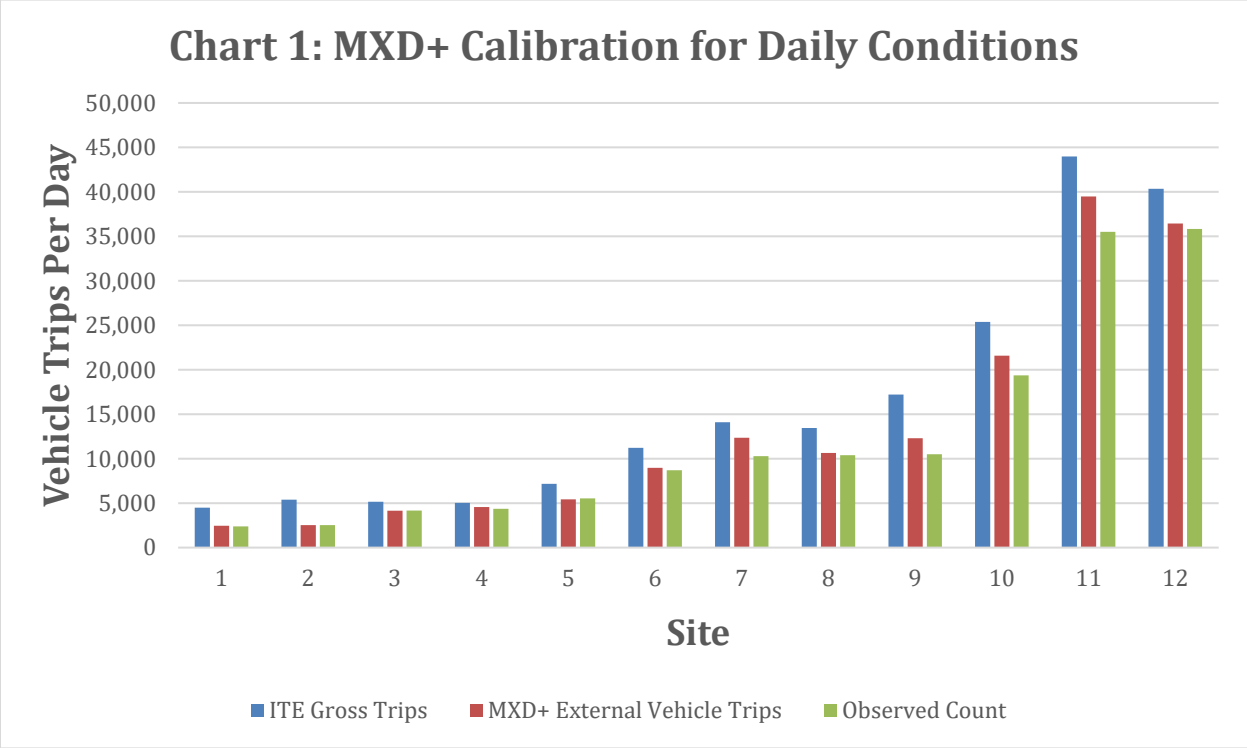

Table 4 – MXD+ Calibration Results

Calibration Statistic	Goal/Objective	Daily	AM Peak Hour	PM Peak Hour
Aggregate Total of MXD+ Vehicle Trip Generation Estimates Versus Actual Counts	As close to zero as possible	+ 7%	- 0.9%	+1.6%
Proportion of Calibration Sites That Were Underestimated by MXD+ [1]	Ideally none	0 of 12	4 of 12	3 of 12
Average Absolute Error	As close to zero as possible	6%	11%	6%
Correlation Coefficient	> 0.88 [2]	1.00	0.99	1.00
Percent RMSE	< 40% [2]	12%	13%	7%

Notes:
[1] Estimates that were within five percent of the actual counts were not considered underestimations since traffic volumes themselves may fluctuate by five percent or more from one day to the next.
[2] Based on statistical measures typically applied in travel demand model development.

Table 4 indicates that MXD+ does an excellent job of fitting the data for all three time periods. Challenges did however arise more frequently during peak hours versus daily conditions. Unique site specific conditions, such as their specific temporal commute patterns, degree of retail tenant success, and presence of TNCs contributed to some of these challenges.

Chart 1 orders the 12 calibration sites from least to greatest number of observed daily trips. Data is then presented for the MXD+ external vehicle trip estimate and the ITE gross trip estimate. At sites 1 – 6, MXD+ predictions are nearly identical to the observed counts. Slightly greater variation occurs at the larger sites (i.e., 7 – 12) for reasons discussed below.

For the 12 sites, MXD+ estimated 160,696 daily external vehicle trips. This represents 7% more trips than the 149,527 daily trips that were counted. This implies that MXD+ is being reasonably conservative.

If these sites had simply been analyzed using ITE gross daily trip estimates (i.e., without any reductions of internal trips or external non-auto trips), the resulting estimate would have been 192,905 daily trips, which is a 29% overestimation versus the counts. This reiterates prior research findings that the use of ITE rates for the suburban/urban place type without any adjustments for internal trips and external non-auto trips would result in a substantial overestimation of a mixed-use site's vehicle trip generation. This is acknowledged on page 8 of the *Trip Generation Handbook* by the following statement: "The application of suburban data in dense or multimodal urban settings can in some cases overestimate motor vehicle demand."

For the 12 calibration sites, the reduction in daily trips caused by internal trip-making and external non-auto travel ranged from 10 to 50 percent, with average/median values near 20 percent. This large range is caused by a number of factors including: mix of land use, presence of transit, and site design, size, and geographic location.

Validation of MXD+

Four case studies from across the US were selected for validation purposes. As noted previously, these sites were excluded from the calibration dataset in order to achieve the statistically desirable independent validation dataset. These sites were specifically chosen, as they are geographically diverse, are of widely varying sizes, and provide widely differing levels of modal travel options.

- **Safeway / Avalon, Bellevue, WA** – This four-acre site is situated in downtown Bellevue, across Lake Washington from downtown Seattle. Despite being only 10 miles from downtown Seattle, a commute to downtown by auto can exceed over an hour. Sound Transit operates fixed-route bus service with stops immediately adjacent to the building. The site is located in a suburban downtown setting with good sidewalk connectivity and heavy pedestrian volumes, but also wide arterial streets, large blocks, and heavy traffic. There no bike routes/lanes nearby. Adjacent land uses include a variety of residential, retail, and employment centers as well as a large regional mall and the Downtown Park. Apartment residents pay $85 to $110 per month for a parking space.
- **Hazard Center, San Diego, CA** – is situated on 16-acres and located five miles north of Downtown San Diego near the intersection of Interstate 8 and State Route 163. All land uses are situated within a ¼-mile walk to the Hazard Center Light Rail Station, which serves the San Diego Trolley Green Line light rail service. This station transports riders to downtown San Diego in about 20 minutes. A bus stop is also situated within ¼ mile of the site. A variety of uses are within a ½-mile walk of the site including Westfield Mission Valley Mall, grocers, employers, and restaurants. The San Diego River multi-use pathway is situated adjacent to this site.
- **Avalon, Alpharetta, GA** – is a quintessential suburban mixed-use project now found in many communities across the country. At a considerable size of 79 acres, it features a vast array of land uses – all of the typical ones found in mixed-use sites plus some other atypical uses such as single-family residential. It is a food & beverage destination with numerous bars and restaurants ranging from fast-food, fast casual, high-turnover sit-down, to quality establishments. Avalon is located directly west of US Highway 19, about 25 miles north of downtown Atlanta. Adjacent transit is limited to a single local bus route that operates on 30 minute headways. Parking is not priced anywhere within Avalon with the exception of the hotel. The site is anchored by Avalon Boulevard, a 1,200-foot long, walkable "Main Street" flanked by ground-floor retail and stacked residential on both sides. Lower density residential, office, and parking extends outwardly from the site's hub, with vehicular access provided by 10 distinct driveways on two public streets. Adjacent land uses are suburban or rural in nature.

- **Southport, West Sacramento, CA** – is a very large (3,000 developed acres), established community situated directly west of downtown Sacramento. It features a wide array of land use types (i.e., residential, jobs, shopping, schools, etc.) often found in self-contained communities. Fixed route bus service is provided on main arterials within the community, and downtown Sacramento can be reached via a five-mile trip. It is geographically isolated from adjacent communities by the Sacramento River and shipping channels, allowing for its trips to be accurately counted via four gateways.

Table 5 displays the land uses present at each validation data site.

Table 5 – Validation Sites Land Uses

Site	Single-Family	Multi-Family	Office	General Retail [1]	Sit-Down Restaurants	Grocery Store	Hotel	Other/Note
Safeway / Avalon Bellevue, WA	-	368 du's	-	15 ksf	8 ksf	55 ksf	-	-
Hazard Center, San Diego, CA	-	120 du's	256 ksf	111 ksf	23 ksf	-	305 rooms	7-screen movie theater
Avalon Alpharetta, GA	100 du's	525 du's	582 ksf	250 ksf	54 ksf	45 ksf	330 rooms	12-screen movie theater
Southport, West Sacramento, CA	6,811 du's	893 du's	80 ksf	387 ksf	15 ksf	54 ksf	-	Elementary & High School, 600 ksf manufacturing

Notes:
[1] Includes wide array of uses such as: cleaners, dance studios, bookstore, financial office, salon, learning center, jewelers, salons, auto detailing, optometry, etc. Banks, gas stations, fast-food restaurants, coffee shops, and fitness studios were estimated separately (based on their specific uses) but included in this land use total for reporting purposes.
du's = dwelling units. ksf = thousand square feet.

Table 6 presents the number of external vehicle trips measured at each validation site in October 2019 versus the estimated number it would generate using MXD+. Footnote 2 in the table highlights an interesting phenomenon associated with the Southport validation case study. Because it is being validation at the gateways to entire community (versus essentially driveways for the other sites), it is necessary to subtract pass-by trips that would visit the retail uses, as those trips would not add traffic to the community gateways. Those values are shown in brackets.

Table 6 – Validation Sites Trip Generation Comparison

Site	Size	External Vehicle Trip Generation					
		Daily		AM Peak Hour		PM Peak Hour	
		October 2019 Count	MXD+ [1]	October 2019 Count	MXD+ [1]	October 2019 Count	MXD+ [1]
Safeway / Avalon Bellevue, WA	4 acres	5,505	5,968 (+8%)	239	254 (+6%)	512	497 (- 3%)
Hazard Center San Diego, CA	16 acres	11,189	12,395 (+11%)	680	696 (+2%)	930	977 (+5%)
Avalon Alpharetta, GA	79 acres	33,301	33,332 (0%)	1,685	1,894 (+12%)	2,543	2,674 (+5%)
Southport West Sacramento, CA	3,000 acres	75,191	78,961 [74,138] [2] (-1.4%)	6,484	5,919 [5,672] [2] (-12.5%)	6,192	8,156 [7,480] [2] (+21%)

Notes:
[1] Values in parentheses represent the percent increase in trips estimated by MXD+ versus the 2019 field measurements.
[2] Values in brackets represent the MXD+ external vehicle trips minus pass-by trips (see text below for explanation). The corresponding percentage (shown in parentheses) represents the percent change in trips estimated by MXD+ (after subtracting pass-by trips) versus the 2019 field measurements.
du's = dwelling units. ksf = thousand square feet.

The following findings are derived from Table 6:

- For the three smaller sites, MXD+ produces a desirable result in which each validation site's external vehicle trips tend to be slightly overestimated. This is preferable to the converse in which MXD+ consistently underestimates actual trips. Accordingly, the results from MXD+ can be considered reasonably, but not overly, conservative.
- The goodness of fit at the Avalon validation site was a particularly important outcome, as the calibration sites were not in that part of the US and also not "manufactured mixed-use" in an otherwise suburban setting.
- Despite the calibration dataset consisting of a maximum site size of 221 acres and 1,840 units, the model's estimate was within 1.4% of the actual count for daily conditions. But AM and PM peak hour validation results did not fare as well. We suspect the AM peak hour underestimation could be associated with the various schools (i.e., three K-8 public schools and a public high school) in the community and their district boundaries (i.e., more

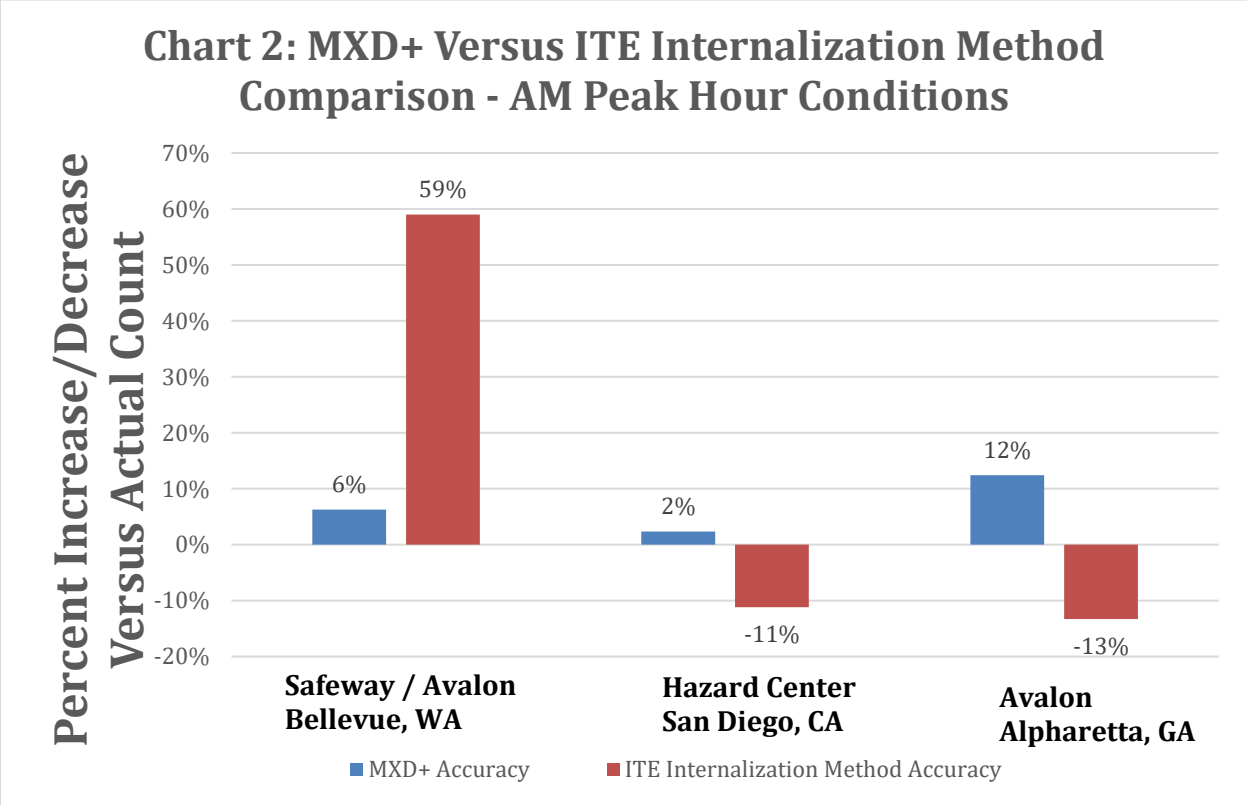
students being transported from outside the community to these schools). The PM peak hour overestimation likely stems from reliance on ITE trip rates for single-family and multi-family uses, which turned out to be substantially higher than was observed in one particular neighborhood[4]. The Southport validation site highlights how use of MXD+ may be considered for very large projects, but it would be prudent to perform spot checks of trip rates, understand school district boundaries, etc.

Table 7 displays the internal trip percentage reductions, and external trips made by transit and walk/bike for each validation site.

Table 7 – Percent Internal Trips and External Non-Auto Trips at Each Validation Site

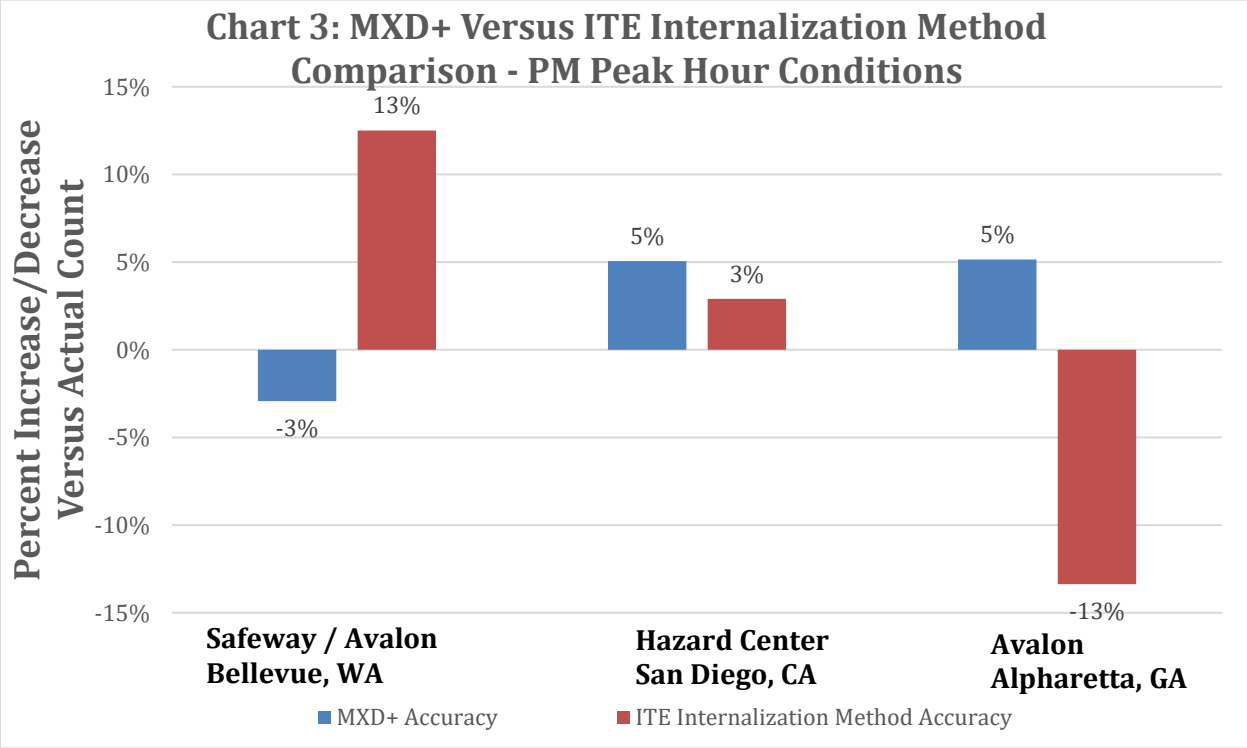
Site	Percent Reduction in Daily Trips Due to			Percent Reduction in AM Peak Hour Trips Due to			Percent Reduction in PM Peak Hour Trips Due to		
	Internal Trips	External Trips		Internal Trips	External Trips		Internal Trips	External Trips	
		Transit	Bike/ Walk		Transit	Bike/ Walk		Transit	Bike/ Walk
Safeway / Avalon Bellevue, WA	4.1%	6.4%	29.1%	9.2%	6.7%	35.0%	14.2%	6.5%	28.4%
Hazard Center, San Diego, CA	4.7%	4.9%	11.6%	10.1%	5.6%	14.3%	14.1%	5.3%	11.6%
Avalon Alpharetta, GA	5.4%	3.8%	2.3%	9.9%	4.1%	2.9%	12.0%	3.9%	2.3%
Southport, West Sacramento, CA	26.8%	1.8%	0.3%	39.0%	2.0%	0.3%	23.7%	2.2%	0.2%

Notes:
[1] Output from MXD+.



[4] In one neighborhood consisting a combined 325 single-family and multi-family units, the measured vehicle trips entering/exiting the neighborhood during the PM peak hour trip was 51% below the unadjusted ITE trip rates for those uses. When translated to the 7,700 total units in Southport, this resulted in ITE gross trips beginning at a level much higher than was being generated.

The following conclusions are drawn from the results in Table 7:



- It is not surprising that the Bellevue, WA site had a large bike/walk percentage given that is situated in Downtown Bellevue, where numerous jobs, retail, and recreation are situated close to the site.
- At the San Diego, CA site, internalization was greatest during the PM peak hour given the full activation of the various retail offerings and conclusion of the office workday.
- Despite the variety of complementary land uses at the Avalon Alpharetta, GA site, only modest levels of internalization were estimated. This is due to the amount of office space (over half a million square feet), which is disproportionately higher than the other uses. The site's jobs-housing balance skews heavily toward non-residential. It should also be noted that about 4% of external trips were assumed to be transit. This would equate to about 140 riders during the PM peak hour, which seems a bit excessive for the fixed-route bus service present.[5]
- At the Southport, CA site, internalization was greatest during the AM peak hour, which is expected given the effects of travel between home and school (to drop off students or work). External travel by transit and walk/bike was modest (less than 2.5%) as expected given that most households are not within walking distance of a bus stop and nearby destinations cannot easily be accessed on foot or by bike.

Charts 2 and 3 show results for AM and PM peak hours, respectively, of how MXD+ performed versus the ITE Internalization Method for the Bellevue, WA, San Diego, CA, and Alpharetta, GA validation sites. The Southport West Sacramento, CA site was excluded for the aforementioned reasons regarding the effects of pass-by traffic, which equally influence results from MXD+ and the ITE Internalization Method.

[5] In situations like this, local knowledge of expected transit ridership could dictate that the analyst modify MXD+ to assume no transit service, with an "off model" approach followed to determine whether any transit reductions are warranted. The presence of transit is a binary choice in MXD+. The type of transit, headways, service duration, and geographic service area are not explicitly considered.

As shown, the MXD+ estimate was closer to the actual count value at all three locations during the AM peak hour, and at two of the three locations during the PM peak hour. During the AM peak hour, the average absolute error was 7% for MXD+ and 28% for the ITE Internalization method. During the PM peak hour, the average absolute error was 4% for MXD+ and 10% for the ITE Internalization method. This clearly indicates that MXD estimates were more accurate than the ITE Internalization Method at the validation data sites.

Conclusions

This study has demonstrated that a minor recalibration of MXD+ has resulted in an analytical tool that accurately estimates the trip generation of mixed-use developments for weekday daily, AM peak hour, and PM peak hour conditions. By focusing the recalibration on 2019 conditions, the model was proven to develop accurate travel estimates despite the myriad changes in travel behavior that have occurred since the model was originally developed. The validation of the model against four mixed-use sites indicates that it may be applied across a wide range of geographies, project sizes, transportation mode availability, and land use mixes.

Paper Contributors

John Gard, T.E., is a Principal with 25 years of consulting experience at Fehr & Peers. John has applied MXD+ on numerous projects across the Western United States. He has a Bachelor's degree in Applied Mathematics and a Master's Degree in Civil Engineering from U.C. Davis. He can be reached at j.gard@fehrandpeers.com.

Corwin Bell is a Transportation Planner at Fehr & Peers with a background in consulting and academic research. He has a Bachelor's Degree in Urban Studies and a Master's Degree in City Planning from U.C. Berkeley. He can be reached at c.bell@fehrandpeers.com.

EXECUTIVE SUMMARY

Purpose of Water Supply Assessment

The purpose of this Water Supply Assessment (WSA) is to perform the evaluation required by California Water Code sections 10910 through 10915, as established by Senate Bill (SB) 610, in connection with the City of Citrus Heights (City) proposed Sunrise Tomorrow Specific Plan Area (Proposed Project) in Sacramento County. This WSA evaluates the adequacy of the District's total projected water supplies, including existing water supplies and future planned water supplies, to meet the existing and projected future water demands, including those future water demands associated with the Proposed Project, under all hydrologic conditions (Normal Years, Single Dry Years, and Multiple Dry Years).

Proposed Project Overview

The Proposed Project is located at the southeast corner of Sunrise Boulevard and Greenback Lane in Citrus Heights, California. Citrus Heights is located within the northernmost portion of Sacramento County, approximately 10 miles northeast of downtown Sacramento, along Interstate 80 between Sacramento and Roseville.

The Proposed Project is part of the Sunrise Marketplace Business Improvement District. The approximately 96.8-acre Proposed Project is currently developed with the Sunrise Mall and associated parking areas. The Proposed Project is surrounded by residential development to the south, a mix of residential and commercial development to the east, and commercial development directly to the north and west.

The Proposed Project would include adoption of the Sunrise Tomorrow Specific Plan, including the proposed Specific Plan land use map. The Specific Plan also includes a circulation and open space network to support the future land uses.

The Proposed Project is divided into six Planning Areas:

1. Planning Area 1 (PA-1): Located in the northwestern corner of the Plan Area, PA-1 is envisioned to be an employment anchor with office space. Other uses include a hotel and retail uses.
2. Planning Area 2 (PA-2): Located in the west-central portion of the Plan Area, PA-2 is envisioned as the "Mixed-Use Core", to be developed with retail, restaurants, office, multifamily residential units and a hotel all positioned around the Sunrise Commons central gathering space and the main street.
3. Planning Area 3 (PA-3): Located in the southwestern corner of the Plan Area, PA-3 is envisioned as the "Anchor Entertainment" with retail and entertainment uses. In addition, the Planning Area is envisioned as a residential hub with stacked flats, townhouses, and senior housing units.

4. Planning Area 4 (PA-4): Located in the southeastern portion of the Plan Area, PA-4 is envisioned as "Anchor Retail and Mixed-Use" with retail uses along the main street. A portion of PA-4 would also feature town houses.
5. Planning Area 5 (PA-5): Located in the east-central portion of the Plan Area, PA-5 is envisioned as "Anchor Retail and Mixed-Use" along the main street with retail uses. A portion of PA-5 would also feature town houses.
6. Planning Area 6 (PA-6): Located in the northeastern corner of the Plan Area, PA-6 is envisioned to contain a hotel and restaurant uses.

The Proposed Project meets the definition of a "Project" per California Water Code sections 10910 through 10915, as established by SB 610 in 2001, thus requiring the preparation of this WSA.

Potable and Recycled Water Demands and Supply Availability

Projected potable water demands for buildout of the Proposed Project total approximately 316 acre-feet per year (ac-ft/yr).

It is anticipated that the Proposed Project, if approved by the City, would be served from the District's existing and future portfolio of water supplies. The inclusion of existing and planned future water supplies is specifically allowed by the Water Code:

> *Water Code section 10631(b): Identify and quantify, to the extent practicable, the existing and planned sources of water available to the supplier over the same five-year increments described in subdivision (a).*

Pursuant to Water Code section 10910(4), and based on the technical analyses described in this WSA, this WSA demonstrates that the District's existing and additional planned future water supplies are sufficient to meet the District's existing water demands, including those future water demands associated with the Proposed Project.

Determination of Water Supply Sufficiency

As described in Section 7, water demand within the District's service area is expected to exceed the District's supplies by a small amount (less than 2.5 percent) under any hydrologic condition if the City is able to fully implement the Proposed Project. The City would be able to serve the Proposed Project in addition to existing and planned developments with some reliance on minor demand reductions.

DRAFT

1.0 INTRODUCTION

1.1 Legal Requirement for Water Supply Assessment

California Senate Bill (SB) 610 amended state law, effective January 1, 2002, to improve the link between information on water supply availability and certain land use decisions made by cities and counties. SB 610 sought to promote more collaborative planning between local water suppliers and cities and counties. It requires detailed information regarding water availability to be provided to the city and county decision-makers prior to approval of specified large development projects. The purpose of this coordination is to ensure that prudent water supply planning has been conducted, and that planned water supplies are adequate to meet existing demands, anticipated demands from approved projects and tentative maps, and the demands of proposed projects.

SB 610 amended California Water Code sections 10910 through 10915 (inclusive) to require land use lead agencies to:

- Identify any public water purveyor that may supply water for a proposed development project; and
- Request a Water Supply Assessment (WSA) from the identified water purveyor.

The purpose of the WSA is to demonstrate the sufficiency of the purveyor's water supplies to satisfy the water demands of the proposed project, while still meeting the water purveyor's existing and planned future uses. Water Code sections 10910 through 10915 delineate the specific information that must be included in the WSA.

1.2 Need for and Purpose of Water Supply Assessment

The purpose of this WSA is to perform the evaluation required by Water Code sections 10910 through 10915 in connection with the Proposed Project. It is not to reserve water, or to function as a "will serve" letter or any other form of commitment to supply water (see Water Code section 10914). The provision of water service will continue to be undertaken in a manner consistent with applicable District policies and procedures, consistent with existing law.

DRAFT

1.3 Water Supply Assessment Preparation, Format and Organization

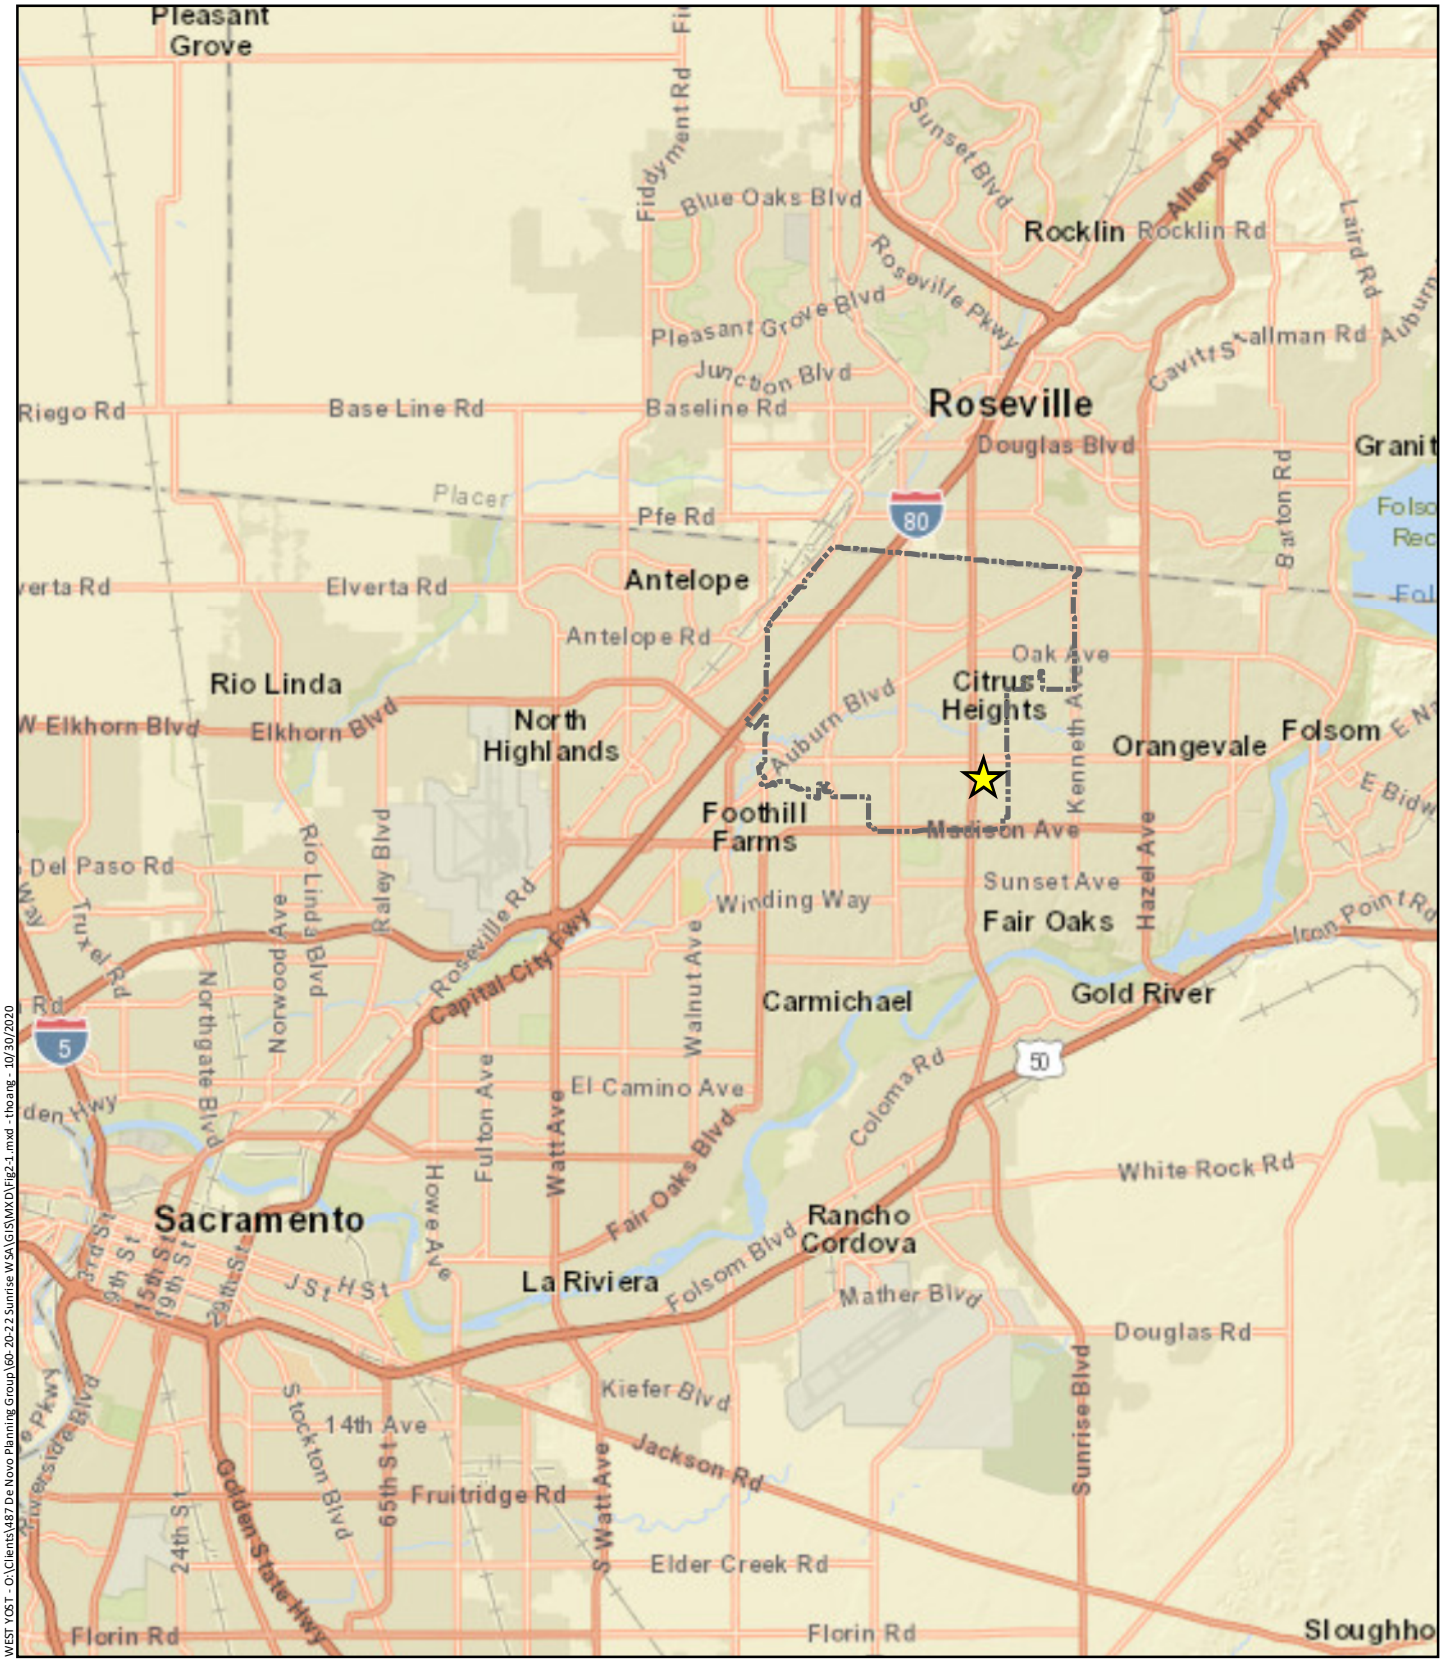
The format of this WSA is intended to follow Water Code sections 10910 through 10915 to clearly delineate compliance with the specific requirements for a WSA. The WSA includes the following sections:

- Section 1.0: Introduction
- Section 2.0: Description of Proposed Project
- Section 3.0: Required Determinations
- Section 4.0: Citrus Heights Water District Water Service Area
- Section 5.0: Citrus Heights Water District Water Demands
- Section 6.0: Citrus Heights Water District Water Supplies
- Section 7.0: Determination of Water Supply Sufficiency Based on the Requirements of SB 610
- Section 8.0: Water Supply Assessment Approval Process
- Section 9.0: References

Relevant citations of Water Code sections 10910 through 10915 are included throughout this WSA in *italics* to demonstrate compliance with the specific requirements of SB 610.

DRAFT

2.0 DESCRIPTION OF PROPOSED PROJECT



2.1 Proposed Project Location

The Sunrise Tomorrow Specific Plan Area (Proposed Project) is located at the southeast corner of Sunrise Boulevard and Greenback Lane in Citrus Heights, California (see Figure 1). Citrus Heights is located within the northernmost portion of Sacramento County, approximately 10 miles northeast of downtown Sacramento, along Interstate 80 between Sacramento and Roseville (see Figure 2-1). The Proposed Project is part of the Sunrise Marketplace Business Improvement District. The approximately 96.8-acre Proposed Project is currently developed with the Sunrise Mall and associated parking areas (see Figure 2-2).

2.2 Proposed Land Uses and Acreages

The Proposed Project is surrounded by residential development to the south, a mix of residential and commercial development to the east, and commercial development directly to the north and west.

2.3 Projected Water Demand

The total water demand for the Proposed Project is summarized below in Table 2-1. Potable water was assumed to be used to meet all the Proposed Project's water demands. This is because the District does not have any recycled water supplies.

Table 2-1. Proposed Project Water Demand Summary

Land Use	Dwelling Units[a], du	Approximate Area[b], acres	Water Use Factor[c], af/yr or af/du	Potable Water Demand, af/yr
Commercial		34.20	1.25	42.75
Mixed-Use		15.10	1.25	18.88
Residential	2,200	15.50	0.12	266.40
Open Space		9.10	1.25	11.38
Other (Transit Center)		0.80	1.25	1.00
Streets		22.10	0.00	0.00
Subtotal				340.40
Demolition[d]				24.87
Total		**96.80**		**315.53**

(a) De Novo Planning Group, Sunrise Tomorrow Specific Plan, August 2020
(b) De Novo Planning Group Email sent on October 28, 2020
(c) De Novo Planning Group Utility Calculations August 2020
(d) Data from CHWD Historical Water Demand

As shown above, projected water demands for the Proposed Project total approximately 316 acre-feet per year (af/yr) of which about approximately 341 af/yr is the new development, whereas 25 af/yr is the existing facilities that is to be demolished.

2.4 Projected Water Supply

Water demands for the Proposed Project will be served using the District's existing and future portfolio of water supplies. The inclusion of existing and planned future water supplies is specifically allowed by the Water Code:

> *Water Code section 10631(b): Identify and quantify, to the extent practicable, the existing and planned sources of water available to the supplier over the same five-year increments described in subdivision (a).*

3.0 REQUIRED DETERMINATIONS

3.1 Does SB 610 apply to the Proposed Project?

10910 (a) Any city or county that determines that a project, as defined in Section 10912, is subject to the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code) under Section 21080 of the Public Resources Code shall comply with this part.

10912 (a) "Project" means any of the following:

(1) A proposed residential development of more than 500 dwelling units.

(2) A proposed shopping center or business establishment employing more than 1,000 persons or having more than 500,000 square feet of floor space.

(3) A proposed commercial office building employing more than 1,000 persons or having more than 250,000 square feet of floor space.

(4) A proposed hotel or motel, or both, having more than 500 rooms.

(5) A proposed industrial, manufacturing, or processing plant, or industrial park planned to house more than 1,000 persons, occupying more than 40 acres of land, or having more than 650,000 square feet of floor area.

(6) A mixed-use project that includes one or more of the projects specified in this subdivision.

(7) A project that would demand an amount of water equivalent to, or greater than, the amount of water required by a 500-dwelling unit project.

Based on the following facts, SB 610 does apply to the Proposed Project.

- The County has determined that the Proposed Project is subject to the California Environmental Quality Act and that an Environmental Impact Report (EIR) is required.
- The Proposed Project includes residential and industrial land uses, and therefore is a mixed-use project. The industrial portion of the Proposed Project is expected to occupy more than 40 acres of land (Item 5 in the above list).

The Proposed Project has not been the subject of a previously adopted WSA and has not been included in an adopted WSA for a larger project. Therefore, according to Water Code section 10910(a), a WSA is required for the Proposed Project.

3.2 Does SB 221 apply to the Proposed Project?

In 2001, SB 221 amended State law to require that approval by a city or county of certain residential subdivisions requires an affirmative written verification of sufficient water supply. Per California Government Code section 66473.7(a)(1), a subdivision means a proposed residential development of more than 500 dwelling units. As the Proposed Project includes connecting up to 40 dwelling units, it is not subject to the requirements of SB 221.

3.3 Who is the Identified Public Water System?

> *10910(b) The city or county, at the time that it determines whether an environmental impact report, a negative declaration, or a mitigated negative declaration is required for any project subject to the California Environmental Quality Act pursuant to Section 21080.1 of the Public Resources Code, shall identify any water system that is, or may become as a result of supplying water to the project identified pursuant to this subdivision, a public water system, as defined by Section 10912, that may supply water for the project*
>
> *10912 (c) "Public water system" means a system for the provision of piped water to the public for human consumption that has 3,000 or more service connections…*

As shown on Figure 2-1, the Proposed Project is located within the District's Water Service Area. Therefore, District is the identified public water system for the Proposed Project.

3.4 Does the District have an adopted Urban Water Management Plan (UWMP) and does the UWMP include the projected water demand for the Proposed Project?

> *10910(c)(1) The city or county, at the time it makes the determination required under Section 21080.1 of the Public Resources Code, shall request each public water system identified pursuant to subdivision (b) to determine whether the projected water demand associated with a proposed project was included as part of the most recently adopted urban water management plan adopted pursuant to Part 2.6 (commencing with Section 10610).*

The District's most recently adopted UWMP (the District's 2015 UWMP) was adopted by the District's Board of Directors in June 2016 and is incorporated by reference into this WSA[1]. The District's 2015 UWMP included water demand projections for current water demands within the District's service area (baseline demand) and anticipated water demands associated with future development projects and planning areas within the District's water service area through 2040.

The District's ability to meet the projected water demands for the Proposed Project, as defined in the District's 2015 UWMP, is described in Section 7.0 of this WSA.

[1] J. Crowley Group. *Citrus Heights Water District 2015 Urban Water Management Plan*, June 2016.

4.0 CITRUS HEIGHTS WATER DISTRICT WATER SERVICE AREA

4.1 Water Service Area

The District is located in the northeast portion of Sacramento County and south Placer County, California, approximately 20 miles northeast of downtown Sacramento. The District was formed on October 25, 1920 under Division 11, the Irrigation District Act of the State of California Water Code. A three-member Board of Directors elected at large from divisions within the District governs the District.

The District provides water service to portions of the Cities of Citrus Heights and Roseville, and portions of the unincorporated communities of Orangevale, Fair Oaks, Carmichael and a portion of unincorporated Placer County. The service area covers approximately 7,780 acres in Sacramento and Placer counties. Only a small portion of the District's service area, approximately 140 acres, is located in Placer County.

In the early years of the District, residential and agricultural growth was nominal. Since then, urban development has flourished to such a degree that presently there is no significant agricultural water use within the District. The District now serves a predominantly residential customer base, with a 2015 residential demand equal to 78 percent of its total annual demand of 9,974 AFY. There was a total of 19,785 customer connections in 2015.

4.2 Population

Table 4-1 shows the District's historical and projected population from 2015 through 2040. Projected population assumes a relatively low connection growth rate of 0.5 percent and the current capita per connection value of 3.5.

Table 4-1. Population[(a)]

	2015	2020	2025	2030	2035	2040
Population Served	65,093	66,720	68,348	69,975	71,602	73,267

(a) Crowley Group. Citrus Heights Water District 2015 Urban Water Management Plan, June 2016.

4.3 Climate

The District's service area has cool, rainy winters, and hot, dry summers. The monthly temperature in the Sacramento region ranges from an average low of 39.5 to an average high of 91.5 degrees Fahrenheit (Western Regional Climate Center). In the past, extreme conditions have been recorded at 17 degrees Fahrenheit for the lowest temperature and 114 degrees Fahrenheit for the highest. The historical annual mean precipitation is 18.2 inches with a monthly precipitation as high as 14.2 inches and as low as 0 inches. The average evapotranspiration rate (ETo) is 50.5 inches.

5.0 CITRUS HEIGHTS DISTRICT WATER DEMANDS

> *10910(c)(2) If the projected water demand associated with the proposed project was accounted for in the most recently adopted urban water management plan, the public water system may incorporate the requested information from the urban water management plan in preparing the elements of the assessment required to comply with subdivisions (d), (e), (f), and (g).*

The descriptions provided below for the District's water demands have been taken, for the most part, from the District's 2015 UWMP, which was adopted in June 2016. Supplemental information from other available reports has been included to provide the most recent data available and to meet the specific requirements of SB 610.

5.1 Current and Future Water Demand

Water demands are projected using unit water demand factors and projected connections. The unit water demand factors are reduced over time to account for implementation of the 20x2020 compliance plan as well as new building codes.

Although overall water demands have decreased over the last five years, many factors may have caused this decrease. For 2015 demands, the State-mandated reductions are a major factor. Other factors such as economic conditions, water conservation programs, hydrologic and climate factors, and rate increases all likely contributed to the reduced unit demand factors. As these parameters likely reduced demands, it is expected that the removal of some of these parameters will also influence demands. For conservative planning purposes, it is assumed the unit water demands will increase in the short term as economic conditions improve, hydrologic conditions deliver more rain and snow, and drought messaging is reduced. However, the District's conservation program and other demand management efforts will work to reduce the demands so that the 2015 and 2020 targets will still be met.

The District's actual and projected future water demands through 2040 are summarized in Table 5-1. The "Other" category includes accounts such as construction meters, vacant accounts, and vacant land. Non-revenue water is all water that is not billed, such as water attributed to firefighting, flushing, leaks, water theft, or meter inaccuracies.

DRAFT

(a) Crowley Group. Citrus Heights Water District 2015 Urban Water Management Plan, June 2016.

5.2 Dry Year Water Demand

The District's Water Shortage Contingency Plan, outlined in Section 7 of the District's 2015 UWMP, includes a five-stage plan describing specific actions to reduce water demand by up to 50 percent in the event of a water supply shortage or emergency. The projected future dry year water demand is presented in Table 5-2.

Table 5-2. Projected Future Dry Year Water Demand

Hydrologic Condition	2020	2025	2030	2035	2040
Single Dry Year, ac-ft/yr[a]	14,424	14,775	15,127	15,478	15,837

DRAFT

6.0 CITRUS HEIGHTS WATER DISTRICT WATER SUPPLIES

10910(c)(2) If the projected water demand associated with the proposed project was accounted for in the most recently adopted urban water management plan, the public water system may incorporate the requested information from the urban water management plan in preparing the elements of the assessment required to comply with subdivisions (d), (e), (f) and (g).

10910(d)(1) The assessment required by this section shall include an identification of any existing water supply entitlements, water rights, or water service contracts relevant to the identified water supply for the proposed project, and a description of the quantities of water received in prior years by the public water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), under the existing water supply entitlements, water rights, or water service contracts

10910(d)(2) An identification of existing water supply entitlements, water rights, or water service contracts held by the public water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), shall be demonstrated by providing information related to all of the following:

(A) Written contracts or other proof of entitlement to an identified water supply.

(B) Copies of a capital outlay program for financing the delivery of a water supply that has been adopted by the public water system.

(C) Federal, state, and local permits for construction of necessary infrastructure associated with delivering the water supply.

(D) Any necessary regulatory approvals that are required in order to be able to convey or deliver the water supply.

10910(e) If no water has been received in prior years by the public water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), under the existing water supply entitlements, water rights, or water service contracts, the public water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), shall also include in its water supply assessment pursuant to subdivision (c), an identification of the other public water systems or water service contract-holders that receive a water supply or have existing water supply entitlements, water rights, or water service contracts, to the same source of water as the public water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), has identified as a source of water supply within its water supply assessments.

It is anticipated that the Proposed Project, if approved by the City, would be served from the District's existing and future portfolio of water supplies. The inclusion of existing and planned future water supplies is specifically allowed by the Water Code:

Water Code section 10631(b): Identify and quantify, to the extent practicable, the existing and planned sources of water available to the supplier over the same five-year increments described in subdivision (a).

The water supply for the Proposed Project will have the same water supply reliability and water quality as the water supply available to the District's other existing and future water customers.

The water supplies needed to serve the Proposed Project (together with existing water demands and planned future uses) are predominantly described in the District's 2015 UWMP. Therefore, the descriptions provided below for the District's water supplies have been taken, for the most part, from the District's 2015 UWMP.

6.1 Existing Potable Water Supplies

The District currently receives water from the following sources:

- Purchased surface water from the San Juan Water District (SJWD)
- Groundwater from the District's five active wells

Each of these existing supplies is described below. Table 6-1 summarizes the existing supplies.

Table 6-1. Existing Water Supplies[a]

Water Supply	Actual Volume, AFY
Purchased or Imported Surface Water	9,133
Groundwater	841
Total	**9,974**

(a) Crowley Group. Citrus Heights Water District 2015 Urban Water Management Plan, June 2016, Table 6-8.

6.1.1 Purchased Surface Water

The District purchases surface water from the SJWD. SJWD obtains its surface water through a combination of rights and contracts totaling 82,200 acre-feet per year. The specifics and reliability of each right and contract is presented in SJWD's UWMP. All of the surface water supplies are withdrawn from Folsom Reservoir into SJWD's water treatment plant. The District maintains a wholesale Water Supply Agreement with SJWD to provide surface water, as does SJWD with all the Wholesale Customer Agencies. The wholesale Water Supply Agreement does not include a volumetric amount; rather it states that SJWD will provide the District the supply it needs. The other Wholesale Customer Agencies contracts also include the same language. The District projects that during normal supply years, it will use approximately 900 AF of groundwater, and rely on surface water to meet the majority of its customer demands.

6.1.2 Groundwater

10910(f) If a water supply for a proposed project includes groundwater, the following additional information shall be included in the water supply assessment.

10910(f)(1) A review of any information contained in the urban water management plan relevant to the identified water supply for the proposed project.

10910(f)(2) A description of any groundwater basin or basins from which the proposed project will be supplied. For those basins for which a court or the board has adjudicated the rights to pump groundwater, a copy of the order or decree adopted by the court or the board and a description of the amount of groundwater the public water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), has the legal right to pump under the order or decree. For basins that have not been adjudicated, information as to whether the department has identified the basin or basins as overdrafted or has projected that the basin will become overdrafted if present management conditions continue, in the most current bulletin of the department that characterizes the condition of the groundwater basin, and a detailed description by the public

water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), of the efforts being undertaken in the basin or basins to eliminate the long-term overdraft condition.

10910(f)(3) A detailed description and analysis of the amount and location of groundwater pumped by the public water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), for the past five years from any groundwater basin from which the proposed project will be supplied. The description and analysis shall be based on information that is reasonably available, including, but not limited to, historical use records.

A detailed description and analysis of the amount and location of groundwater that is projected to be pumped by the public water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), from any basin from which the proposed project will be supplied. The description and analysis shall be based on information that is reasonably available, including, but not limited to, historical use records.

10910(f)(4) An analysis of the sufficiency of the groundwater from the basin or basins from which the proposed project will be supplied to meet the projected water demand associated with the proposed project.

A water assessment shall not be required to include the information required by this paragraph if the public water system determines, as part of the review required by paragraph (1), that the sufficiency of groundwater necessary to meet the initial and projected water demand associated with the project was addressed in the description and analysis required by paragraph (4) of subdivision (b) of Section 10631.

6.1.2.1 Groundwater Overview

The groundwater basin underlying the District is the North American Sub-basin, part of the larger Sacramento Valley groundwater basin. California Department of Water Resources California's Groundwater Update 2003, Bulletin 118, identifies the basin as 5-21.64.

6.1.2.2 Basin Description

Water bearing formations beneath the District occur in two major strata. The upper water-bearing units include the geologic formations of the Victor, Fair Oaks, and Laguna Formations and are typically unconfined. The lower water-bearing unit consists primarily of the Mehrten Formation, which exhibits confined conditions. The Mehrten Formation is the most productive fresh water-bearing unit in the eastern Sacramento Valley, though some of the permeable layers of the Fair Oaks Formation produce moderate amounts of water. Much of the recharge of these aquifer systems comes from the Sacramento and American Rivers and their tributaries where gravel deposits exist. To a lesser extent, aquifer recharge also occurs where the Mehrten Formation reaches the surface in the foothills in eastern Sacramento and western El Dorado County areas.

Supply wells in the Sacramento region draw water primarily form the Mehrten and Fair Oaks formations and typically produce 500-1,500 gpm. There are areas throughout the basin that exhibit elevated levels of iron, manganese, and arsenic. The District's wells do not exhibit any water quality issues that impact its use as potable water supply or require treatment other than disinfection prior to service.

The local groundwater basin does contain three significant major groundwater contamination areas. The United Pacific Railroad plume located northwest of the District in Roseville and the McClellan Air Force Base plume located west of the District. Both plumes are both down-gradient

and not expected to impact the District's groundwater quality. A third groundwater contamination plume attributed to Aerojet's historic operations was first detected in groundwater south of the American River in 1979. Since that time, Aerojet has installed groundwater treatment facilities and has conducted other efforts to treat and control the plume migration. However, the plume was detected north of the American River near Fair Oaks in 2000 and another plume was detected north of the American River in 2005 near Ancil Hoffman Park in Carmichael. Additional monitoring wells and pump-and-treat facilities have been installed to monitor and treat the plumes attributed to Aerojet.

Total usable capacity and safe yield of the basin have not yet been determined. Usable capacity is assumed to be the yield calculated in the DWR's American Basin Conjunctive Use Project Feasibility Study. The study assumed a specific yield of 7 percent and an assumed thickness of 200 feet. Applying these assumptions to the total basin area results in a usable capacity of 70.2 million acre-feet. The Sacramento Groundwater Authority (SGA) has recently adopted a groundwater accounting framework. The framework allows for SGA member agencies to account for groundwater banking and conjunctive use efforts and includes consideration and monitoring of groundwater levels. This information will be used to proactively manage the basin's storage capacity and available yield to support a conjunctive use strategy.

6.1.2.3 Groundwater Management

Up until the early 2000's, groundwater levels had been generally declining in Sacramento County for the previous 50 years, with many areas declining at a rate of 1.5 to 2.0 feet per year. A groundwater depression that was evident in 1968 significantly expanded and deepened in 1996. The region responded in part through the development of the SGA Groundwater Management Plan and development of multiple conjunctive use projects. As a result of these efforts, SGA reports that groundwater elevation levels have stabilized, or in some cases increased. SGA is also the California Statewide Groundwater Elevation Monitoring (CASGEM) reporting agency for the basin conditions. The District is a member of SGA and, through SGA, will continue to track contamination threats and participate in conjunctive use programs or other projects to minimize the risk of the contamination plumes.

6.1.2.4 Overdraft Conditions

DWR Bulletin 118 does not specifically identify the sub-basin as being in overdraft but does identify the previous issues with groundwater levels. Groundwater management efforts by the region through SGA and other partnerships have improved and stabilized basin levels.

6.1.2.5 Historical Pumping

The District maintains five operating wells with a projected total yield of approximately 5,000 AFY based on approximately seven months operation during the dry season. Well production rates vary from 800 to 2,100 gallons per minute. The District cycles its wells weekly to maintain operational readiness-to-serve capabilities and to supplement the surface water supply. Over the last five years, this "maintenance" groundwater production has averaged approximately 957 AFY.

Past groundwater usage from 2011- 2015 is presented in Table 6-2. There have been no issues that affect groundwater supply pumping over the last five years.

Table 6-2. Historical Groundwater Volume Pumped[(a)], AFY

Groundwater Type	Basin Name	2011	2012	2013	2014	2015
Alluvial Basin	North American Sub-basin	962	587	465	1,930	841
	Total	**962**	**587**	**465**	**1930**	**841**

(a) Crowley Group. Citrus Heights Water District 2015 Urban Water Management Plan, June 2016, Table 6-1.

6.1.3 Recycled Water

The District does not use recycled water nor is recycled water available in the service area.

6.2 Additional Planned Future Potable Water Supplies

In addition to the District's existing potable water supplies described above, the District has several additional planned future potable water supplies to meet the District's existing and projected future water demands, including those associated with the Proposed Project. The inclusion of planned future water supplies in this WSA is specifically allowed by the Water Code:

> *Water Code section 10631(b): Identify and quantify, to the extent practicable, the existing and planned sources of water available to the supplier over the same five-year increments described in subdivision (a).*

6.2.1 Desalinated Water Opportunities

The District does not foresee any desalinated water opportunities to provide additional supply. The service area is not located near any sea or brackish water supply sources, and there are no known brackish groundwater supplies nearby. Future issues and opportunities may provide for the District, through SJWD or another agency, to exchange water supplies with another agency that does have desalination opportunities. The District will continue to monitor potential opportunities and develop programs and alternatives as identified.

6.2.2 Exchanges or Transfers

The District receives all of its surface water from its wholesale agency, SJWD. The District does not own rights or contracts to additional surface water supplies that it could transfer or exchange. The District could participate in a conjunctive use program through the wholesaler that could result in transfer and exchange opportunities. At this time, the District does not plan on any transfer or exchanges.

6.2.3 Emergency Interties

The District maintains interconnections with its neighboring water agencies; San Juan Water District, Orange Vale Water Company, Fair Oaks Water District, Carmichael Water District, Sacramento Suburban Water District, California American Water Company, and the City of Roseville. The interconnections allow for emergency or short-term supply augmentation between agencies. Emergency interties are help support the short-term water shortage strategies.

6.2.4 Future Water Supply Projects

The District plans to construct an additional three wells over the next seven years to provide additional dry-year supplies. The District plans to maintain groundwater supply equivalent of 5,000 AFY from its well system. However, groundwater production could increase up to the full well capacities in successive dry year scenarios. Well site availability could impact the number of wells constructed or the construction implementation schedule. The District continues to monitor its service area for potential well sites and obtains the land as available. The District will re-evaluate its needs for new wells in the future and will update the number or timing of new wells as appropriate. Table 6-3 summarizes the District's future water supply projects.

Table 6-3. Future Water Supply Projects[(a)]

Project	Planned Implementation Year	Planned for Use in Year Type	Expected Increase in Water Supply to Agency, AFY
New Well 6	2016	Dry Year	1,300
New Well 7	2019	Dry Year	1,300
New Well 8	2022	Dry Year	1,300

(a) Crowley Group. Citrus Heights Water District 2015 Urban Water Management Plan, June 2016, Table 6-7.

6.3 Water Supply Availability and Reliability

Water Code section 10910 (c)(4) requires that a WSA include a discussion with regard to "whether total projected water supplies, determined to be available by the city or county for the project during normal, single dry, and multiple dry water years during a 20-year projection, will meet the projected water demand associated with the proposed project, in addition to existing and planned future uses, including agricultural and manufacturing uses." Accordingly, this WSA addresses these three hydrologic conditions through the year 2040.

Also, in response to drought conditions and the State of Emergency proclaimed by Governor Brown, first in January 2014 and again in April 2015, this WSA provides a discussion of the availability and reliability of the District's available water supplies to meet the District's water demands in the event that the District's surface water supplies are limited under emergency water supply conditions.

Surface supply reliability is entirely dependent on SJWD's reliability analysis of its supplies. SJWD's water supplies are subject to legal constraints through the CVP and State Board cutbacks and use restrictions as described in the 2015 SJWD UWMP. Total supply availability is also influenced by the Water Forum Agreement (WFA). Both the District and SJWD are signatories of the WFA. The WFA stipulates that SJWD supply can be cut back to a minimum of 54,200 AFY, however, it is not a legal mandate such as the CVP and State Board restrictions. Supply reductions are further discussed in Sub-Section 7.2.

The quality of water from Folsom Reservoir is considered good as the drainage basin is mostly alpine-based snowpack at the higher elevations and forest at the lower elevations with little to no urbanization. There are no water quality impacts expected that would reduce the supply.

There are no legal constraints in the wholesale/water supply agreement (WSA) regarding supply allotment or shortage requirements. The District's groundwater supplies are subject to factors that could impact reliability. Groundwater basin issues could impact the District's groundwater supply. If the wells begin to produce contaminated groundwater, the supply could either be eliminated, reduced or treated. The basin elevation levels have historical decreased, and only recently stabilized or even increased in some locations. If the groundwater levels decrease further, the District well capacities could be impacted or even eliminated. However, the SGA has a groundwater accounting framework implemented by the region's water agencies to mitigate and improve the groundwater basin conditions. It is assumed the only issue that could impact supply availability is groundwater contamination. Should this occur, the District will evaluate pump-and-treat alternatives versus drilling new wells.

Project water supplies are summarized in Table 6-4.

Table 6-4. Projected Water Supplies[(a)], AFY

Water Supply	2020	2025	2030	2035	2040
Purchased or Imported Surface Water	16,070	16,483	16,897	17,310	17,733
Groundwater	900	900	900	900	900
Total	**16,970**	**17,383**	**17,797**	**18,210**	**18,633**

DRAFT

6.3.1 Normal, Single Dry, and Multiple Dry Years

The reliability of each of the District's existing and additional planned water supplies and their projected availability during normal, single dry, and multiple dry years, as described in Section 6 of the District's 2015 UWMP, is described below and summarized in Tables 6-5, 6-6 and 6-7.

Table 6-5. Normal Year Water Supply and Demand Comparison[a,b], ac-ft/yr

Supply	2020	2025	2030	2035	2040
Supply Total	17,286	17,699	18,113	18,526	18,949

(a) Crowley Group. Citrus Heights Water District 2015 Urban Water Management Plan, June 2016, Table 7-2.
(b) The water supply was adjusted to meet water demands.

The reliability of each of the District's existing and additional planned future water supplies and their projected availability during single dry years is shown in Table 6-6.

Table 6-6. Single Dry Year Water Supply and Demand Comparison[a,b], ac-ft/yr

Supply	2020	2025	2030	2035	2040
Supply Total	14,740	15,091	15,443	15,794	16,153

(a) Crowley Group. Citrus Heights Water District 2015 Urban Water Management Plan, June 2016, Table 7-3.
(b) The water supply was adjusted to meet water demands.

The projected water supplies are compared to the demands for multiple dry years for the District in Table 6-7.

Table 6-7. Multiple Dry Year Water Supply and Demand Comparison[a,b], ac-ft/yr

Supply	2020	2025	2030	2035	2040
First Year					
Supply Total	14,740	15,091	15,443	15,794	16,153
Second Year					
Supply Total	14,740	15,091	15,443	15,794	16,153
Third Year					
Supply Total	14,740	15,091	15,443	15,794	16,153

(b) The water supply was adjusted to meet water demands.

6.3.2 Emergency Water Supply Conditions

The District maintains a comprehensive and successful Water Conservation Program. The District is a member of the California Urban Water Conservation Council (CUWCC) and annually reports best management practice (BMP) results. Annual monitoring and reporting for both the CUWCC and USBR requirements are accomplished through the CUWCC annual reporting website. In addition, the District is a signatory to the Water Forum Agreement and submits its BMP efforts, status and results annually to the Water Forum.

The District adopted an updated Drought Contingency Plan to guide staff and customers to help minimize drought or water supply storage impacts. The Drought Contingency Plan identifies a five-stage rationing plan during declared water shortages. The rationing plan also applies to catastrophic loss of water. The rationing plan determines a consumption reduction of over 50 percent of the normal consumption depending of causes, severity, and anticipated duration of the water supply shortage. The Drought Contingency Plan proposes two types of conditions for Stage 4 and 5 declarations. Both Stage 4 and 5 contain provisions for short term and long-term conditions. Table 6-8 shows the stages of the Water Contingency Plan.

Table 6-8. Stages of Water Contingency Plan[(a)]

Stage	Percent Supply Reduction	Water Supply Condition
1	0	Normal water supply
2	5-10	Probability that supply will not meet all demands
3	11-25	Supply will not meet all demands
4	26-50	Supply is up to 50 percent less than required.
5	More than 50	SJWD supply less than 52,400 AFY
USBR Health/Safety	More than 75	USBR declares water use for health and safety only.

(a) Crowley Group. Citrus Heights Water District 2015 Urban Water Management Plan, June 2016, Table 8-1.

CHWD assigns restrictions and prohibitions on end uses for each stage of its Water Conservation Program. Restrictions and prohibitions. In general, customers are provided notices and /or warning prior to penalty assessments. The District monitors water demand at all times through evaluation of customer meter reads.

During water shortage periods, the District will also evaluate customer meter reads, groundwater production meters, and wholesale meters to determine impacts of water shortage stage prohibitions and other efforts to reduce water demands.

During a water shortage condition where customer demands are decreased, it is anticipated that personnel and operations costs will not decrease at all, and may even increase depending on the shortage situation. The District maintains a cash reserve that can be used to offset short-term

revenue reductions. However, if the supply shortage is projected to last longer, the District may enact a Drought Rate Structure.

In addition to reducing demands during a catastrophic loss of supply, the District has also identified actions to maintain short-term emergency supplies for health and fire-fighting needs. The District will power its well sites through portable and fixed power generators to pump groundwater. The District also maintains five primary, three secondary, and 19 emergency interconnections with its neighboring water agencies and can obtain additional supply as needed through these interconnections.

Table 6-9 presents the estimated available supply for the next three years. SJWD projects full surface water supply for the next three years for all retailers (excluding any State emergency drought demand requirements). The supply includes the District's 5,000 AFY of groundwater capacity plus full supply from SJWD to meet projected demands over next three years. Projected CHWD demands over next three years are rounded to approximately 17,000 AFY.

Table 6-9. Minimum Supply Next Three Years[(a)], ac-ft/yr

	2016	2017	2018
Available Water Supply	22,000	22,000	22,000

DRAFT

7.0 DETERMINATION OF WATER SUPPLY SUFFICIENCY BASED ON REQUIREMENTS OF SB 610

Water Code section 10910 states:

> *10910(c)(4) If the city or county is required to comply with this part pursuant to subdivision (b), the water supply assessment for the project shall include a discussion with regard to whether the total projected water supplies, determined to be available by the city or county for the project during normal, single dry, and multiple dry water years during a 20-year projection, will meet the projected water demand associated with the proposed project, in addition to existing and planned future uses, including agricultural and manufacturing uses.*

Pursuant to Water Code section 10910(c)(4), and based on the technical analyses described in this WSA, the District finds that the total projected water supplies determined to be available for the Proposed Project during Normal, Single Dry, and Multiple Dry water years during a 20-year projection will meet the projected water demand associated with the Proposed Project, in addition to existing and near-term planned future uses with only minor demand reductions during dry year in 2040.

Table 7-1 summarizes the projected availability of the District's existing and planned future potable water supplies and the District's projected water demands in normal, single dry and multiple dry years through buildout. Under all hydrologic condition projections, there is an insufficient supply for the total water demands. The same supply availability is assumed for the single and multiple dry year scenarios. Projected demands during the dry year types are reduced 15 percent per the Water Forum Agreement.

SJWD provided information to the District regarding surface water supply availability during each year type. Through 2040, SJWD projects they will have sufficient surface water supply if demands are reduced 15 percent during dry years per the Water Forum Agreement. The District will maintain a groundwater supply of up to 5,000 AFY through the its groundwater system. CHWD assumes 900 AFY of groundwater from maintenance pumping. Therefore, the surface water purchased from SJWD is set equal to the projected demands minus 900 AFY of the District-produced groundwater.

As indicated in the tables, the District projects sufficient supplies during each dry year type. The groundwater supply, plus potential demand reductions during shortage periods, is assumed to provide sufficient reliability for these planning purposes.

DRAFT

Table 7-1. Summary of Water Demand Versus Water Supply During Various Hydrologic Conditions

Hydrologic Condition		Normal, Single Dry, and Multiple Dry Years, ac-ft/yr				
		2020	2025	2030	2035	2040
Normal Year[a]						
Available Water Supply		17,286	17,699	18,113	18,526	18,949
Total Water Demand[d]		17,286	17,699	18,113	18,526	18,949

DRAFT

8.0 WATER SUPPLY ASSESSMENT APPROVAL PROCESS

10910 (g)(1) Subject to paragraph (2), the governing body of each public water system shall submit the assessment to the city or county not later than 90 days from the date on which the request was received. The governing body of each public water system, or the city or county if either is required to comply with this act pursuant to subdivision (b), shall approve the assessment prepared pursuant to this section at a regular or special meeting.

10911 (b) The city or county shall include the water supply assessment provided pursuant to Section 10910, and any information provided pursuant to subdivision (a), in any environmental document prepared for the project pursuant to Division 13 (commencing with Section 21000) of the Public Resources Code.

The District's Board of Directors must approve this WSA at a regular or special meeting. Furthermore, the City must include this WSA in the Draft EIR that is being prepared for the Proposed Project.
